ABLE on account of cost being prohibitive, can be reclaimed and made extremely productive and valuable. It is the irrigator's under this method of whom we have the most to fear. He is absolute master of the situation. He owns his plant, can operate it when he sees fit and is not subject to even caution or suggestion from any company from whom water is purchased.
The wind being a fickle jade we have long ago eliminated it as a factor in producing power for pumping purposes, so the expense involved in wood, coal, gasoline, oil or other fuel may check him to a great extent in operating his plant, but we have in our midst, and easy of access, a new factor to reckon with, to-wit: Electricity, which can be applied at our will, in addition to irrigating our lands, to ministering to our comfort and happiness, at a cost, that according to facts and figures are minimum. What does the possessor of a pump purpose doing? Start his machine in operation—let it run night and day, flooding his land until ruined? Or will he exercise judgment—deliver his water into a reservoir, tank, box, flume or other receptacle and allow it to remain there for use when needed, thereby properly exemplifying the correct definition of irrigation, namely—insure having water when needed. Experience has proven that the only mistake the irrigator can make under this system is that of the size of the plant or pump required to irrigate a tract comprising more than 10 or 15 acres and that he can very easily overcome by applying for costs and size of plant required for any given number of acres from any office or officer of an electric company operating in or near his section. By pursuing some such policy he is not required to invest in a large or expensive plant capable of discharging enough water to flood all his land at one time and can accomplish the proper irrigation of his land at minimum cost. He further gets the benefit of every gallon of water his pump delivers, as no seepage takes place between pump and where he wants to use water. He insures himself against ruining his crops, against excessive flooding and he irrigates his land as it should be irrigated, thereby insuring, if properly cultivated, the raising of a better crop, both as to quality and quantity, than though he pursued the slipshod methods of using water simply because he had it to use.
As to electricity in this valley of ours being the most economical and the most practicable owing to a large and well managed company now in our midst extending throughout the length of our valley and reaching out in different directions as fast as possible, the following facts will show. To irrigate in the above mentioned successful manner, let us take 24 acres as an average farm. This would require one one-H. P. motor and transformer and a one-inch centrifugal pump at a total cost of \$132. This outfit will cost to run per irrigation season of four months, \$30. The pump working from sunrise to sunset will throw approximately 15,000 gallons of water to a height of 40 feet, or more to a less height. Now, according to all known facts and the testimony of experts, an acre of ground does not require 5000 gallons of water to irrigate it successfully for a period of eight days, so it can readily be seen that this small machine can very easily irrigate three acres per day. On the 8th day the tract would be completed. The care and time occupied by the farmer or gardener each day in arranging his flume or discharge pipe to his furrows might occupy him did he feel lazy, a half hour; the time occupied in earing for the motor and pump might take up three or four minutes time to drop a little lubricating oil on the bearings of the pump, and starting and stopping the motor morning and evening by throwing a switch or pressing a button.
It does not cost any more to run the machinery steadily day after day for the full season than it would were it used only once or twice a week. Alfalfa fields do not require irrigation any more than three times a season—preferably three irrigations to produce the best results. Instead of doing the irrigation necessary each time in one or two hours per acre at a large expense and waste of labor preparation, do it continuously for two or three days at a minimum cost and practically no labor. Your alfalfa will be all the better for it both in quality and quantity. A stream of water no matter how small running on the surface in any part of a 20 acre field will affect vegetable growth in that field. That's a well known fact.
Now, according to the above figures, it can readily be seen how it is the electric companies can show us how we can irrigate our fields and gardens at \$1.25 per acre, 21 acres at a cost of

\$30 for power will give us the figures \$1.25. In the short time the Conдор Water and Power Company have had plants installed in Medford and other places, the results have been exceedingly gratifying and we feel safe in saying that the following gentlemen, Joseph C. Calhoun, H. V. Doxsee, E. E. Cargill, Virgil S. Grout, W. J. Sturges, Adolphus Nale, George O'Brien, all situated on the north end of Tenth Street near the city of Grants Pass proper, who subscribed to have a party line built at a cost of \$700 and pumps and motors installed at additional expense, will obtain results more gratifying to relate than our neighbors situated in the lower end of the valley.
Now, you folks of the fields and the gardens, get together, act and act at once, double your crops in quantity and quality, and thereby quadruple your income. We, the residents, citizens and business men of Grants Pass, Medford, Jacksonville and the other towns in the Valley, are determined to make this Rogue River Valley a regular Garden of Eden and the most desirable spot in the country. We are determined to increase the prosperity of all, and we depend on your co-operation as well as our own efforts. Let us unite and stay united, so that there will be no possible chance of us falling, through a division, and the best way we can do so is by you holding up your end of it.
Look into these matters of irrigation, study them carefully and apply them.
The writer is far from knowing it all, but he has studied and observed methods in various lands and seeing is believing. There is no better instructor, in this matter, than the eye, and where we now see tracts of fertile land going to waste and loss for lack of water, let us hope we will soon see them in bloom and a source of profit in the near future.
THOS. F. COOKE, With Conдор Company.
Take Time To Eat Hurry at Meals Will Send You to Rotermund for Mi-o-na Stomach Tablets. "Eat in haste and repent at leisure" is an old saying brought up to date. Hurry at breakfast means a bad start for the day, and if you hurry also at the other meals, you will soon suffer with loss of appetite, sleeplessness, nervousness, furred tongue, specks before the eyes, headache, backache, weakness and debility, indigestion, or other ills that are caused by an abused stomach.
Here in Grants Pass, as in thousands of other places over the country, hurry at meals increases the druggists' business. Not a day passes that Rotermund does not sell several packages of Mi-o-na stomach tablets to those who have ruined their digestion by not taking time to eat.
Of course indigestion has many other causes, but whatever the cause, the remedy is the same, Mi-o-na. It cures any acidity there may be, increases the flow of the gastric juices, and actually gives strength and tone to the whole digestive system, so that you can soon eat anything at any time without fear of indigestion. Rotermund has seen so many cures made by Mi-o-na that he sells it under an absolute guarantee that it will be successful in every case where it is used in accordance with directions, that is, one tablet before each meal, and will refund the money to anyone whom it does not help. A large box of Mi-o-na tablets costs but 50 cents if it cures; nothing if it fails.
Rheumatism Makes Life Miserable. A happy home is the most valuable possession that is within the reach of mankind, but you cannot enjoy its comforts if you are suffering from rheumatism. You throw aside business cares when you enter your home and you can be relieved from those rheumatic pains also by applying Chamberlain's Pain Balm. One application will give you relief and its continued use for a short time will bring about a permanent cure. For sale by ... Clanece.

WALDO Spring weather lately. Billy McKee ate Easter Sunday dinner with Mrs. Valen. C. J. Murphy left for Quebec Wednesday. Mr. McCormick took his place. Miss Cle Pickens who has been staying with Mrs. Jesse Eggers left Sunday. F. M. Nickerson visited Waldo Saturday taking orders for tailor made suits. Mrs. Ida Decker went to Tonopah, Nev., a few days ago to visit Mr. and Mrs. Cowan. Jessie Honlan returned to Waldo Monday from Crescent City, where he has spent the Winter. Grandpa and Grandma Hogue are now living on their place five miles up the river from Takilma. M. J. McBriety got thrown from his wagon Monday. The horses got frightened and ran away. He is getting along nicely. Mrs. Homer White has been visiting with her mother, Mrs. Seyferth, for the past week. FOX.
SPRING CATARRH Rotermund Sells Hyomei Under Guarantee of Cure. The changeable weather of Spring is directly responsible for the prevalence of catarrhal troubles in Grants Pass at the present time. As a result, Rotermund has had a larger sale for Hyomei the past week than ever before in the years that he has handled this reliable treatment for the cure of catarrh. Unlike the ordinary remedies that have been used in catarrhal troubles, there into stomach dosing with Hyomei. It is breathed through a neat pocket inhaler that comes with every outfit and its balsamic, antiseptic healing penetrates to the most remote cells of the nose, throat and lungs, killing all catarrhal germs, healing the irritated mucous membrane, and effecting a complete and permanent cure. If there is a single catarrhal germ in the system, Hyomei will search it out and absolutely destroy it, completely eradicating the trouble. The remedy has made so many cures among Rotermund's customers that he offers to pay for it himself if it does not benefit even the worst case of catarrh. The complete outfit costs only \$1.00, consisting of an inhaler, medicine dropper and bottle of Hyomei, while extra bottles of Hyomei can be obtained for 50 cents. There will not be even this small expense if Hyomei does not cure, as Rotermund will return your money.
