SOURDOUGH.

Miss Ethel Palmer is spending the week in the mountains near the mouth of the Illinois, resting, far away from the sound of a piano. Miss Palmer does not object to the sound of a piano, but the continued teaching from morning until night six days in the week, is very trying. In the seven working days previous to her leaving, Miss Palmer gave 80 lessons on the piano. She has a very large number of scholars many of whom have high musical talent and a number of whom are preparing to give recitals.

Jail Break.

Mack Smith, confined in the county jail awaiting trial at the next term of the circuit court for the larceny of clothing from the Stanley store, escaped from jail last Friday night. Smith has been confined in the corridor of the jail and he in some manner secured possession of a file and a wrench, probably passed in to him by a confederate. He sawed some of the bars half in two and pried them apart making an opening of sufficient size for his body to pass through. The authorities are on the track of the fugitive but he has not yet been captured.

School supplies at Clemons.

The fruit growers picked on a bad time for their meeting as everyone seems so busy.

Mr. Weeks from Nevada came over on the stage Wednesday and got a supply of provisions at Green's store and went out in the hills prospecting. We hope he will find a rich mine.

Green and sons are getting along nicely with the large building. It is 20x40 feet. They hope to have it done in a week or two and it will add much to the progressiveness of Provolt as they will open up a store and will sell at right prices. Give them a call. **PANSY.**

LELAND

No sickness to report.

Timbers locators are plentiful.

The weather at present is cool and cloudy with south winds.

The Red Fox Company has a 5-foot ledge on Mt. Reuben. The assay is \$15 to the ton, a free milling ore.

People are shipping baled hay to other parts. Money is coming back, so times are good here, so let's keep the republican party in power; then good times all of the time.

The Lewis Co., who have the Burton place leased for mining purposes, drilled and bored down south of the Burton ranch on an old channel. They went down 80 feet through big boulders that would call for a flume over a mile long if they found bedrock, so that company abandoned the place. They have an engine for boring and drilling, so now they are boring on an old blue channel, one half mile up the creek from the town of Leland. In '78 old General Lane hired a shaft sunk to bedrock, found good gravel and went to Roseburg to organize a company to buy the Maloney place but the enterprise failed, so nothing has been done since until the Lewis Co. purchased the ground and as they have the means to develop the channel, we can expect them to open one of the richest channels in Southern Oregon, for the prospect warrants it.
