OTHER POWERS ARE BUILDING BIGGER AND BETTEB BATTLESHIPS.

Benator Hale Presents a Remarkable Comparative Statement of Naval Strength to the Senate.

Washington, Feb 12 -- A remarkable comparative statement of naval strength in respect to new battleships through evaporation in about ten was submitted to the Senate yester day by Senator Hate. It was prepared by the Navy Department, and It makes the United States look like a pigmy in comparison with certain

The comparison shows that the biggest ships being built or projected are four 21,000 tons each by Russia Next comes Japan with one of 19,000 tons and one of 19,200. Germany has provided for four 18,000 ton battleships, and France for six of 18,350 tons each and 19-knot speed. Great Britain's Dreadnaught of 17,900 tons is smaller than vessels building or projected by Russia, Japan, Germany and France. Great Buttain will build three more of 18,400 tons. however, to make 21 knots or more.

The South Carolina, of the latest type designed for the united States navy, having 18 % knots speed, is small and slow in comparison. This statement from Senator Hale is believed to point to authorization of an additional big battleship aside from the one authorized last year.

EXCLUDE WOMEN A MINE IN IYLO COUNTYS

The Alexandria Gold and Copper Mining Co. Owns a developed mine in the Argus range of mountains in Inyo county, California, and according to the engineer's report has 5000 tons of ore in sight. The engineer's report is herewith given:

Engineers Report

Sag Francisco, Cal., Jan. 4, 1907.

The Alexandria Gold and Copper Mining Co
Gentlemen:—I have finished an exhaustive examination of your properties in the Argus Range of mountains. Since making my examinations some years ago, I find your properties have been developed continuously. I find the developments under the efficient direction of your superintendent, Mr. H. C. Hamilton, have been carried on in an expression and externatic manner. sconomical and systematic manner.

economical and systematic manner.

There is now on your property fully 2000 feet of drifting and 500 feet of shafts, all in ore, throwing a very large tonnage in sight. I should say, on the "Little Maud" and "Knight" vein, which have been exploited by nine tunnels and numerous cuts along the veln, exposing the ore for fully 1700 feet in length, there is fully 40,000 tons of ore that could be called in sight. On the "South Inyo" vein there are 5000 tons in sight, and on the "Star of the West" there are also

are 5000 tons in sight, and on the "Star of the West" there are also 5000 tons that can be conservatively called in sight.

At no place where the ore was opened were values below milling, and at least seven per cent of the ore can be sorted for shipping. The ore can be cobbed to over \$100 per ton. I have suggested in my detail report that a bucket train and a 25-stamp mill should be immediately erected. These improvements would cost \$50,000 and would immediately put your property on a dividend paying basis. A 20-stamp mill would mill four tons to the stamp, or 80 tons per day. From my sampling your milling ore should average \$15 per ton, or \$1000 to \$1200 per day in free gold and concentrates, and your shipping ore at least per day, in free gold and concentrates, and your shipping ore at least four tons per day, have a value of over \$100 per ton, or \$400 per day. This can be done at an expense of \$3 per ton of ore mined. I should reommend this expenditure immediately. Your property will then pay enormous dividends and with the large tennage already opened up,

of snown values, would pay for years

In my opinion the property, with depth, is turning into copper.

All of your lower workings demonstrate this, the gold and silver values holding out. With a larger per cent of copper co ming in, and with the advent of the railroad, your property would more and more be brought into prominence as a shipper.

Yours very truly,

(Signed) W.B. GILLINGHAM, M. E.

Does This Look Good to You?

It certainly looks good to us and you will note that additional stamps are needed to mill the ore already in sight and that is the reason stockk is being sold at the prospect price of 25 cents per share.

Will You Bny Some of the Stock?

The stock is easily worth double the price asked for it, but the The stock is easily worth double the price assed for it, but the quick money is worth more to the company than the stock that will have to be sold to build and equip the mill. The stock is selling at the price of many ordinary prospects, but as a matter of fact it is a REAL MINE. If you failed to realize the importance of the above report, read it over again and see if you do not wish to join as a parture, in a proposition that you, yourself must acknowledge is meritorious in every respect. ions in every respect.

Get Some Hlexandria now.

After the present allotment is sold, the stock will be entirely withdrawn from sale, and will undoubtely be worth from two to four times what it is now selling for. Stock in a dividend paying mine at 5 cents per share is certainly a bargain, and that is what Mr. Gillingham says it is, as soon as the mill is in operation. The ore being in sight, all that is necessary is the equipment to handle it. The allotment will be sold promptly and in offering it to you, it is unnecessary to state that we advise its purchase. Don't be too slow in getting your orders in. As soon as you read this, write or wire the number of shares you want. Our customers are our best friends, because we make them money.

Market Letters Free Upon Request.
