Her residence was twice burned by the Indians. Though she will be 80 years old the first of next May, Mrs. Sexton has lost none of her mental vigor and relates the incidents of the early history of this section as vividly as one 20 years her junior.

A Brief Record of Local Events.

The weather the past week reminds us of the good old summer time. It has been warm and balmy and really makes one want to get out in the garden and tickle the earth with a hoe.

The Volney Colvig 80-acre farm on Jones Creek, three miles south of town, was sold through the Harmon & South agency last week for \$30.00. Briggs & Son of Redfield, S. D., were the purchasers.

It's the story about town—the Goodness and Cheapness of the Wall Paper at O'Neill's

Prof. P. L. Campbell president of the State University at Eugene, has been in the city to day in the interest of that institution.

Carroll Gillette returned home last Monday from Bremerton, Wash., where he had just finished a four years' enlistment in the United States navy department with an honorable discharge. The last two years of his service was as a hospital steward. Carroll is the son of Mr. and Mrs. O. G. Gillette of this city. He expects to make his permanent home in Grants Pass.

The Grants Pass band is coming to the front rapidly.

There are about 30 pieces, all told and while they have been organized but a few months, Prof. Rowell, their leader, is much elated over the rapid progress the boys are making. Their appearance at the opera house the night of the Fulton rally elicited much favorable comment. Prof. Rowell says that he hopes to have the boys in trim within the next two or three weeks to give open air concerts in Railroad park regularly one night a week. Grants Pass should be proud of its new band.

Medford last Friday voted favorably upon the question of issuing three hundred thousand dollars in city bonds for the building of a new water system.

Jesse Harper a brother of Mrs. J. W. Stephenson, arrived last week from Bonanza, Ore., driving his team in two and three quarter days. Mr. Harper will make Southern Oregon his future home.

About 30 of their friends tendered Mr. and Mrs. Fred Lehman a pleasant little surprise at their home at 10th and A streets last Saturday night. Chrades, games and light refreshments, all contributed to the mirth of the evening.

Considerable interest has been manifested of late by a number of young ladies of the city in the new boys' band and there is some talk of instituting such an organization. Such an institution would certainly make a great hit here at home, besides eliciting much favorable comment from outside towns.

That Grants Pass is going to have a baseball team this season, that can hold its own against any in the valley, is very evident from the fact that the boys had a 14 inning practice game last Sunday with a score of 5 to 6. Next Sunday they have their first game of the season with Jacksonville on the local diamond. Jarvis will probably be in the box for Grants Pass, with Setzer at the receiving end.

The White House Grocery

Science has developed something infinitely better than the old-style wrap or clamp.

"PITTSBURGH PERFECT" FENCES ARE WELDED BY ELECTRICITY.

This is the modern method of construction. Years of life are added through the elimination of serious fence defects.

A WRAP holds moisture, cracks the galvanizing and allows the water to attack the bare wire. A small amount of displaced galvanizing on "PITTSBURGH PERFECT" REINFORCES THE PROTECTION AGAINST RUST AT THE ELECTRICALLY WELDED JOINT; examine the joint.

STAYS CANNOT SLIP. They are always just where they were put. Stay and strand wires become one piece when the union is made. The fence is like a solid sheet of perforated steel.

Every Rod is Guaranteed Perfect.

Don't allow your prejudice in favor of the rapidly-declining and now antiquated methods you have heretofore known, to warp your good judgment.

"PITTSBURGH PERFECT" FENCES REPRESENT PROGRESS, because hundreds of thousands of dollars worth of standard material is daily welded by electricity.

The hoop on the average sugar barrel in the isolated country grocery store is an electrically welded product.

If your wagon was made in a large factory, its tires were welded by electricity.

You will find electrically welded hoops on ice cream freezers and washing machines, on many tubs and buckets. Examine them.

"PITTSBURGH PERFECT" fences are made by this modern, simple and marvelous process, producing "THE WELDED THAT HELD."

MR. FARMER: LISTEN, NOW. Every agent handling "PITTSBURGH PERFECT" fences is authorized to guarantee this:

That the wires are not injured at the joints.
That the fence is perfectly adjustable to uneven ground.
That the stays will not separate from the strands.
That the stays are all right in every particular.

Could you ask any more definite protection? Your complete satisfaction is absolutely assured.
