

Bad Attack of Dysentery Cured.
 "An honored citizen of this town was suffering from a severe attack of dysentery. He told a friend if he could obtain a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, he felt confident of being cured. He having used this remedy in the West, he was told that it kept it in stock and lost no time in obtaining it, and was promptly cured," says M. J. Lench, druggist, of Wolcott, Vt. For sale by M. Clemens.

PROFESSIONAL CARDS

Dr. M. C. Findley has gone for about six months study in Germany, after which he will be in his office as usual. The doctor has kept his records carefully and broken glasses can be promptly replaced by sending them to his office. His practice is left in Dr. Loughridge's care. Dr. Loughridge tests eyes and fits glasses, and has had several years experience.

FRUITGROWERS MEETING

(Continued from First Page.)

was a successful business man of this city first in the grocery trade and then in the furniture business, but now raising fruit on a fine farm that he bought last year below town, spoke on the market phase of the fruit industry in Rogue River valley. He is fully convinced that dollar to dollar in investment that there is more profit in an orchard or vineyard in a period of years than in a mercantile establishment. Not to make an orchard profitable the right kinds must be planted and the right care given them and then the fruit must be rightly picked and packed. It is the fruit that is honestly graded and packed attractively that brings the fancy prices.

H. C. Bateham, formerly one of the leading orchardists of Hood River but now located in Fruitdale district, took co-operation and the need of a strong Fruit Growers Association as his theme. In California where there are no fruit growers organizations to force the buyers to bid up the growers are making but little profit on their orchards, while at Hood River where there is the best organized and strongest fruit growers association on the Pacific Coast, the world's record price for apples has been obtained. He favored that the Grants Pass Fruit Growers Association be incorporated and an income provided that would put it on a strong financial basis. By another year a warehouse should be built. The packers should be under the control and direction of the manager of the Association and an honest and uniform pack should be put up and the boxes should be attractive and lithographed labels should be used. As is the rule with the Hood River Association this Association should exact each spring a contract with each member for his fruit so that a definite knowledge would be had of the amount that the Association would have for sale. Having control of a definite quantity of fruit is one of the factors that has enabled the Hood River Association to make its record sales, and these sales are made each season before even the fruit is picked. As the fruit industry in Josephine county is in but its beginning, the principal work for the Association for the present is to carry on a campaign of education to teach the orchardists how to grow better fruit and how to fight the pests and to enforce the pest laws. This work is so important and necessary that every person interested in the development of the fruit industry in this county should join the Association and do their part.

Geo. A. Hamilton, a former merchant of Oregon City but now a fruit grower of Fruitdale district, got interested in fruit growing by the big profit that his friends were making at Hood River. He investigated all the fruit districts and found that Rogue River Valley had more natural advantages than any section of the Pacific Coast and in the year and a half that he has been here he has learned more of the valley and consequently likes it the more. The pest problems though was a serious matter to the fruit growers here and they could only be held in check by the rigid enforcement of the pest laws and to accomplish this it is necessary that all growers co-operate and this can best be done through the Fruit Growers Association. To raise the standard of the orchards and the quality of the fruit is another matter that demands more attention than has been had in the past, and the exacting demands of the market make it that more heed must also be given to putting up an honest pack in an attractive manner.

On the afternoon session being called to order election of officers was had for the ensuing year. J. H. Robinson was re-elected president, C. M. Bateham vice-president, Charles Meserve secretary, and H. L. Gilkey treasurer. For directors G. A. Hamilton, H. C. Bateham and C. W. Triplett were chosen.

The remainder of the afternoon was taken up in a general discussion of methods of controlling the pest and of preventing damage to orchards by frost. H. C. Bateham said more spraying must be done for the codlin moth and that the best solution was three pounds of arsenate of lead to 50 gallons of water and that the best results would be had by applying it under a heavy pressure, 200 pounds being better than 100 pounds, and that a coarse nozzle should be used. For green, black and woolly aphids use a solution of tobacco, whale oil soap or quassia chips. Either were good and sometimes one would fail, and the other would kill the pests. H. D. Eismann said they had had the best success with the prepared tobacco preparation using one gallon to 50 gallons of water. Prof. R. R. Turner reported that a green worm was troubling his young pear trees. Mr. Eismann stated that

these worms had been in their orchard but they readily freed the trees of the pest by using arsenate of lead spray. President Robinson had also found the lead solution death to the worms. Cut worms could be kept away from young trees by a liberal application of ashes about the base of the tree so Mr. Eismann stated.

A general discussion of pests was had and much valuable information was gained by the beginners in fruit growing.

In the discussion of cultivation methods Daniel Peterson, one of the successful orchardists of Hood River, stated that he had this spring cultivated his orchard 13 times and that he would continue to cultivate at frequent intervals for the balance of the season. For the first plowing he used a turning plow and for subsequent cultivations a springtooth harrow. To conserve all the moisture possible he had a smoothing attachment to the harrow. This was a 2x12 inch plank fastened by chains to the harrow dragging behind. Mr. Bateham stated that the Hood River orchardists mostly used the disk and the springtooth harrows for cultivation.

While Rogue River Valley is more free from frosts than most fruit districts, yet the low sections of this Valley get frosted once in a great while and this spring was one of the fateful years. In the discussion had on the frost problem, it was the opinion of all that so soon as the methods won practiced in other fruit districts for keeping off the frost were fully understood here and growers prepared to meet the danger that there would be no more likelihood of losing a crop of fruit from the weather than from the pests. Much valuable information was brought out as a result of past experiments and readings of those present and hereafter on a cold spring these protective measures will be put into use.

In the work of the Fruit Growers Association's campaign of education it was decided to hold this summer a series of orchard meetings where practical demonstrations could be given by experts in methods of handling orchards and vineyards and of subduing the pests. The first of these meetings will be held at Riverside Fruit Farm and Elerslee Fruit Farm, owned respectively by Geo. A. Hamilton and Prof. R. R. Turner, on Saturday afternoon, June 20, the session beginning at 2 o'clock. These farms are located in Fruitdale district on the south side of Rogue river, two miles from this city. At the close of the business meeting a social hour will be spent when the ladies of Fruitdale Grange will serve light refreshments. All who are interested in the development of the fruit industry in Josephine county are invited to attend this meeting, the ladies as well and the business men of Grants Pass too.

FOUND TRUE REMEDY
 Demaray is Sure Mi-o-na Will Cure Indigestion.

The incalculable amount of good that Miona stomach tablets are doing in Grants Pass, in making sick and even despairing people well, should compel the attention of every judicious person who is out of health with stomach troubles.

The underlying cause of nervous debility, headaches, sleeplessness and melancholy is faulty nutrition, the result of a weakened stomach and inactive bowels. So long as the stomach is weak the tissues cannot assimilate proper nourishment, no matter how much food is eaten. Mi-o-na increases the strength and activity of the muscular walls of the stomach, regulates the bowels and makes the blood capable of conveying nutriment to all the vital organs.

The use of Mi-o-na stomach tablets makes all the difference between a tired, nervous, sluggish condition, a weakened stomach, and a healthy, energetic bodily condition. In no other way can you so quickly, so readily and so positively stimulate the stomach to good health as by using Mi-o-na. The fact that this remedy is sold by Demaray under a guarantee to refund the money unless it cures, shows conclusively its superiority over ordinary, old-fashioned digestives.

Good Liniment.
 You will hunt a good while before you find a preparation that is equal to Chamberlain's Liniment as a cure for muscular and rheumatic pains, for the cure of sprains and soreness of the muscles. In cases of rheumatism and sciatica it relieves the intense pain and makes sleep and rest possible. In cases of sprains it relieves the soreness and restores the parts to a healthy condition in one-third the time required by the usual treatment. It is equally valuable for lame back and all deep seated muscular pains. 25 and 50 cent sizes for sale by M. Clemens.

Going Camping this Summer.
 Try Newport or Yaquina. Round trip tickets from Grants Pass for \$10 good six months. On sale daily after June 1st. Ask me for further information. R. K. MONTGOMERY, 5-8-St. Local Agent.

W. C. T. U. NOTES

Yes, there have been stirring campaigns in Oregon, with the W. C. T. U. Anti-Saloon League and all temperance people working shoulder to shoulder in ridding our home state of saloons. Thank God for earnest workers that have made this glorious victory possible! Last Sunday nine of our boys went, by request of Merlin W. C. T. U. to a rally at that place. The boys did splendidly and we see in them the elements for noble, useful manhood, which will never vote to keep temptation before other generations. The program was repeated at the urgent request of the audience and the boys held the rapt attention of their hearers throughout the repetition, which is more than can be said of most men. Let the Mehal Contest work go on!

More and more, as evidence is furnished by prohibition communities, does it become evident that the absence of the liquor traffic tends to prosperity, both moral and financial.

Is there a mother who wants her boy to come home so under the influence of liquor that she, herself cannot recognize him as her own? God help mothers who are not glad that the open saloon may no longer tempt their boys.

PRESS COR.

MULE CREEK.

Inspector Ames and Deputy Supervisor H. M. Guthrie of Forest the ser-stopped here for a few days on their way down Rogue River to the coast, inspecting the Siskiyou National forest.

Mr. Curtis, head sawyer for the Rogue River Mining and Developing Co., went out to the valley last week, returning yesterday.

G. W. Clay of the Red River Gold Mining and Milling Co. went to West Fork to look after their saw mill which has arrived from the east. It will be packed and put up as soon as possible.

Mr. Brown is superintendent of construction for the Red River outfit since Mr. Lealey's death. He is pushing the work right along as they wish to accomplish as much as possible this summer. They have about 16 men employed.

The flume of the Rogue River Mining and Development Co. will soon be complete and water turned in.

Hathaway Jones and wife went down the River on a visiting trip this week.

Election passed off very smoothly on Mule Creek.

Solitude Bar people are working steady and it is reported that they are meeting with successful cleansups.
