

Bad Attack of Dysentery Cured.
"An honored citizen of this town was suffering from a severe attack of dysentery. He told a friend if he could obtain a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, he felt confident of being cured, he having used this remedy in the West. He was told that I kept it in stock and lost no time in obtaining it, and was promptly cured," says M. J. Leach, druggist, of Wolfcott, Va. For sale by M. Clemens.

PROFESSIONAL CARDS

Dr. M. C. Findley has gone for about six months study in Germany, after which he will be in his office as usual. The doctor has kept his records carefully and broken glasses can be promptly replaced by sending them to his office. His practice is left in Dr. Loughridge's care. Dr. Loughridge tests eyes and fits glasses, and has had several years experience.

ROGUE RIVER VALLEY ORCHARD NOTES

BY CHARLES MESERVE
Secretary Grants Pass Fruit Growers Association

The orchard meeting to be held at Fruitdale this Saturday afternoon promises to be the largest gathering of those interested in the fruit industry in Josephine county of any such meeting yet held by the Grants Pass Fruit Growers Association. Word has been received by Secretary Meserve that nearly all the leading orchardists of the county will be present and quite a number of the prominent business men of Grants Pass, accompanied by their ladies, will attend. The business men of this city are realizing more and more the importance of the fruit industry in the prosperity of the county and in the building of their city and they are now giving a hearty co-operation to the fruit growers in their campaign of education to teach the beginners how to grow an orchard and how to protect the trees and the fruit from pests and how to pack their fruit so that it may command the best markets.

The meeting will be held at Riverside Fruit Farm and Elersloe Fruit Farm, owned respectively by Geo. A. Hamilton and Prof. R. R. Turner, and it is expected that all will be at Mr. Hamilton's promptly at 2 p. m. The first half of the afternoon will be devoted to a tour of the orchards under the direction of H. C. Bateham, who will explain methods of pruning and caring of both young and old fruit trees and how to identify the various pests and how to subdue them. Mr. Bateham is from Hood River coming to Fruitdale this past winter where he has bought land and will plant an orchard and vineyard. Mr. Bateham had a fine orchard and nursery at Hood River and he had the standing there as one of the leading experts in that famous fruit district in all that pertains to fighting the pests and to growing fruit. It is at the invitation of the officers of the Fruit Growers Association that he will take charge of the demonstration work at Saturday's meeting and it will be to the interest of all who want to learn the secrets of successful fruit growing, that if acquired through their own experience would take years of time and much money, to attend and pay close attention to what will be demonstrated. The tour will include an old orchard that is being reclaimed and young orchards of apple, pear, peach and cherry trees and a young vineyard.

At the close of the orchard demonstration a social hour will be spent on the lawn at Mr. and Mrs. Hamilton's home when the ladies of Fruitdale Grange will serve light refreshments. The Riverside Farm is but two miles from this city by a good road, or a shady trail by the river bank.

The outlook for the fruit market is now interesting the fruit growers of Rogue River Valley. Contradictory reports are in circulation as to the probable yields in the other fruit districts of the United States, by some it appears that there would be a big shortage and others give it out that there will be a large crop. The price outlook is equally as uncertain. The indications though are that fair prices will prevail for the fictitious boom of last fall in prices and the subsequent complete collapse of the market will make the buyer shy of gambling in fruit and as the increase in fruit production is not keeping up with the increase in the population of the country and the demand exceeding the supply prices must stiffen.

One of the closest observers of the fruit conditions of the country is Horace G. Day, of Sgoebel & Day, New York. Mr. Day each spring makes a complete tour of the fruit districts of the United States and he just completed last week his tour for this spring. In a letter received by Secretary Meserve of the Grants Pass Fruit Growers Association, Mr. Day gives his estimate of the crop for this season, his letter being as follows:

New York, June 6, 1908
Grants Pass Fruit Growers Union,
Grants Pass, Ore.

Gentlemen: Our Senior has just returned and we are very glad he had such a nice visit with you. From Grants Pass he went on to Salem, where he found that last year they had no Spitzbergers, while this year they will have 10 cars. At Portland he learned that Mr. Leonard at Lafayette would have about 10 cars Spitzbergers and he had 10 cars last year. At Hood River they had 30 cars last year, and will have 70 this year. Wenatchee had 12 cars last year and 15 this year. Yakima had 20 cars last year and 30 this year. Boiled down there were about 100 cars Spitzbergers last year, and 180 this year, if all goes well. As to Newtowns in the four places

they had 130 cars last year, and they will have 180 this year. B. G. & Co. paid \$2.60 for about 25 cars Newtowns from Lewis, Pellet, Hopkins and others, of Medford and they lost money. Their idea next season, we understood, would be about \$1.50 f. o. b. There are no Newtowns and Spitzbergers grown in any other part of the country. At Wenatchee they had 75 cars Winesaps last year, and this season expect 150. The crop of apples in Southern Idaho is a good one, but down in Colorado they have been badly hit by the frost and they will have 1000 cars altogether down there (Winesaps, Jonathans, and Rome Beauties) in place of the about 3000 expected. The apple crops in the middle west (Arkansas, Missouri, Michigan, etc.) have been badly hurt by frost. Pretty good crop growing in N. Y. state and New England.

By the time these apples are ready to market the financial situation here will be very much better, and the skies will be blue. We do not expect any exaggerated figures, but as Mr. Day told you, and we see no reason to change our views since his return, the situation is going to be a great deal better than you people on the coast think, always provided the fruit is all right. North of you there are no Bartlett pears of consequence. Some up at Yakima, but they are not high grade, most of them, and certainly down through Utah they are poor enough, in fact the blight took most of them down there.

The above covers the situation, and if the re is anything we have not put in, drop us a line and tell us.

We have to thank you Mr. Meserve for a copy of that article which he wrote, and published in one of your papers, and surely it was very complimentary, and we appreciate it very much. We remain,

Very truly yours,
SGOEBEL & DAY.

S. A. Hering, of Portland, superintendent for Oregon for the Pacific Fruit Express Company, was in Grants Pass Tuesday to interview Secretary Meserve, of the Fruit Growers Association, in regard to the quantity and the kinds of fruit that would be for shipment from this section of Rogue River Valley this season. The Pacific Fruit Express Company is a corporation within the Southern Pacific organized last year for the purpose of supplying refrigerator cars for shipping fruit. For years past the Armour Company of Chicago, supplied all the railroads in the United States with refrigerator cars and controlled the fruit carrying trade of the country. But the railroads are one by one breaking loose from this giant monopoly and last year the Southern Pacific installed refrigerator cars of their own on all their lines. These cars are much superior to the old Armour cars, they being larger and made more nearly non-conductor of heat and cold, and they have the further advantage of having larger ice tanks which insures the keeping of pears, peaches and berries in better condition when shipped during hot weather. Mr. Hering has charge of all fruit carrying business in Oregon for his company and during the summer and fall months he has an exceedingly busy time. He stated to Secretary Meserve that the indications were that larger shipments of fruit would be made from Oregon this season than in a former year. The acreage of fruit in the state is steadily increasing and the growers are becoming more proficient in producing a perfect fruit and in putting up a pack that in honesty and attractiveness meets the demands of the better class of trade and that will stand up to distant markets. He thinks that there is no reason to doubt that the market being opened up with cooperation for the past will add to the production and the demand is steadily gaining by reason of increase in population and the trade of civilized people to eat less meat and more fruit. The art of packing and shipping fruit is now so perfect that fruit can be sent thousands of miles to a market and arrive in the best of condition. As to the Rogue River Valley, Mr. Hering thinks that with the splendid record that this valley has had in raising high grade fruit, and in getting prices beyond the highest hopes of the old-time orchardist who seldom got above 30 cents a box for his fruit, that its orchards will be veritable gold mines to the owners in the years to come. And the more orchards and vineyards in Rogue River Valley the greater and the more certain will be the profits for there will be better packing, shipping and marketing conditions and a more thorough campaign and a lessened expense in holding the pests in check.

City Treasurer's Notice.

There are funds in the city treasury to redeem all outstanding warrants protested to January 3, 1906. Interest on same will cease after this date.
Dated at Grants Pass, Ore., May 23d, 1908.

Kennedy's Laxative Cough Syrup acts promptly yet gently on the bowels, through which the cold is forced out of the system, and at the same time it allays inflammation. Sold by Model Drug Store. 4-3 1st

A Square Deal

Is assured you when you buy Dr. Pierce's family medicines—for all the ingredients entering into them are printed on the bottle-wrappers and their formulas are attested under oath as being complete and correct. You know just what you are paying for and that the ingredients are gathered from Nature's laboratory, being selected from the most valuable native medicinal roots and while potent to cure are perfectly harmless even to the most delicate women and children. Not a drop of alcohol enters into their composition. A much better agent is used both for extracting and preserving the medicinal principles used in them, viz., pure triolein refined glycerine. This agent possesses intrinsic medicinal properties of its own, being a most valuable antiseptic and antiferment, nutritive and soothing demulcent.

Glycerine plays an important part in Dr. Pierce's Golden Medical Discovery in the cure of indigestion, dyspepsia and weak stomach, attended by sour risings, heart-burn, foul breath, coated tongue, poor appetite, gnawing feeling in stomach, biliousness and kindred derangements of the stomach, liver and bowels. Besides curing all the above distressing ailments, the "Golden Medical Discovery" is a specific for all diseases of the mucous membranes, as catarrh, whether of the nasal passages or of the stomach, bowels or pelvic organs. It is a thorough remedy if its use be persevered in. In Chronic Catarrh of the Nasal Passages, it is well, while taking the "Golden Medical Discovery" for the necessary constitutional treatment, to cleanse the passages freely two or three times a day with Dr. Sage's Catarrh Remedy. This thorough course of treatment generally cures the worst cases.

In coughs and hoarseness caused by bronchial, throat and lung affections, except consumption in its advanced stages, the "Golden Medical Discovery" is a most efficient remedy, especially in those obstinate, hacking coughs caused by irritation and congestion of the bronchial mucous membranes. The "Discovery" is not so good for acute coughs arising from sudden colds, nor must it be expected to cure consumption in its advanced stages—no medicine will do that—but for all the obstinate chronic coughs, which, if neglected, or badly treated, lead up to consumption, it is the best medicine that can be taken.
