SPRAY Your Orchards NOW

For San Jose Scale and use

Sampson's Concentrated Lime and Sulphur Solution

Scale lives and works all the year round. Don't forget this. As the old scale dies, the new is ready to carry on the destruction of our orchards.

The scale is less vigorous in the fall, and more easily and surely destroyed than in any other season of the year. Therefore now is the best time to attack it and kill it. If you spray now, many a valuable tree will be saved that otherwise, because of the scale, would not retain life enough to start up in the spring.

YOU HAVE MORE TIME NOW—There is less wind to scatter and waste the spray, and make it hard to cover every part. Then, too, you cannot tell what may happen to prevent thorough spraying in the fall. BUT ABOVE ALL, the results of FALL SPRAYING are absolutely certain, provided, of course, that you SPRAY with SAMPSON'S LIME AND SULPHUR SOLUTION.

These are all "Spray Facts"

We claim no wonderful chemical discovery in this spray, but we do claim most emphatically that

Sampson's Lime and Sulphur Solution always produces satisfactory results, and does no injury. There is no better spray manufactured than Sampson's Lime and Sulphur Solution.

Sampson's Lime and Sulphur Solution is a clear, cherry-colored solution free from sediment. It is guaranteed to test 30 degrees Baume. If your dealers cannot supply you, write to us. BE SURE YOU USE SAMPSON'S SPRAY.
