OPEN SEASON FOR QUAIL ON FRIDAY

The open season for quail begins this Friday, the 15th, and hunters should get wise to the restrictions of the law with regard to this game bird. It should be noted that shooting from any public highway is forbidden, and it is not permissible to shoot within any enclosed property without the permission of the owner. The section on quail reads as follows: "It shall be unlawful within the counties of Jackson and Josephine to hunt, pursue, take, kill, injure, destroy or have in possession, except for scientific or breeding purposes, or to sell or offer for sale, barter or exchange, any quail at any time between the 15th day of December of each year and the 15th day of October of the following year, and it shall be unlawful in said counties during the open season and when it is lawful to hunt or kill the same, to kill, capture, destroy or have in possession any greater number than ten of the game birds enumerated in this section in any one day or more than 20 of said birds in any seven consecutive days. (L. 1909, p. 417.)" The limit in other counties is placed at five in one day and ten in one week.

DYSPEPSIA

Every sufferer should have a copy of my little book, "How I cured My Dyspepsia," a true account of a complete cure of a case of 20 years standing, which had finally culminated in a severe attack of diabetes. An entirely new system. No drugs. No special foods. I have nothing to sell you but the book; it explains all. Price \$1.00. There is no further expense. W. A. Grantham, Box 171, Lents, Ore. 10-8-3t

The Corless Concentrator.

Herbert A. Corless, one of Josephine county's best known mining men, has invented an improvement in a concentrating table which is said to be of great value in separating gold and other heavy metals from gangue matter. This is done on a table with two forward traveling motions and a sidewise motion, which separates the valuable material and likewise classifies the product in heavy, light, black sand and valueless matter. This concentrating table is the result of long experience in mining and, understanding the demands for the machine, it is at once simple in construction, efficient in operation, practical for all classes of concentrates. The machine is an improvement over all other concentrating tables and will, without doubt, soon come into general use.

You need not have Dyspepsia or indigestion, nor do you need to be troubled in any way with your stomach, if you will simply take Kodol at those times when you feel that you need it. Kodol is guaranteed to relieve you. If it fails your money will be refunded to you by the druggist from whom you purchased it. Kodol digests all the food you eat. It is pleasant to take. Sold by all druggists.

APPLES SELLING AT \$2.25 PER BOX

Effect of Winning Capital Prize at Spokane Apple Show on Wenatchee District.

"Wenatchee apples are selling at from \$2.25 to \$3 a box on the tree," states W. D. Finley, assistant manager of the national apple show at Spokane, who visited Wenatchee last week. "The high price is due largely to the fact that a Wenatchee orchard carried off the first prize at the Spokane apple show last year, and the consequent advertising has made a demand for fruit from the prize region.

"This is one of the reasons why the Rogue River valley district cannot afford to be unrepresented at the apple show this year. The Washington districts are filled with cash buyers this year, largely as a result of the displays they made last year."

Prospects favor several displays from this section. A. D. Helms has signed up for a car of Yellow Newtown Pippins for the sweepstakes prize and Tronson Guthrie a car of Spitzbergs for the same. F. H. Hopkins will send a car, provided the buyers consent. J. A. Perry may send one. Smaller displays will be made by C. E. Whisler, A. D. Helms and other growers.—Tribune.

Fruit Buyers Furnish Information.

Rogue River Valley fruit growers could get much valuable information as to the quality of the grading and packing, the condition of the fruit, time in transit and the price per box paid, by placing postal cards in a number of boxes of each shipment of their fruit.

The cards should have printed on the face the name and address of the grower and on the reverse side the questions with a blank for each answer. If questions were about as follows the orchardists would learn if his graders and packers had been doing good work and he would get some pertinent information as to the difference there was in the price he got and what the consumer paid for the fruit, and also valuable data
