

An Important Point

In the making of a child's, lady's or gentleman's face pleasant to look upon is having a good, straight set of teeth. They are often much neglected, therefore a word in regard to the care of the teeth will be in order.

Teeth should be well brushed (care being taken to brush the gums also, as this prevents their becoming soft and bleeding from the slightest provocation) from two to three times a day with a good brush and a good preparation.

There is nothing better than Parke Davis, Enthymol or Colgate's Ribbon Paste. We carry these in stock as well as the best, pure bristle brushes.

If you are depending on clear water to cleanse the mouth and teeth you will do well to give one of these pastes a trial and note the effect.
