

ZION CITY AGAIN IN ROW OVER ELECTION

ZION CITY, Ill., April 19.—Charges of fraud, repeating and corruption are made here today by the "Independents" of Zion City following yesterday's election, in which Hurd Clendennin, the Voliva candidate, was finally declared to have been elected mayor by a plurality of five votes.

The vote for city clerk on the first count showed five Independents had won by 34. On a second count the vote was a tie. On a third count ten votes had disappeared and the Voliva candidate won.

GRANTS PASS TAKES SCALP OF MEDFORD BALL PLAYERS

Court Hall's "hitless wonders" of Medford went to defeat Sunday when they met Manager Roper's Grants Pass nine here in the first game of the season. Medford lost by a score of 7 to 4 and great was the chagrin of the aggregation from the banks of Bear creek.

The game was a fast one, and some brilliant playing was done by members of the Grants Pass team. Fielding of the home team was exceptionally skillful, and when Short Stop Faubion made a double jump of thirty feet, caught a long drive and put a Medford runner out at third the home fans made the hills echo with some long howls of glee.

Catcher Baker made the Medford womers mad as wet hens, as by his ever watchful eye and expert work not one of Hall's men could play the stealing act on him and they usually died at second.

Pitcher Wilcox for Grants Pass had the Medford willow welders fanning the air until, it is said, each one developed much muscle. The Grants Pass ball played all around them and over them like forked lightning, and when they reached for it it was safe in Baker's mitt. Wilcox is one of the most skillful pitchers in the minor leagues of the coast. He's training came on the team at St. Mary's academy at Oakland, Cal., the premier college team of the coast.

Wickler, on second base, made some sensational stops and sent grim misery into the Medford camp. The visitors did earnest work, but it could not count against the fast and correct playing of Roper's youngsters. The game furnished great sport for the rooters and fans, and being the first one of the season was doubly entertaining.

Grants Pass will meet Medford again next Sunday at Medford and Court Hall declares he will humble the haughty Grants Pass stars and send them home with their colors trailing in Rogue River valley dust. Roper declares that the dust bath will be Medford's portion and that if no mean luck befalls them that Grants Pass will have an opportunity to march through Medford's streets singing "I told you so, I told you so."

Thus the fun is on and Rogue River valley will be the scene of lively baseball contests from now until the leaves begin to fall.

The lineup and game by innings follows: Medford.....0 2 2 0 0 0 0 0 Grants Pass.....0 0 0 0 1 3 3 Hits off Wilcox, 6; struck out by Wilcox, 5. Hits off Burgess, 1; struck out by Burgess, 6. Base on ball off Burgess, 1; off Wilcox, 1. Two-base hits: Baker 1; Autell 1. Home run by Wilkinson. Umpire F. Williams.

LARGE DEPOSITS GOLD ORE IN ORIOLE MINE

Lode mining in Southern Oregon, especially in Josephine county, has of late attracted wide attention in the mining world, through the uncovering of large deposits of gold ore in the Oriole property, in the Galice mining district.

Placer gold has been successfully mined in this region since the early 50's of the past century and the production has reached well into the millions by that method.

Systematic prospecting for the source of this placer gold, however, has but fairly started, and the showing thus far made has been uniformly satisfactory; so much so that several large companies have been organized and the eve of extensive lode mining is now at hand. Aside from the splendid showings made at the Alameda, Golden Wedge and other properties in the Galice district, the Oriole property deserves especial mention, due to the phenomenally rich character of some of the ore encountered, as well as the magnitude of the lower grade milling ores.

The great ore zone of the Oriole, as now proven, attains a width of 210 feet, the hanging wall being a sheer quartzite and the foot wall a metamorphic slate. The vein filling is composed of quartz stringers and nodules of quartz, interbedded in soft, slaty material. The gold values are intimately associated with the quartz and exist chiefly pyritic and other sulphide forms. The high-grade ore is perhaps valaverite, owing to its extreme mixture and almost absence of silver values.

There are practically two-thirds of a mile in development, consisting of tunnels, drifts and cross-cuts. The fourth tunnel is now being driven into the ore body, which will open the vein nearly 600 feet below the apex of the hill through which the vein passes. This tunnel will be 937 feet in length before intercepting the vein, and will definitely prove the dependable extent of the deposits, as well as the physical character of the ore and place the company in position to determine the kind and capacity of a plant to be installed for the commercial treatment of the ore.

The Oriole property consists of nine mining claims, covered with a virgin growth of fir and pine timber sufficient to meet all mining and building requirements for the next quarter of a century.

The company also holds valuable water rights sufficient to operate every kind of machinery and mill during the greater portion of the year. The present equipment consists of an air compressor, power drills, sawmill, assay laboratory, two blacksmith shops, electric lights, a commodious two-story boarding house, bunk house, and numerous minor essentials.

The greatest optimism is expressed by all who have seen the property and inspected the immensity of the ore body. Should values increase at the fourth level in proportion to what they have in the upper levels, the property is destined to become one of the great gold producers in the country. It would seem by the opening of this great property that the Galice district is now on the verge of a real and substantial mining boom, such as has not been experienced since the discovery and exploitation of the placer deposits in pioneer days.

Several shipments of the higher grade of ore have been made by the Oriole Gold Mining company to the Tacoma smelter, all of which have netted handsome returns; the last recent shipment of 20 1/2 tons netted the company \$3,724.13.

The people of Grants Pass should spare no effort to encourage the industry of mining. The development now going on in the Galice district, right at our doors, overshadows almost every industry tributary to Grants Pass. Investments made in the district are certain to pay handsome dividends to the investors and they will, to a large extent, add to the commercial industry of Grants Pass, while at the same time, it will take a home market for our agricultural products. The value of gold production in any section can hardly be overestimated. The mining of gold in California for the ten years following the discovery of 1849 enriched the world. The Alaska mines have added great prosperity to the United States and Canada. The millions of dollars in gold that have been mined in past years in Josephine county, added to the wealth of the country beyond its borders, but did not enrich the people of this section, for the reason that the miners added nothing to the development of the country outside of mining the gold.

That was placer mining. We have now reached the age of quartz mining, and this requires the building of mills and a development of methods for working the rock, and the employment of many men. There is an opportunity here to build up a Leadville or Cripple Creek, but it will need the help of the people of the capital town of Josephine county.

LIQUID CURES ECZEMA WHERE SALVES FAIL

In regard to skin diseases, medical authorities are now agreed on this: Don't imprison the disease germs in your skin by the use of greasy salves, and thus encourage them to multiply. A true cure of all eczematous diseases can be brought about only by using the healing agents in the form of a liquid.

WASH THE GERMS OUT. A simple wash: A compound of Oil of Wintergreen, Thymol, and other ingredients as combined in the D. D. D. Prescription. This penetrates to the disease germs and destroys them, then soothes and heals the skin as nothing else has ever done. A 25 cent trial bottle will start the cure, and give you instant relief. M. Clemens.
