ADVISES MINERS TO GO SOUTHERN OREGON

(From the Albany Evening Herald.) The Grants Pass Daily Courier of Tuesday of this week issued five thousand copies of a sixteen-page edition, eight pages of which were devoted almost exclusively to a resume of the gold mining industry of southern Oregon since the discovery of the precious metal in that section of the state.

The edition contains interesting stories of the mines of Josephine county, many of them well illustrated with half-tones. These articles are of great interest to both miner and investor, and the 5000 edition should have a great influence in the development of the mining industry of southern Oregon.

One of the contributors to the edition who has lived in that section of Oregon for many years and has been more or less interested in mining during his residence there, estimates that the output of gold for Josephine county alone, from the time the yellow metal was discovered in that section, has been not less than \$135,000,000.

This is a large sum, but in the light of common knowledge easily attainable anywhere in southern Oregon, these figures do not seem at all exaggerated. Of course, there is no way of telling just how much gold has been taken out for the reason that the section was prospected and sluiced many years before there was a bank in the Rogue River valley, or any of the other conveniences of modern commerce.

Then every miner was his own banker, his own secret service man and private detective, to use the Courier's expression.

In spite of the great quantities of gold that have been taken out in Josephine and Jackson counties, it is singular that most of it has been taken out in pockets and from the placer diggings, and that as a matter of fact, there has been very little practical or systematic mining in the district.

This has perhaps been due somewhat to the benevolence of nature in the matter of climatic conditions. A living was easily obtained and there has not been the same impetus for exploitation which has characterized some of the other mining districts of the country.

It is a singular fact that many of the gold discoveries made in Josephine county from time to time for many years past which have caused little or no excitement whatever, would have resulted in a stampede in Colorado, Nevada or Alaska.

Many of these discoveries have been prosecuted little beyond the cleaning out of the pocket, containing all the way from a thousand to five thousand dollars' worth of the precious metal, when the lucky prospector left to spend his pile and the excitement died out without further investigation.

There is little question but that southern Oregon, and particularly Josephine county, will eventually become one of the most active and important gold mining districts on the Pacific coast.

There is little doubt as to the fact that there are great quantities of the metal there; it is simply a matter of securing the necessary capital and the application of practical knowledge in mining. To be sure there are some few quartz mines in the vicinity which have been developed to a limited extent along practical lines.

But for the most part the gold-hunter of southern Oregon has confined himself to the placer diggings and pocket hunting.

The Courier is to be congratulated upon its enterprise in presenting the splendid mining number of last Tuesday, and the people of Grants Pass and Josephine county, as well as all southern Oregon for that matter, are greatly indebted to the Courier for this service.

It will doubtless do more to attract the practical miner and the necessary money for the development of the mining industry of that section than anything else which might have been done. It is in this way that the live newspaper does more for the development of a community than any other one single force.

EXPLODING TIRE CAUSES INJURY TO DRIVER CHICAGO, May 30.—Archie Grepper, severely injured today when the rear tire of his Amplex car exploded, is a professional automobile driver for the love of the sport. He became a professional when the rules were altered making it impossible for an amateur to compete with a professional. Although he was manager of the Falck team, he answered an eleven hour call to drive the Amplex in today's race.

Rolla Stephenson went to Roseburg Tuesday evening, where he expects to be employed for the summer.

ARE YOU WRETCHED IN BAD WEATHER?

Keeping the Kidneys Well Has Kept Many Grants Pass People Well

Many Grants Pass people find that bad weather brings on a dull pain in the back, or rheumatic aching, neuralgia, nervousness, irritability, and weakness. If, when you get wet or cold, it "settles on the kidneys," and there is a shivery, chilly sensation in the back, it shows kidney weakness, which is often the beginning of disease. Doan's Kidney Pills should be used persistently until the chilly feeling is gone, and the flow of urine is natural. Doan's Kidney Pills have saved Grants Pass people much suffering.

J. A. Niday, 303 I street, Grants Pass, Ore., says: "Last winter I was troubled greatly by disordered kidneys. The kidney secretions passed too frequently, especially at night, and during cold weather my back became lame. The contents of one box of Doan's Kidney Pills corrected the kidney weakness and removed the lameness in my back. This remedy is worthy of the strongest endorsement."

GREENVILLE, Mich., May 30.—In circuit court last week in case of Mrs. Myrtle Spencer against William Rae, Peter Hansen, Peter Johnson and A. L. Balles, Greenville saloonkeepers, and the Michigan Bonding and Surety company, a jury returned a verdict of \$2,550 for Mrs. Spencer. The plaintiff's husband, John Spencer, left his home in Inza county, dry territory, and went to Greenville on March 9, 1910. He fell from a train at Greenville and was badly injured. Mrs. Spencer sued for damages, alleging loss of support, and also alleging that her husband had become intoxicated from liquor sold to him by the saloonkeepers, this causing him to fall from the train—(Greenville, Mich.)
