

NEW RESIDENCES GO UP IN THE VALLEY

Mr. and Mrs. George Scott of Scott's Market, have under construction a new residence in the rear of their market. When completed they will make their home there. It is a four-room bungalow and will be modern in all respects.

NEW RESIDENCE ON OLD TAKILMA ROAD

Mr. and Mrs. Delbert Rexford have completed a new residence just across the bridge over the Easy branch of the Illinois river on the old Takilma road. The residence is a modern bungalow and Mr. and Mrs. Rexford are now domiciled in their new home.

ROD & GUN CLUB ACTIVE ORGANIZATION

By Wm. J. McLean

Here is a brief history of the Kerby Rod and Gun Club, Inc. The club was formed in January, 1935 and the membership that year reached a total of 116. In 1940 the membership reached a high of 286. James D. Hogue was president during 1940 and Sam Bunch is our new president for 1941, Nat Woolley is the new vice president, Fred Linkhart, treasurer; William J. McLean, secretary. Directors are Ken Robinson, Blake Miller, T. H. Baumberger, Ralph Huber and Clem Sauer.

The Club organized a drive to restock the lakes and streams in the Illinois River and over one-half million fingerlings have been placed in

Villair Logging Trucks On Way to Mill

Logging operation in the Illinois valley offer a man-sized problem in the woods. Spring and fall rains soften the ground making it difficult for logging trucks to operate during this season, but the Villair trucks seem to be able to operate and keep the mill busy in any kind of weather. The above picture shows some of the Villair Lumber company's trucks loaded on their way to the mill. The company is now working on orders for National Defense and expects to soon start cutting their annual supply of sugar pine.

our streams and lakes by the Oregon State Game Commission, assisted by the U. S. Forest Service, who transported the fish to our mountain lakes by means of pack trains.

A summary of the fish planted during 1940 is as follows:

Deer Creek—17,680 Rainbow fingerlings 2 in. to 3 1/2 in.; 32,760 Rainbow fingerlings, 1 1/2 in. to 3 1/2 in.

Sucker Creek—18,720 Rainbow fingerlings 2 in. to 3 1/2 in.

Cave Creek—28,080 Rainbow fingerlings 2 in. to 3 1/2 in.

West Fork Illinois—22,898 Steelhead fingerlings 1 1/2 in. to 3 in.;

27,887 Steelhead fingerlings 2 in. to 3 in.

Grayback Creek—18,244 Steelhead fingerlings 2 in. to 3 in.

Applegate River—42,570 Steelhead fingerlings 2 in. to 3 in.

Babyfoot Lake—2,500 Easternbrook fingerling 2 3/4 in.

Bolan Lake—5,000 Easternbrook fingerling 2 3/4 in.

Tannen Lake—2,500 Eastern brook fingerling 2 3/4 in.

About 2000 pheasants have been released in the Illinois Valley in the last five years, 145 birds being released during 1940.

The Club has been active in sponsoring a conservation program in the Illinois Valley and we believe a good foundation has been laid, perhaps the results are not apparent but it takes years to rebuild our wildlife resources once they are let run down. We need the active support of every one in the Illinois Valley, as our organized efforts are the sure way to make our program successful. Your membership and cooperation will be appreciated in making 1941 a successful year for wildlife conservation.

WM. J. McLEAN,
Secretary.
