THE VALLEY AIRPORT

It is past time—something should have been done long ago, about our Illinois Valley airport. Some people tell us the government knows all about it. If they do, they are permitting politics to dictate where airports are located, or politics is a tremendous factor in the selection of airports.

All the valley residents are asking this—that the army engineers make a complete survey of the airport and the vicinity—then after this is done, if they do not want it, we will be quiet about the matter, but until a very complete investigation is made, the people are going to keep on telling the world that we have "what it takes" and we want something done about it.

As an interceptor field, the Illinois Valley airport could be made one of the outstanding fields in the nation, it has every advantage, and the government owns the property, there is nothing to buy. Plenty of water, the best kind of climate, hid away from the ocean but close enough to be practically on the banks of the Pacific, no bad air currents, every facility for development waiting to begin—yet nothing is done, and the people are wondering why?

The people who are interested have refrained from exerting political pressure—if it isn't good enough for the army to come and look at it, let's let it stay the way it is.

THE FOURTH OF JULY CELEBRATION

Seldom has any small town or rural community presented a better celebration than that of last Saturday in Cave Junction, when, under the auspices of the American Legion, an old fashioned Fourth of July celebration was held. The weather was ideal, and the celebration voted by everyone a complete success.

The Illinois Valley Chamber of Commerce has asked that we make this event an annual one with the entire community rolling up its sleeves and making the celebration a civic enterprise. It's a great idea. Let's make the next one even better than the one just passed.

WHO SHALL DECIDE?

Right now Washington is being told by all kinds of experts that there are many ways to make synthetic rubber and to do it without delay. This suggestion leads to all kinds of disagreements that have reached the stage mentioned by Alexander Pope considerably over 200 years ago, when he asked the question: "Who shall decide when doctors disagree?"

The political doctors of the war administrators do not agree with the heads of 14 of the biggest oil companies, five of the greatest chemical corporations, and four of the biggest rubber manufacturers of the United States. They agreed with Secretary of Commerce Jones in April to produce all the synthetic rubber needed for civilian and military needs. But none of these concerns have been given the "go" sign by the government.

FORESTS ARE CLOSED

(Continued from Page One)
Ranger Station, Store Gulch and Cedar (Grayback) Guard Stations. Patrolmen will also issue the passes.

These closures no doubt will include somebody's favorite fishing place or camping spot, but the simple matter of forgetting that pleasure one year should be more than repaid in better fire protection and as a contribution toward winning the war by winning the forest fire battle.
