Mrs. Cecil Owen transacted business in Cave Junction this week. Mr. and Mrs. Owen and family

OSC AGRICULTURAL RESEARCH PROGRAM ADJUSTED TO WAR

The research program of the Oregon agricultural experiment station in all its branches throughout the state has been completely readjusted and geared to meet war needs, according to William A. Schoenfeld, director of the station, and Ralph S. Besse, assistant director, who recently conferred with both central and branch station personnel in four district conferences.

Every one of the 267 projects has been scrutinized to see whether its continuance will further the war effort. Those not so contributing have been dropped or discontinued temporarily unless by so doing past findings would be rendered useless. Other projects of immediate emergency use have been added and others expanded.

Among expanded projects are those dealing with dehydration and other forms of food processing, points out Assistant Director Besse. One example of such research is that being conducted at the cooperative seafood laboratory in Astoria, where at the request of the military authorities, a high-protein canned product suitable for emergency rations is being worked out making use of fish formerly little used for human food.

Another emergency war time project is the testing of rubber-bearing plants in this state. One result already is the finding that Klamath county irrigated soils have produced on a trial basis at the rate of 7000 pounds of Russian dandelion root per acre, averaging 2.5 per cent rubber. As this crop takes less than a year from seed time to harvest, it may prove a practical source of rubber during the war.

"The experiment station's role in aiding Oregon to meet its crop production goals is in providing farmers with constantly improved methods," explained Mr. Besse. "The present research program of the station plus the great backlog of results of research obtained through the past 20 years or more are major factors in making it possible for farmers to achieve successfully crop production goals that heretofore would have been considered impossible."

GOVERNOR EARL SNELL

(Continued from Page One)

be changed to meet the new requirements.

In speaking of old age, Governor Snell says "We could write pages of tribute to our senior citizens for the valuable contributions they have made toward the growth and development of this great state and nation." He recommends that a pension of \$40 be given and says, "... such assistance should not be on the basis of charity but rather on the basis of earned security... of right and decency."

In conclusion, the Governor said: "In all our deliberations let us, one and all, keep uppermost in mind our country's cause; the welfare of the boys in the armed forces; the value and importance of unity and undivided effort."

"The process of democracy and free institutions must survive — and with the aid of a Divine Providence — survive they will."

"In every turn of fortune, God has stood by the Republics. Philosophers may argue as they will, and rationalism may draw its conclusions, but the mysterious power unexplained by either, has, from the beginning of time, ruled the destinies of men."

formerly made their home in Takilma, but recently moved to the Gasquet Ranger Station, where Mr. Owen is employed.

THE BETTER TO FIND YOU, ADOLF

In the acceptance room of a Canadian aircraft instrument factory, a resident technical officer checks the equipment on behalf of the Royal Canadian Air Force, before it is shipped out to assembly plants in Canada and the United States.

Production of aircraft instruments is but a tiny part of Canada's rapidly expanding plane production program. With a population only one twelfth that of the United States, and a national income one-fiftieth the American income, Canada has nevertheless succeeded in creating a gigantic war industry which compares favorably with that of the larger weapon manufacturing countries in the world. In many instances, she has invaded production fields in which she was wholly inexperienced, instrument making for example. Today, the Dominion is contributing substantial quantities of planes, ships, tanks, guns, ammunition, explosives, and many other weapons to the cause of the United Nations, and has awarded \$5,000,000,000 worth of war contracts since the beginning of the war.

In Canada, the production of war weapons and the purchasing of equipment for the army, navy, and air force, as well as the building and buying of material on behalf of other Empire countries and United Nations, are handled by a single body, the Department of Munitions and Supply, which also exercises full control over the nation's industrial resources, allocates basic materials to war industries, and curtails the domestic consumption of critical materials, and of services such as power and transit. Thus, there are no duplications, no competition, no needless delays. Tanks for Russia, machine guns for China, gun barrels for the United States, anti-gas clothing for New Zealand, motor torpedo boats for the Netherlands government in exile, ammunition for England, planes for the British Commonwealth Air Training Plan, weapons for the Canadian Army, ships for the Canadian Navy, and equipment for the Dominion's Air Force, are contracted for and paid for by this production, purchasing, controlling agency.

WOMEN AT WAR—Overalls, wrenches and drills replace fineries as these war workers in an Army Arsenal march to tank repair shops. Note the determination on their faces. These women are typical of hundreds of thousands who are working in war factories and investing part of their earnings in War Bonds.

BLESSED EVENTS

BORN—To Mr. and Mrs. Carl J. Theurkauf, at the Josephine General Hospital, January 2, at 3:40 a. m., a baby daughter, weighing nine pounds six and one-half ounces. Mrs. Theurkauf was Georgia Allen, daughter of Mr. and Mrs. George Allen and Carl is the son of Mr. and Mrs. A. Theurkauf, formerly of Camp Muir, but now making their home in Crescent City.

BORN—To Mr. and Mrs. R. D. Schwenk of O'Brien, Saturday, January 9, at 1:55 a. m., at the Lathrop Maternity home in Grants Pass, a baby girl, weighing 9 pounds. The young Miss has been named Darleen Hope.

COLD WEATHER

Is tough on cars. More reason than ever that you should give it every attention.

Greasing is a very important matter right now, for the cold weather makes grease difficult to reach all affected parts. Come in now and have your car lubricated.

To the Public

At the earnest request of our customers, we are now stocking drugs in addition to our regular line of merchandise. We have a splendid line of articles most needed by the average family. Our stock includes:

Patent remedies, cold tablets, rubbing compounds, dental and shaving supplies, as well as toiletries of all kinds. Come in and look it over.

CAVE JUNCTION

Notice to Dog Owners Or Keepers

Sec. 32-2414, Oregon Compiled Laws Annotated, provides that every person owning or keeping any dog over the age of eight months within the state of Oregon shall, not later than March 1 of each year or within thirty days after he becomes owner or keeper of such dog, procure from the County Clerk of the county in which said person resides a license for such dog by paying to the County Clerk a license fee, determined by the county court of said county. . . . The fee in Josephine County is \$1.00 for a male or spayed female, and \$1.50 for a female. Such license fee shall be the only license or tax required. . . .

Sec. 32-2415, further provides that any owner or keeper of any dog who shall fail to procure a license, as provided in section 32-2414, shall be guilty of a misdemeanor and, upon conviction thereof, shall be subject to a fine of Ten Dollars for each offense, together with costs of proceedings.
