Mr. and Mrs. Lew Hammer

HOLLAND

Harry R. Floyd, General Merchandise
Mr. and Mrs. Harry R. Floyd

Hi Miller's Garage
Hi Miller, Proprietor—Easy Valley
Carner's Automotive Service Co.
Grants Pass, Oregon

Tracking Down America's Forest Fire-Bugs...

... with J. EDGAR HOOVER
the Nation's FBI Chief

Hardened criminals give us practically no trouble in American forests. They haven't much motive for burning trees.

Saboteurs? Yes, there's always danger from enemy acts of arson, but up to now we've been able to keep tab on foreign agents and prevent them from doing any damage to forest areas.

How about honest citizens? Now that's really a problem. It's hard to believe, but the average, law-abiding American citizen is our worst enemy when it comes to woods and brush and forest fires.

Naturally, he doesn't mean to be. No one ever does. Too many people simply get careless in the woods. A land-clearing fire that "got away", a campfire left to die out, a glowing match tossed away, a lighted cigarette butt—these are the real clues to timber destruction.

You don't believe it? Here are the facts: Each year about 31,000,000 acres of forest land are burned through plain carelessness; 31,000,000 acres that should be producing wood, that also be storing up electric power and...

And what about this year? Just this. With skeleton crews to police and protect our forests, and mighty few able-bodied men at home to fight woods and forest fires, there's real trouble ahead unless you—and that means you—are willing to help.

It is important that
YOU
remember these rules

1. **CRUSH OUT** your cigar, your cigarette, your pipe ashes.
2. **BREAK** your match in two, then pinch 'till it's dead.
3. **DROWN** your campfire; then stir and add more water before you leave.
4. **ASK ABOUT THE LAW**—and a permit—if you must burn; then follow safe rules and kill every spark.
5. **ALWAYS BE CAREFUL.** An extra minute of precaution may save vital watersheds and a hundred years of forest growth.

THIS IS AN EMERGENCY!

Something's got to be done **right now** about brush and woods and forest fires in America. We face enormous losses—in watersheds, timber, water power and manpower—unless you who **might** start such fires are extra careful. So please read these rules. Please memorize them. Remember that this year, with so many men away, there may be **GREATER DANGER THAN EVER** to America's woodlands and forests.

Prevent Forest Fires

GREATER DANGER THAN EVER!
