OREGON FARMS TO GET MORE RURAL ELECTRIC SERVICE

An early increase in electric service to Oregon farms not now reached by power lines is in prospect as soon after the war closes as materials are available, according to a report from the rural electrification administration just received by the OSC extension service.

This report shows that a seven million dollar postwar expansion program is already planned in Oregon, which will bring electricity to about 13,300 new consumers within three years after materials are released. Of the expenditures planned, five million dollars would be used to build distribution lines and two million dollars to finance related facilities. The Oregon expansion program, already approved is part of the total five-year rural electrification program, which includes private as well as cooperative agencies.

Mr. and Mrs. H. S. Grant from Los Angeles, have moved to the valley in their home where Mr. and Mrs. A. C. Barnes formerly lived. The Grants purchased this property some years ago, but are now living there. Mr. and Mrs. Barnes purchased 80 acres north of the cemetery where they recently built themselves a lovely five room house.

AMERICAN HEROES
By JULIAN OLLENDORFF

Forced to leave the tank he was driving when water in the fuel line caused it to stall, Pvt. Abe Fortner of Livermore, Ky., later returned, cleaned the fuel sediment bowl and got the machine in operation, while still under heavy fire. The tank, repeatedly hit, stalled and Fortner repeated his cleaning until it finally went up in a blaze. The private has a bronze medal for his feat but War Bonds must be sold to replace the tank.
