Take 5, 10, 15 Months to Pay  
**DR. HARRY SEMLER, Dentist**  
ALJAY BLDG., 3rd & MORRISON, PORTLAND, ORE.

**Building Battleships**  
Every time a 35,000-ton battleship is launched it takes the products from 42,000 acres of land to feed the workmen while they are building it. It takes 169 acres of tung trees to produce the oil to paint this battleship one coat. Every time this battleship fires one of its 16-inch guns, it requires one bale of American grown cotton.

**Strengthens Joint**  
Animal glue sticks to wood because in its thin, warm solution it penetrates the pores while still fluid. When it solidifies and dries, its tremendous shrinking power draws the fibers of one piece to the other, making the joint stronger than the wood itself and of equal durability.

**Women Drivers**  
More than 700,000 women drivers were involved in traffic accidents in 1944. It is estimated that the accident rates of men and women, based on mileage, would be equal if men drivers averaged four times as many miles as women drivers.

**Retina of Eye**  
The retina of the eye is not fastened to the inside of the eye, except at the edges of the cornea. The retina is held in place by the pressure of the jelly-like fluid in the interior of the eye.

**Phosphorescent Coatings**  
A more widespread use of phosphorescent coatings in the home, factories and offices supplemented by improved lamps and lighting techniques have been predicted.
