Metal Imports
Imports of lead in 1944 from the other Americas totaled 25.3 million dollars against 1.3 million dollars in 1938; imports of tin, mainly from Bolivia, were up to 24 million dollars from 500 thousand dollars in 1938; zinc imports were 13.7 million dollars against 400 thousand dollars in 1938, while tungsten imports from the other Americas jumped to 19.1 million dollars in 1944 from only 100 thousand dollars in 1938.

Traffic Fatalities
In the 15-year period beginning with 1927, traffic fatalities hit an all-time high in 1941 with 39,969 deaths. With the reduced traffic of war years, 1942 saw a drop in this tragic toll to 28,200 and a still further reduction in 1943 to 23,820. In 1944, condition of cars and tires began to tell and the highway death list rose to 24,300.

Hard of Hearing
Conservative estimates show more than 10 millions with some difficulty in hearing in one or both ears; 5 millions have disabling handicaps, often accompanied by a psychological frustration, and more than 1 million school children urgently need special acoustical attention.

Fire Losses
About 1,000 homes in the U. S. are attacked by fire every day and a farm fire occurs every 15 minutes. The death toll in the past 10 years is about 35,000 and thousands more are critically burned and seriously maimed. The dollar loss for the same period is about one billion.

Strawberry Soil
Best soil for strawberries is a sandy loam which retains moisture. Soils which are very heavy or extremely light should be avoided. If irrigation can be provided, the production period will be lengthened and yields increased substantially.

U. S. An Associate
The United States was not one of the Allies in the First World War. Since there was no common agreement on the objects to be attained by the war, the United States was an "associate" rather than an "ally."

Children's Shoes
Buying shoes for your child is a responsibility. See that the shoes are properly fitted; they should be an inch longer than the child's foot, heels and counters should fit snugly, and the arches should give support.

Children's Hours
Extension Service specialists have determined that early to bed should really be the children's motto, for it has been proved that the best hours of rest for a child are the first hours of the night.

Discourages Vermin
Painting the interiors of poultry houses and sheds and barns housing livestock is a sanitary measure in that it helps to discourage vermin and insects. White or light tints are best for this purpose.

Destroys Vitamins
Heat speeds the destruction of vitamins, according to home economists who advise cooking at low temperatures and for as short a time as possible.

Sugar Supplement
Dried fruits such as prunes and raisins have a natural sweetness that will help extend the sugar content of your meals—and they're good for the family diet.

Aids Elimination
A varied diet including plenty of colored vegetables and fruit, sufficient water and regular toilet habits should result in satisfactory elimination.

Safety Measures
Firescreens should fit snugly at top as well as sides. See that your chimneys are clean and in good repair.

Honey Production
Honey production varies from year to year due to different weather, plant growth and other conditions.
