First to Celebrate New Year's Day

Chatham islands, New Zealand, is the first place in the world to celebrate New Year. A British colony, the islands are inhabited by 200 persons, largely shepherds.

The islands are at the nearest starting line of time, and when New Year arrives its is only 12 noon in London and 7 a. m. in New York.

As it dawns on the islands, the New Year begins its race westward along the equator at a speed of 1,000 miles an hour. By the time New Yorkers gather to ring in the new year, the Islanders are sitting down to dinner.

DAWN OF NEW YEAR . . . May it be a happy one for everyone everywhere.

Greetings to one and all. May the New Year hold the fulfillment of all your dreams.

● At the magic stroke of 12, the New Year will make its advent, marking the turning of another page in the book of our lives. Lo, there is before us a clean white page, a slab of snow-white marble, whereon must be recorded the events of the coming year. What shall be written thereon?

● A saga of peace and contentment, of happiness and joy, of health and happiness. That is our wish for you on the threshold of 1948.
