AUTOMATIC WATER SYSTEMS

Shown above is the popular Model VS-50 Shallow Well Stay Prime Water System.

EASILY INSTALLED—because two suction openings are provided in different positions. Either may be used to suit the installation.

SIMPLE IN DESIGN—because there are no complicated parts. Model VS-50 is a centrifugal pump with built-in removable jet. The impeller is the only moving part.

CHEAP TO OPERATE—because the impeller is smoothly machined and carefully balanced for highest efficiency. Silence and freedom from vibration mean a long and trouble-free life. AND IT STAYS PRIMED. A wide variety of centrifugal pumps are now available for farm, home and industry. Ask for information and literature.
