AUTOMATIC WATER SYSTEMS

Shown above is the popular Model VS-50 Shallow Well Stay Prime Water System.

EASILY INSTALLED — because two suction openings are provided in different positions. Either may be used to suit the installation.

SIMPLE IN DESIGN — because there are no complicated parts. Model VS-50 is a centrifugal pump with built-in removable jet. The impeller is the only moving part.

CHEAP TO OPERATE — because the impeller is smoothly machined and carefully balanced for highest efficiency. Silence and freedom from vibration mean a long and trouble-free life. AND IT STAYS PRIMED. A wide variety of centrifugal pumps are now available for farm, home and industry. Ask for information and literature.
