

According to Washington reports an average of 500 new workers per day have been added to the federal payroll since the first of the year. No doubt these workers are qualified to vote. No doubt, too, their boss, a man named Harry Truman, hopes they will vote for, and induce their friends and relative to vote for, — guess who? Well, this system worked quite well in 1936, 1940, and 1944. The only catch is, this is 1948. —Davis (Calif.) Enterprise.

Combs from Shoes

In the 1880s, old shoes were gathered in the United States, cut into small pieces and for several days soaked in chloro-sulphuric liquid. When dried, pieces of leather were hard. After washing in water and drying again, the leather strips were ground into powder and mixed with glue. This material was used in making combs, buttons and knife handles.
