Irrigation, Fertilizer Equal Bigger Crops

Fertilizer pays under irrigation in the Panhandle, according to F. B. Hunt of Hale county, Texas. With 200 pounds of ammonium nitrate an acre applied in the fall before sowing-over land that had been summer-fallowed, he increased his wheat yield from 45 to 55 bushels; on land in continuous wheat, 200 pounds of ammonium nitrate per acre raised the yield from 15 to 30 bushels.
