More of Governor Cox' Speech of Acceptance

The Mexican situation, trying to our patience for years, begins to show signs of improvement. Not the least of the things that have contributed to it, is a realization by the people of that country, that we have neither the lust for their domain, nor disposition to disturb their sovereign rights. Disabled Soldiers.

"I feel deeply that the rehabilitation of the disabled soldiers of the recent war is one of the most vital issues before the people and I, as a candidate, pledge myself and my party to those young Americans to do all in my power to secure for them without unnecessary delay, the immediate training which is so necessary to fit them to compete in their struggle to overcome that physical handicap incurred while in the service of their government. I believe also that the Federal Board of Vocational Rehabilitation as far as possible should employ disabled soldiers themselves to supervise the rehabilitation of disabled soldiers, because of their known sympathy and understanding. The board itself and all agencies under it should be burdened with the care of securing for the disabled soldier who has finished his training, adequate employment.

"The women of America, in emotion and constructive service, measured up during the war to every requirement, and emergency exacted much of them.
