TOTS FIGHT HUGE OCTOPUS

Seizes Boy Whose Sisters Belabor It With Oars and Rescue Youth After Fierce Battle.

Eureka, Cal.—Word reached here that a 16-foot octopus was killed at Samoa, Humboldt county, after it had seized in its tentacles eight-year-old George Peterson, son of a tug captain.

According to the reports the boy was standing in shallow water at the beach when the octopus attacked him.

Two older sisters were paddling about in a boat.

His screams alarmed the girls and they beat the sea monster with their oars.

The octopus lashed out with other tentacles and wrenched an oar from the hands of the younger sister. The other girl, using her oar bayonet fashion, partly stunned the animal, which loosened its hold on the boy and crawled to nearby rocks, where it was beaten to death.

NEGRO IS BAD ACTOR

Question of Whether Eggs Should Be Fried on One or Both Sides Causes Lively Doings on the Steamship Carolyn.

Carteret, N. J.—The profound question of whether fried eggs should be cooked on one or both sides started B. Leonard, a Jamaica negro mess boy of the steamship Carolyn, which docked here recently, on a series of adventures which included shooting up the ship, escaping from his irons in the brig, jumping overboard, swimming ashore and making good his escape.

His adventures are probably not ended, for the police are looking for him. The last seen of B. Leonard was when he drove away on an automobile ruck from Prince's Bay, Staten Island, where he came ashore.

Trouble With Cook.

"The trouble really started soon after the Carolyn left Boca Grande, Florida, on her way north," explained Third Officer William G. Kelly, who was in charge of the steamship at the lock in Carteret. "Leonard was the fier's mess boy, and he didn't get along well with the cook, V. Donmaro (Thursday morning he went into the galley and ordered eggs 'turned over' fried on one side.

"Leonard got mad and there was an argument, which caused the cook to ladle out some hot water and throw it at him. Then Leonard rushed down to officers' quarters and came back with an automatic pistol. The cook ran, with Leonard at his heels, shooting. His first shot missed, the second went through the left hand of M. Charlton, the steward of the ship. The third went through my cabin.

"Capt. Alonzo Nash heard the shooting and hurried down with Chief Officer J. E. Evans. Leonard saw them and became quiet immediately. He handed over the automatic and then he was put in irons and sent below.

"Yesterday morning, when one of the men went to his breakfast, he found Leonard was missing. Some one had

cut the irons and he had slipped them off, leaving them on the floor of the brig. Then he jumped overboard in the dark.

After a swim of more than a mile Leonard came ashore at Prince's Bay, and later went to a garage owned by John Hoag, where he asked if he could rent an automobile to take him to New York. When told there were no cars for rent, he displayed a roll of \$20 to show he was able to pay. That failed to get him a car and so he waited until an oil truck driven by a chauffeur for A. It costs from 15 to 20 cents an inch to set an advertisement in type and correct the proof and place it in the type page for printing, if current prices are paid for the work. The newspaper that gets less does not receive fair wages for that work and throws in the white paper, press work, folding, mailing, postage, etc., for the subscription price will not cover these items.

One man can conduct a small country weekly, doing practically all the work himself, and keep out of jail, while charging less than 20 cents, but he will not make fair wages and he will not print much news.

We believe the people of this community, when they realize the situation, will support a first-class weekly newspaper. We are staking our investment on that belief and endeavoring to give them such service, and we have enough faith in the people to expect a response in incoming subscriptions and advertisements that will enable us to make the Enterprise more of a success than it ever has been.
