POLITICAL ADVERTISEMENTS

REPUBLICANS!

Shall Oregon continue to hold the pre-eminence that is now hers? Shall she forge ahead as a leader in the republican party?

Answer "Yes!"--Vote X13 for **RALPH E. WILLIAMS** for Republican National Committeeman

In the presidential election of 1916, when there was dissension and division everywhere, Oregon was the only state west of the Missouri river to go republican. Harmony!

Progressives and republicans united in giving credit for this remarkable achievement to Ralph E. Williams, national committeeman since 1908.

In recognition of this and other services Ralph Williams was elected vice-chairman, the second highest honor within the power of the republican national committee to bestow. It is a position of influence to be reached only by years of faithful and intelligent service.

Keep Oregon to the front—Don't let her slump
Vote for **RALPH E. WILLIAMS** for Republican National Committeeman

Keep Oregon a leader. Vote X13 for Ralph E. Williams.

Paid advertisement by W. B. Ayer.

Ralph Williams is the first committeeman representative from any western state to be elected to the vice-chairmanship.

Ralph Williams is a veteran of the national organization. He stands at the head with the leaders. A new man would, of custom and necessity, stand at the foot with the followers.

Republican leaders, in congress and out, are Ralph Williams' friends. This friendship means much to Oregon and the northwest. Without ostentation Ralph Williams enlists the aid of these leaders for the things the northwest needs from the national government.

START EGGPLANT IN WARM, SUNNY PLACE

Rich Soil and Good Cultivation Is Necessary.

Occasional Applications of Very Weak Liquid Manure Is Beneficial—Little Flea Beetle Is Most Troublesome.

Eggplant, so called because the great fruits are about the size and shape of an ostrich egg, is closely related to the tomato and pepper and requires very much the same treatment as do peppers, say garden specialists of the United States Department of Agriculture. The eggplant is very easily injured by cold and the plants must be started indoors throughout the greater part of the country. Start the seed in the house by sowing in a small box filled with

good soil. The small plants should

be transplanted to pots or to a shaded

low box or tray filled with soil and kept in a warm, sunny place until the weather is quite warm. Eggplant requires a rich soil and good cultivation. Occasional applications of very weak liquid manure also benefit the plants greatly.

Eggplant is attacked by several kinds of insects, the most troublesome of these being the little flea beetle which works upon the leaves, filling them full of small round holes. As a remedy, dust the plants thoroughly with air-slaked lime or very fine tobacco dust. By removing the fruits of the eggplant as soon as they attain good size the plants can be kept fruiting until killed by frost. Black beauty and improved large purple are among the leading varieties.

Snowbirds.

Several species of birds that are associated with snow are given this name, as the junco and snow bunting. These birds rear their young in summer in nests much the same as other birds.
