The company's business has increased so rapidly that improvements have been made from time to time until today they have a model industry. Everything in the plant is kept scrupulously clean, as it is the policy of the institution not only to make bakery goods that will pass inspection, but to turn out products that are as near an approach to the acme of perfection as modern machinery and up-to-date methods will permit.

The proprietor has been closely allied with the large business interests of this section of the state for some time and has been instrumental in the rebuilding of this section and the business which he is conducting should receive the patronage of the entire people.

## FIRST SAVINGS BANK

**In Albany, Is One of the Best-Known Financial Institutions in This Section, and Has Aided in No Small Measure the Progress of This and Surrounding Territory.**

Not because of false promises or by flashy methods but because of sound banking principles has this bank succeeded. Realizing at the very start that an institution that was wisely guided and built upon the foundation of solid business principles would surely succeed, this well-known institution began its career. Since that time it has not only aided the people of this section to make this a better place to live by encouraging the building and owning of homes but by the actual financial assistance afforded. As an added encouragement to the wage earner as well as producer to start a savings account they have offered interest on deposits. These facts, coupled with the personnel which makes up the bank's officers and directors have caused the business of the bank to steadily increase.

The arrangement of the bank's home is such that the business of the ever-increasing list of patrons may be carried on with despatch and comfort. It is a favorite meeting place of the people of this section and the officers of the bank are very glad to greet the citizens whether they are depositors or not.

## HOF LICH'S ELECTRIC SHOP

**Located in Albany, Is the Distributor for the Famous Delco-Light Products, Which They Are Giving a Wide Distribution and Which Is Proving Satisfactory to All Purchasers.**

It would be decidedly unjust if we failed in this review to give prominent mention to a factor that has done so much in advancing and modernizing the rural districts namely the Delco-Light.

There will be a complete display of Delco-Light Products at the Fair; don't pass up the opportunity of seeing this.

There is probably no other invention that has been perfected in recent years or at any other time in fact, that has meant so much to the progressive and modern farmer of today as has this wonderful invention. To install a Delco-Light plan is the desire and aim of every modern and up-to-date farmer, for he knows that not only it is a time and labor saver but that it is clean, safe and sure, and that in the future no farm will be considered modern without such a plant to get their light and power from.

Like other great inventions, such as the steamboat and railway engine, when the Delco-Light was first introduced to the public the majority of people were skeptical about its practicability, but since it has been put into operation in more than 160,000 homes they have been forced to realize that it is a practical and a money-making investment.

Not only does this plan make possible plenty of bright, clean, light, but it pumps the water, grinds the feed, turns the cream separator, but to enumerate here all the many tasks that

it does to make the chores lighter would consume endless time and space. Its usefulness does not stop on the outside nor in helping the men, it makes possible all the little conveniences that takes the drudgery out of the housework and the housewife in the country can have all the conveniences of this electrical age.

Many people have the idea that a Delco-Light plant is a complicated and intricate piece of machinery and that it requires a great deal of care to keep in operation. In this respect they are mistaken, although it embodies several great scientific features it is sturdily built and requires practically no care and expense and is self operating.

There are so many good and beneficial features to the Delco-Light that it is an impossibility to enumerate them all and our suggestion is that you call on your local dealer and get a practical demonstration. It makes no difference whether you are expecting to purchase now or not for you will receive the same courteous treatment that you would if you were going to buy at the present time.

Therefore, we take pleasure in this review in directing you to this firm, the manager of which is a latter day business man and one who has taken an active part in all things pertaining to the upbuilding of this community. We predict that, through his activities, the time is not far distant when there will be a Delco-Light plant in all the country homes in this territory.

The food is prepared in such a way that to the uninitiated the thought at

once comes that there never was such a good place to eat. Poor restaurants are not the exception by any means and it is a pleasure to have such a modern and up-to-date place as this to refer the stranger as well as local people to.
