Only four states had a lower death rate than Oregon for the first quarter of the present year, according to figures just tabulated by the bureau of the census. The Oregon rate was 12.1 per 1000 population. In Idaho the rate was 7.9, in Montana 9.4, in Washington 10.4 and in Wyoming 10.8. Oregon was backward in its birth rate in the same period, however, with 17.3 to 1000. Only two states lower, Vermont with 15.8, and Montana, 17.5.

An agreement has been reached whereby the state highway commission will relocate a part of The Dalles-California highway around the site of the proposed Benham Falls reservoir, in which water will be stored for the North Unit irrigation district in Deschutes county. The fact that many Oregon youths must become breadwinners immediately after leaving high school, without going on to college, is the consideration that has resulted in many graduates from standard high schools not being prepared for entrance examinations to colleges and universities. This condition has caused some criticism to be leveled at the high schools, and the situation is explained in a letter that J. A. Churchill, state superintendent, has written to all high school principals in the state. Churchill says, however, that principals should have a knowledge of the college and university entrance requirements so the high school courses of the pupils may be shaped accordingly, if desired.

The state income tax law enacted at the last session of the legislature, and not the referendum of the measure, is to be voted on at the special election November 5, according to a legal opinion prepared by I. H. Van Winkle, attorney-general. In other words, a vote of "yes" means a vote for the income tax law, while a vote of "no" means a vote against the law. "I would say," said the attorney-general's opinion, "that the supreme court in its recent decision upon the referendum of such measure, held that it is the bill which is to be voted upon and not the petition of referendum of the same. Also, the constitution and statutes provide for voting upon the measure and not upon the petition initiating or referring the same. Hence an affirmative vote is a vote for the measure, and a negative vote is against it without reference to the petitions referring the same." Many voters have been of the opinion that a vote of "yes" would sustain the referendum, while the fact is the reverse.

Organization of the wheat growers of the United States into a great cooperative marketing association through which they may control the flow of wheat to market in an orderly manner and eliminate the danger of having large quantities thrown on the market at one time, causing reduction in prices, is the only solution for the present dilemma of the growers, according to a statement made by Eugene Meyer, director of the war finance corporation to a large group of wheat growers, bankers and grain dealers of Oregon at a conference held in Portland. Out of the meeting grew the creation of a committee of five bankers, which is to be named by the president of the Oregon Bankers' association. The group is to form a medium for co-operation between the bankers, business men and farm organizations in the perfection of the cooperative marketing system for the handling of the wheat crop.
