### The Clear Lake Caravan

(Albany Herald)

There is going to waste within a comparatively few miles of us power that can turn the wheels of countless mills, of mills that can give us a large population, of mills that will boost the values of all county property, city or rural. We as a people are indictable on the charge of slothfulness if we refuse to be stirred by this prospect; if we fail to look into it, if we refuse to do our utmost to take advantage of it.

The big caravan which will set out for Clear Lake the last of this month and the fore part of next has been designed to hasten the day when Linn county will be taking advantage of these potential resources.

It will be an expedition of modern Argonauts, who unlike their ancient predecessors will not pursue a fabled chimera, but will be exploring sources of wealth which are known to exist.

That caravan from Albany to Clear Lake will go July 31 and August 1 and 2. A thousand people are expected to go, among them Governor Pierce and members of various state boards and commissions. The participants will carry their own camping equipment. Waldo Anderson's stupendous water, light and power project will receive the principal attention, but the Santiam pass road and a proposed fish hatchery will also be considered.

### Listen, Albany Pickle Growers

Can you imagine that a little insect pest called the cucumber beetle could cause a loss of \$3,000,000 to \$5,000,000 annually to the cucumber crop of the United States. This insect not only injures the plant by feeding, but carries bacterial diseases which are injurious to many other plants.

Do you want this loss to go on in the future? Your answer would be "No." You can become best acquainted with its control by reading bulletin 355—"Nicotine Dust Kills the Cucumber Beetle," by J. E. Dudley of the Agricultural Experiment Station, Madison, Wis.

This bulletin explains how nicotine dusts are made and used in the most efficient and profitable way. It will also tell you how much of the dust to apply to the acre, and the manner in co-operating with your neighbors in using it. Now is the time to send for this free bulletin and learn to kill the most dangerous enemy of the cucumber, the striped cucumber beetle.

### TH' OLE GROUCH
