Ward, who had escaped from the county jail once before, walked out and locked Sheriff Richard in, giving the latter a dose of his own medicine. Richard had to call help to get out. Ward disappeared. Those who lived on second street last year, with all its dust, and this year, with the pavement holding everything down, are the only ones who can realize the difference. W. M. A dispatch from Owatonna, Minn., says: The Steele County Agricultural society will discontinue entirely the use of billboards and window card advertising to advertise the Steele county fair this year according to an announcement just made by the directors. Instead of these mediums they will confine their advertising entirely to the newspapers, and will use printer's ink in greater quantity than ever. Albany Bakery Destroyed Last Sunday a fire which started in a room over the Albany bakery, destroyed the building, which belonged to E. Fichau, and the adjoining one, constituting the frontage of the half block on Lyon street. The bakery, "the home of the good old 5-cent loaf," had been turning out more products than any other in the county. It was completely destroyed. Mr. Fichau figures his loss at \$43,419, about half covered by insurance. He announces that the loss has not lessened his courage, but increased it instead, and that the bakery, which contained the latest improvement in apparatus for producing high quality goods at the lowest cost, will be rebuilt, either at the old location or at some other place, as contained the latest improvement in apparatus for producing quality goods at the lowest cost, will be rebuilt, either at the old location, as quickly as possible after the insurance is adjusted. Since the fire he has been deluged with telegrams from users of his products in all directions asking when he would resume. The room where the blaze started had been occupied the night before by a transient lodger and a cigaret or a match is the suspected cause. Another heavy tribute paid to tobacco. In the other building the Hub Cleaning works were located. Mr. Minton was able to save most of the movables. Mr. Minton saved most of the apparatus of the Hub Cleaning works, and has taken a five-year lease of premises at Second and Ferry streets, where he is going ahead as if there had been no fire.

Democratic Platform

(Continued from page 3) Its declaration of confidence in the ideal of world peace, the League of Nations and the world court of justice as together constituting the supreme effort of the statesmanship and religious conviction of our time to organize the world for peace. Further, the Democratic party declared that it will be the purpose of the next administration to do all in its power to secure for our country that moral leadership in the family of nations which, in the providence of God, has been so clearly marked out for it. There is no substitute for the League of Nations as an agency working for peace; therefore we believe that, in the interest of permanent peace, and in the lifting of the great burdens of war from the backs of the people, and in order to establish a permanent foreign policy on these supreme questions, not subject to change with changing of party administration, it is desirable, wise and necessary to lift this question out of the party politics and to that end to take the sense of the American people at a referendum election, advisory to the government, to be held officially under act of congress, free from all other considerations, and to be held ample time for full consideration and discussion throughout the country, upon the question, in substance, as follows: "Shall the United States become a member of the League of Nations upon such reservations and amendments to the covenant of the league as the President and the senate of the United States may agree upon?" Immediately upon an affirmative vote we will carry out such mandate.

DEEP WATERWAYS

We favor and will promote deep waterways from the Great Lakes to the Gulf and to the Atlantic ocean. We favor a policy for the fostering and building of inland waterways and the removal of discrimination against water transportation. Flood control and the lowering of flood levels is essential to the safety of life and property, the productivity of our lands, the navigability of our streams and the reclaiming of our wet and overflowed lands and the creation of hydroelectric power. We favor the expeditious construction of flood relief works on the Mississippi and Colorado rivers and also such reclamation and irrigation projects upon the Colorado river as may be found to be feasible and practical. We favor liberal appropriations for prompt co-ordinated surveys by the United States to determine the possibilities of general navigation improvements and water power development on navigable streams and their tributaries, to secure reliable information as to the most economical navigation improvement, in combination with the most efficient and complete development of water power. We favor suspension of the granting of federal water power licenses by the federal water power commission until congress has received reports from the water power commission with regard to applications for such licenses.

POLICY ON EDUCATION

We believe with Thomas Jefferson and founders of the republic that ignorance is the enemy of freedom and that each state, being responsible for the intellectual and moral qualifications of its citizens and for the expenditure of the moneys collected by taxation for the support of its schools, shall use its sovereign right in all matters pertaining to education. The federal government should offer to the states such counsel, advice and aid as may be made available through the federal agencies for the general improvement of our schools in view of our national needs.

RECLAMATION

The Democratic party was foremost in urging immediate reclamation for the arid and semi-arid lands of the West. The lands are located in the public-land states, and, therefore, it is the duty of the government to utilize their resources by reclamation. Homestead entry men under reclamation projects have suffered from the extravagant inefficiencies and mistakes of the federal government. The reclamation act of 1924, recommended by the fact-finding commission, and added as an amendment to the second deficiency appropriation bill at the last session of the congress, was elim-

Fraud in Stocks

We favor the immediate passage of such legislation as may be necessary to enable the states efficiently to enforce their laws relating to the gradual financial stranding of innocent investors, workers and consumers, caused by the indiscriminate promotion, refinancing and reorganizing of corporations on an inflated and over-capitalized basis, resulting already in the undermining and collapse of many railroads, public service and industrial corporations, manifesting itself in unemployment, irreparable loss and waste, and which constitute a serious menace to the stability of our economic system.

LABOR, CHILD WELFARE

Labor is not a commodity. It is human. We favor collective bargaining and laws regulating hours of labor and conditions under which labor is performed. We favor the enactment of legislation providing that the products of convict labor shipped from one state to another shall be subject to the laws of the latter state exactly as though they had been produced therein. In order to mitigate unemployment attending business depression, we urge the enactment of legislation authorizing the construction and repair of public works be initiated in periods of acute unemployment. Without the votes of Democratic members of the congress the child labor amendment would not have been submitted for ratification.

LATIN AMERICA

From the day of their birth friendly relations have existed between the Latin-American republics and the United States. The friendship grows stronger as our relations become more intimate. The Democratic party sends to these republics its cordial greeting; God bless made us neighbors—justice shall keep us friends.

THE KLAN PLANK

Freedom of Religion. Freedom of Speech. Freedom of Press. The Democratic party affirms its adherence and devotion to those cardinal principles contained in the Constitution and the precepts upon which our government is founded, that congress shall make no laws respecting the establishment of religion, or prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances, that the church and state shall be and remain separate, and that no religious test shall ever be required as a qualification to any office of public trust under the United States. These principles we pledge ourselves ever to defend and maintain. We insist at all times upon obedience to the orderly processes of the law and deplore and condemn any effort to arouse religious or racial dissension. Affirming our faith in these principles we submit our cause to the people.

Paid-for Paragraphs

(5c a line) Chicken dinner Sunday. Good Eats Restaurant. Old papers for sale at 5c a bundle at the Enterprise office. Francis W. Nugen Mr. Nugen was born at Spokane, June 25. His father died when he was 6. His mother slipped away and he was an orphan. He met the world with a strong will and a magnificent physique. As a student at Columbia Junior college, Milton, he married Miss Ruth Williams, June 15, 1922. Fourteen months ago a son was born to them. Last year Mr. Nugen served the Sweetwater and Lapwai charges, in Idaho, as pastor, ably seconded by his wife. For the past seven months he has been in charge at Alford, Lake Creek, Pine Grove and Peoria, and his pastoral visits from home to home on foot marked him as practical. Largely with his own hands he painted, kalsomined, etc., the parsonage and the church walls, ceilings and floor. He had planned the complete renovation of the surroundings. He planned to attend college next year, paying his way by labor in harvest fields and logging camps. June 25 last, just two years from the day of his marriage, came his death by drowning, as narrated in last week's Enterprise. The funeral, at the Peoria church, was largely attended and the floral tributes were elaborate. A practical testimonial of sympathy was a liberal spontaneous gift of money presented to the widow, who will inter the remains of the deceased near her home at Gifford, Idaho. The funeral services were conducted by Rev. J. C. Jones, an old and devoted friend, assisted by Rev. Messrs. E. J. Harper and H. R. Tate of his district. The pallbearers were Rev. Messrs. Tate, Laird, Harper and Gillipie and J. W. La Mar and Albert Bayne. Miss Gretta Harrison went to Eugene yesterday.

Electric Trolley Ferry

One of the most unusual applications of electric power to the work of the world is the electric ferry on the Willamette river at Independence. It operates from an overhead trolley, 1200 feet in length, spanning the river, and displaced an old gasoline engine drive. The installation consists of a two-horse power motor, direct-connected to the gear parts of a Fordson tractor, which operates side wheels by means of a chain drive. With the old-style drive the ferry took 20 minutes for the round trip and the operating cost was \$150 a month. Under electric operation the round-trip time has been reduced to two minutes and the operating cost to \$20 a month. Current is furnished by the Mountain States Power company.—The Open Window.
