RISEING HOPES

In recent years it has been known that tuberculosis, if wisely treated before it is too well established, can be cured. With modern treatment and increasing knowledge of the disease, the methods of cure become successfully applicable at later stages, and it is confidently hoped that before long an absolute exterminator of the bacilli will be developed.

When Everett Standish of Halsey went to a sanitarium it was found to be too late, with the knowledge available, to save his life, but it was prolonged for four years, which would have been impossible a few years ago.

Mrs. Standish, when she visited him, was wont to share the flowers and fruit she carried with other patients. One of these was a young man named Fox, who was acquainted with Everett at the Portland hospital was transferred with him to Salem. Mr. Fox's case proved curable and he has been discharged, has married a girl who had also been cured there, and the pair are traveling in his automobile. Mr. and Mrs. Standish were pleasantly surprised, a few evenings ago, when Mr. and Mrs. Fox called on them and spent the night.

Cancer is another hitherto incurable disease which of late has come more and more under control, and it is even claimed that advanced cases can be cured by treatment with the X-ray. W. F. Carey, late of Halsey but now of Eugene, had an affection which was diagnosed as cancer which has disappeared after this treatment.

But Halsey has another and more convincing exhibit to prove the efficacy of the new treatment. Arthur Wesley went under the surgeon's knife twice in an attempt to exterminate a cancer and when he applied for another operation was told that his case was hopeless. After being given up to die he took treatment under the wonderful ray and the cancer has disappeared and he has now been a restored man, in good health, for about a year.

There is a hope ahead for the race.

John J. McNamara, who served nine years for dynamiting the office of the Los Angeles Times, which crime he confessed, has been indicted in Marion county, Ind., where he stands high in the labor union, for threatening to dynamite the property of employers if they do not employ union labor. That leopard hasn't changed his spots, it seems.

Milton Miller's argument in the voters' pamphlet calls attention to the fact that the price of sugar nearly doubled after the passage of the present tariff law. Did the farmer's price for sugar beets nearly double? How much of the increase in the price of sugar went into the profits of the sugar trust and how much into any other place?

After "sportsmen" (not pot hunters) have broken his fences, trampled his crops and shot his stock by accident, the farmer might turn sportsman and hunt for the love of it, turning loose a charge of shot on the trespassers. But he does not. He obeys the law while they violate it.

The state chamber of commerce says 500 families settled in Oregon in September. Knockers who say the income tax is ruining Oregon please take notice.

If the farmers vote the oleomargarine and income tax laws will be sustained. If they don't, dunno.

The republican national campaign fund is about \$1,500,000 this year to date. Four years ago that party spent \$4,500,000, one-third of which it spent two more years in raising. Democrats and progressives evidently have not so much money, for the republicans are advertising in the Enterprise and they are not.

In the scandal stirred up by Walsh, Brookheart, Wheeler and other senators there arises a new confessed liar every day. It seems hard, after seeing their contradictions and cross-contradictions, to believe that any of those witnesses ever told the truth, or tried to.

LaFollette's Tariff Stand Criticized

Products of Wisconsin Only Ones He Showed Any Interest In.

Portland, Or.—(Special)—The La Follette record on the tariff, it has been pointed out here by the Republican State Central committee after an inquiry, has been thoroughly inconsistent and thoroughly selfish.

La Follette voted for the highest tariff rates on all products of his own state and for the lowest rates or no tariff at all on everything produced elsewhere.

He voted for the highest duty proposed on linseed oil and flax-seed oil, both made from raw material produced in his own state. He was so insistent on protecting the Wisconsin product that he voted amendment of the committee report submitting the Fordney-McCumber schedule, inserting a new paragraph providing a tariff on casein, and he voted to amend the report by increasing duties on honey, poultry, cream and a number of other products of vital interest to the state of Wisconsin. But he voted, on the other hand, to decrease the duty on almonds, walnuts, rice, nuts, lumber, shingles, etc.

Because of his bitter opposition to a tariff on woolen textiles, he was afraid to vote for a tariff on wool. On the other hand, because the sheep-raising industry is well established in his state, he was afraid to vote against the tariff on wool so he was absent on all roll calls on the wool schedule.

La Follette consistently voted against the tariff on all manufactured goods with two exceptions, metal pants buttons and metal hooks and eyes. In both these instances he voted to increase the schedule above the committee report. It was not understood why he was so careful of the welfare of manufacturers of these articles.

La Follette is now talking about the iniquitous sugar tariff, but he was not enough concerned about it when it came up in the senate to be present and vote.

Coolidge for Reclamation Work.
Although he has lived all his life in a country where reclamation is somewhat meaningless, President Coolidge is responsive to the needs of the west, as shown in his letter to the convention of the American Mining Congress at Sacramento recently. He said water power and irrigation go hand in hand and continued, "It is my purpose to unremittingly stimulate and encourage the development of these great projects by every authority of the federal government."

Costs of Government Cut.
The bureau of the budget, under General Dawes, put the government on a sound business basis, resulting in a reduction of public expenditures from \$5,538,000,000 in 1921 to \$3,497,000,000 in 1924, a decrease in the annual cost of government of \$2,041,000,000.

Keep Coolidge and Elect Dawes

"I AM FOR ECONOMY. AFTER THAT I AM FOR MORE ECONOMY"—Coolidge

Vote For The Common Sense Candidates
—Their Records Recommend Them

He proved his faith by his works. This administration has saved the people \$6,000,000 daily in taxes as compared with 1921. It has lopped off 95,456 employes from the federal payrolls.

Dawes, the budgeteer, put the country on a business basis by cutting out the deadwood in governmental affairs. Deficits in former years have been turned into surpluses. The national debt has been reduced \$2,750,000,000 in three years.

FOREIGN POLICY SPELLS PEACE ABROAD AND PROSPERITY AT HOME

The Dawes plan has made possible rehabilitation of Europe, which means better markets and better prices for America's farm crops. Limitation of armaments is an administration policy and makes for peace as well as reduced costs of government.

The Republican tariff, linked with restrictive immigration, has brought prosperity to the man who toils. Wages were never so high, they would never buy so much, as today.

COOLIDGE POLICIES HAVE RE-ESTABLISHED PROSPERITY—CONTINUE THEM

When this administration took office, it faced all the problems of reconstruction. Deplorable conditions existed. The people were suffering from a tremendous deflation. Interest was high and capital scarce. There was general acute financial distress. Our citizens were compelled to sell their government bonds around 85 that they had bought in wartime at par.

A complete change has been accomplished. Never before in peace time has there been such constructive accomplishments as since March, 1921. Prosperity for all the people has replaced general distress. Industrially, the country was never on firmer ground. Agriculture, in dire plight when the Republican party came into power, faces a brightening future. Our depreciated government bonds have all risen above par and one is selling at better than 106.

THESE ARE SOUND, CONSTRUCTIVE, SENSIBLE ACCOMPLISHMENTS
