RUPTURE EXPERT HERE

F. H. Seelye of Chicago and Philadelphia, the noted trust expert, will personally be at the

HOTEL ALBANY

and will remain in Albany Thursday only.

JUNE 11

Mr. Seelye says: "The Spermatic Shield will not only retain any case of rupture perfectly, but contracts the opening in ten days on the average case, being an immense advancement over all former methods—exemplifying instantaneous effects immediately appreciable and withstanding any strain or position, no matter what the size or location. Large or difficult cases, or incisional ruptures (following operation) especially solicited. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions.

Warning—All cases should be cautioned against the use of any elastic or web truss with understraps, as same rest where the lump is and not where the opening is, producing complications necessitating surgical operations. Mr. Seelye has documents from the United States government, Washington, D. C., for inspection. He will be glad to demonstrate without charge or fee if desired. Business demands prevent stopping at other places in this section.

P. S.—Every statement in this notice has been verified before the federal and state courts.—F. H. Seelye.
