Halsey Happenings
 (Continued from page 1)
 Mrs. Robnett is postmaster now.
 The Koonitz family are home from the seashore.
 Glenn Chance and E. D. Isom visited Albany Monday.
 Mrs. George Maxwell's condition is reported slightly better today.
 It is expected that the grading of the Albany-Lebanon road will be completed this week.
 Mrs. Freeland and a granddaughter will occupy Nettie Spencer's house this winter.
 William Allingham and wife came down from Cascadia yesterday and are guests of Mrs. W. H. McMathan.
 J. W. Rector is on the September jury list. He is not expected home from Newport until about Sept. 20.
 Mrs. Florence Leeper of Eugene visited her mother, Mrs. A. Miller, Wednesday and afterward went to rusticate at Newport.
 Miss Ruth Finley spent several days with her aunt, Mrs. Eliza Brandon, last week. She returned to Crawfordville Sunday.
 Miss Minnie Gourley, who has employment in a mercantile house in Portland, has been visiting relatives and friends hereabouts.
 Miss Lois Johnson of Boise was here and at Eugene and Springfield last week visiting friends. She was formerly in the Ringo drugstore.
 Mrs. M. V. Koonitz, who has been in ill health for some time, was taken to the hospital at Corvallis Saturday. She is reported to be resting comfortably.
 O. B. Allingham, nephew of J. W. Bramwell, died Monday at Westfir, aged 62. Funeral in Eugene this afternoon and burial in the Oddfellows' cemetery there.
 Miss Jessaline Hookensmith's birthday was celebrated Wednesday by a large gathering, mostly from Halsey, who surprised her at her Lake Creek home. Music and ice cream and cake were among the treats.
 Frank Hadley and wife and Gladys and Velva are enjoying the H. F. English piano, which Mr. Hadley purchased. Instead of moving it to his new home at Myrtle Creek Mr. English bought a new grand piano at Eugene.
 In our story this week Prudence's daughter gets her first taste of corporal punishment and the result is surprising and eventually happy. Jerry has demonstrated that she is not the kind of timber of which flappers are made and justifies the good judgment of her mother in her upbringing.
 Miss Myrtle Tobey, who has been visiting at the home of her mother, Mrs. John Gormley, left Tuesday for Bandon, where she

Pabcolin
The artistic durable floor covering
 —An Improvement on Printed Linoleum

Resistance to wear is probably the one quality you look for first when selecting floor covering. And it is that quality above all others which has been built into Pabcolin.
 Not linoleum, nor a substitute, but an improvement on printed linoleum—a floor covering with its wearing surface composed of special enamel paint instead of the usual soft oil-paint.
 This hard, wear-defying surface rests on a firm "body" of long-fiber rag felt, made for this particular purpose, and thoroughly waterproofed by a special process.
 It pays to buy Pabcolin because it gives you extra-long service. It keeps its gloss and beautiful colors far longer than you would suppose any printed floor covering capable, yet its cost is no higher. Besides, you are offered a variety of beautiful patterns—many are new and exclusive.
 Let us show you Pabcolin. There are patterns suitable for bedroom, bathroom, laundry, kitchen, porch, dining-room, hall, in fact for any room in the house.

HILL & Co. HALSEY

will visit her aunt, Mrs. Walter Smith.

Undertaker Wright had charge of the funeral of the four victims of collision of their auto with a train at Harrisburg. They were buried in the Alford cemetery.
 James A. Johnson of Lake Creek, formerly of Albany, died at the home of his mother in that city and the funeral was yesterday, with interment at Riverside cemetery.

Select Seed Tubers From Sound Plants

Potatoes Should Be Obtained From Healthy Vines.

Shippers Should Avoid Oversupplied Markets

When marketing hay avoid a glutted market, advise marketing experts. Unlike wheat and other grains hay cannot be stored in great quantities at the central markets. If it reaches an oversupplied market it becomes a drag and sells for what it will bring. The only remedy is to watch the quotations carefully and avoid shipping when receipts are unusually heavy or the demand slow.
 Ship the kind of hay the market wants. Kansas City is fortunately located to supply the demand for hay in the south. Kansas City is the largest primary hay market in the world and it is mainly a distributing market. Much of this is coarse stemmy hay which is ground for alfalfa meal or goes into the South for horses and mules in the cotton section. Accurate knowledge on the part of the shipper, of grades and receipts, will enable him to sell his high-class hay at a good margin above average prices.
 Cows cannot give powdered milk; better let them have plenty of water.
 Have good small grain seed for fall planting and store carefully.
 Oyster shell is good, but it won't take the place of grit for hens.
 Harvest lima beans as fast as they mature and save for winter use.
 Do not cut corn roots; cultivate shallow, and one middle at the time.

Whitewash Still Is Oldest of Paints

No New Material Found to Supersede It.

Though whitewash is one of the oldest paints used in American agriculture for the interiors of barns and other buildings, no new material has ever threatened to supersede it.
 "This is largely because whitewash is cheap, easy to prepare, and has undergone a process of improvement," says E. R. Gross, rural engineer, New Jersey College of Agriculture. Whitewash cleans and disinfects in addition to giving buildings a wholesome, pleasing appearance.
 Quicklime is still the basic substance used in making whitewash, but years of experience have resulted in a formula that includes a few cheap substances which greatly improve the disinfecting qualities and durability of the mixture. What is commonly known as the government formula is excellent:
 Half bushel (31 lbs.) of quicklime or lump lime slaked in 7 gallons of hot water.
 One peck (15 lbs.) of salt dissolved in 4 gallons of hot water.
 Three pounds of ground rice boiled to a thin paste.
 One pound of clear glue dissolved in one gallon of warm water.
 Half pound of Spanish whiting dissolved with the glue.
 The lime is slaked in a barrel or tub. The salt water is then added, followed by the glue and whiting mixture and, finally, the rice paste. The entire batch requires thorough stirring. Twelve ounces of alum added to this mixture acts as a hardener and makes it stick better. To increase the gloss two or three bars of laundry soap may be added. There is an advantage in applying whitewash while it is hot. Care should be taken not to apply it too thick, as it will then crack and scale.
 Remember that grass and weeds are easier to kill when young. Cultivate crops frequently.

University of Oregon
 The UNIVERSITY of OREGON contains:
 The College of Literature, Science and the Arts with 22 departments.
 The professional schools of Architecture and Allied Arts—Business Administration—Education—Graduate Study—Journalism—Law—Medicine—Music—Physical Education—Sociology—Extension.

ICED DRINKS IN THE SUMMER
 On a warm and sultry summer day, there is nothing more refreshing to the mind and to the body than an iced drink. Of course, when such drinks are being used, moderation should be practiced, because if taken in excess or too rapidly, they are liable to be injurious to the stomach. However, when taken in a sensible manner, they are refreshing and beneficial to the fatigued. In the manufacture of these drinks, care should be taken to avoid any combination that may be indigestible or hard to assimilate. The drink should be consumed in a slow and leisurely manner.
 The greatest danger present in the use of iced drinks is the one that involves the use of ingredients that are possibly impure or contaminated in any way. This is very liable to happen if the juices that are used are allowed to stand until they become soured and unfit for use, or if the milk or other ingredient used is not strictly fresh. The predisposition of milk to spoil quickly at summer temperatures makes it oftentimes necessary to use evaporated milk, which after all is just pure fresh milk with more than half the water taken away. It is sterile and, therefore, always safe. For use in iced drinks, it is ideal.
 Following are several formulas used in the manufacture of iced beverages. If these formulas are followed religiously, the results will be found to be very satisfactory.
Chocolate Malted Milk.
 1 cup evaporated milk 2 teaspoonfuls cocoa
 1 cup water 2 teaspoonfuls malted milk
 Mix cocoa with water until syrup is obtained. Put all ingredients in Mason jar and shake thoroughly and serve with shaved ice.
Milk Punch.
 1 cup evaporated milk 2 tsp. orange juice
 Sugar to suit taste ¼ cup water
 1 cup tea Small stick cinnamon
 2 tbsp. lemon juice ¼ cup fruit juice (currant or berry preferred)
 Boil slowly the cinnamon, a lemon rind and orange rind in water for ten minutes. Strain and when cool add the other ingredients. Place in a Mason fruit jar and shake well. Serve in tall glasses with chopped ice.
Egg Nog.
 1 egg 1½ tbsp. powdered sugar
 Pinch salt ½ cup water
 ½ cup cold evaporated milk 2 tbsp. fruit juice
 ¼ cup ice water Nutmeg gratings
 Add salt to egg white and beat to a stiff froth. Add the sugar, the well beaten yolk of the egg and the fruit juice and nutmeg. Fill glass with milk and cold water. Sprinkle top with chopped nuts.
 The same quantity of pure fresh milk may advantageously be substituted for evaporated milk and water. Once opened, sterilized evaporated milk and fresh cooled milk from the cow are equally liable to infection and deterioration.

Fight Weeds for Vegetable Garden
 Often Becomes Unsightly Weed Patch Rather Than Productive Spot.

It is too often the common fate of the summer garden in North Carolina to become an unsightly weed patch rather than a productive spot adding to the health and income of the family.
 "We should not allow this to occur," says Glenn O. Randall, extension horticulturist for the North Carolina State College of Agriculture. "Fresh vegetables form a rich and cheap source of those protective foods so badly needed in the daily diet. These foods are needed just as badly in the hot weather of mid-summer as in the vigorous days of early spring, and it is possible to have a continuous supply of succulent vegetables during hot weather."
 Shallow Cultivation.
 To do this, however, Mr. Randall suggests that the growing vegetables must be given shallow cultivation frequently enough to maintain a thin soil mulch and to kill weeds and grass. Then, too, the refuse from the spring vegetables must be cleaned out if disease was present or composted if free from disease and the space occupied by this refuse planted to a succession of vegetables.
 Some crops that will withstand the hot weather are snap beans, lima beans, sweet corn, cabbage, tomatoes, New Zealand spinach and cucumbers. It is hardly possible to have a good supply of the salad crops or "greens," such as lettuce, as they will not thrive in hot weather; but New Zealand spinach will help to supply this need.
 Late Cabbage Planting.
 Mr. Randall states that it is now time to plant seed for the late crop of cabbage, such as the Succession and All-Season varieties. Plants for a late crop of tomatoes should also be set out, using, preferably, the wilt-resistant varieties.
 "Remember," says Mr. Randall, "the consumption of green vegetables every day serves as a protection against sickness by aiding in maintaining the vitality through the hot weather of mid-summer."

Goforth Has Gone Forth
 David Goforth was permitted to go forth from a Washington prison on parole. He joined a party which peeled chittens near Reedport and tried to get away with the landowner A sheriff sought him and his pals and they jumped from their auto and attempted to go forth, but a bullet went through Goforth and he will go forth no more. He died on the way to a hospital a week ago Sunday.

The Southern Pacific has rails laid and has run cars from Klamath Falls to Odell. Here a tunnel, finished a week ago, brings the work to the west side.
 Miss Helen Armstrong will teach the Creswell school.
