Pabcolin
The artistic durable floor covering
—An Improvement on Printed Linoleum

Resistance to wear is probably the one quality you look for first when selecting floor covering. And it is that quality above all others which has been built into Pabcolin.

Not linoleum, nor a substitute, but an improvement on printed linoleum—a floor covering with its wearing surface composed of special enamel paint instead of the usual soft oil-paint.

This hard, wear-defying surface rests on a firm "body" of long-fiber rag felt, made for this particular purpose, and thoroughly waterproofed by a special process.

It pays to buy Pabcolin because it gives you extra-long service. It keeps its gloss and beautiful colors far longer than you would suppose any printed floor covering capable, yet its cost is no higher. Besides, you are offered a variety of beautiful patterns—many are new and exclusive.

Let us show you Pabcolin. There are patterns suitable for bedroom, bathroom, laundry, kitchen, porch, dining-room, hall, in fact for any room in the house.
