### Doings of Our Populace Chroniced in Brief Paragraphs

The last number of the Harrisburg Bulletin reports the "Bulletin sale hanging," but says nothing about hanging the contracting parties, so we suppose they are footloose.

The automobile is a help to both honest people and crooks. T. J. Skirvin reports the disappearance of 45 sheep from the J. W. Moore farm, this side of Rowland. Probably they were given a ride on a truck.

An unknown but enterprising man is reported to have been making as much as \$30 a night on recent Saturdays by standing at the approach to the Harrisburg free ferry and collecting 80c alleged ferry toll from each stranger taking a car aboard.

Mrs. Bert Clark came home Thursday. Her mother, Mrs. Curtis, came along and is still with her.

Mrs. Nora Colman, who has taught at Peoria, will reside in part of Miss Ruby Schroll's house and teach the fourth, fifth and sixth grades of our school. Mrs. Shotwell, one of the high school teachers, will board with Miss Schroll. Another new teacher is Miss Lorena Kizer of Harrisburg, seventh and eighth grades.

Saturday morning C. H. James of California, northbound, ran into Mrs. A. C. Armstrong's car in Albany, causing over \$30 worth of damage. Then he sped northward without regard to the speed limit. A warrant was issued for his arrest, as the collision is claimed to have been his fault.

Seth Mills writes that his address is Goddard, Alaska, not Hot Springs, and adds:

W. J. Cary returned to Roseburg Friday, thinking that further treatment might improve his paralyzed side.

Mrs. J. D. Pittman and her father, Mr. Barber, attended the funeral of William Woodin at Junction City Monday.

C. P. Kizer of Harrisburg, E. Hibbard of Corvallis and Floyd Fox took all the prizes for Oxford sheep at the Yakima fair.

The Martin Cummings family had as week-end guests Mrs. Cummings' brother, B. M. Janes, and family from Benton county.

Mike Banich of Harrisburg has been fined \$10 for leaving a band of sheep without food or water. And sheep the most profitable of livestock!

Lyman Howe and son and Dean Tveer and family have returned to their homes at San Jose and Oakland, Cal., respectively, after a vacation in Brownsville.

Can you read the Choctaw language? If so perhaps you enjoyed the first line of the Tavenport piano advertisement on page 10 last week. The company, however, is selling those pianos in good American English.

Mr. and Mrs. P. H. Freerksen and grandchildren, Bobbie and Doris Mae, went to Corvallis Sunday to visit their daughter and sister, Mrs. Frank Workinger, who is in a hospital.

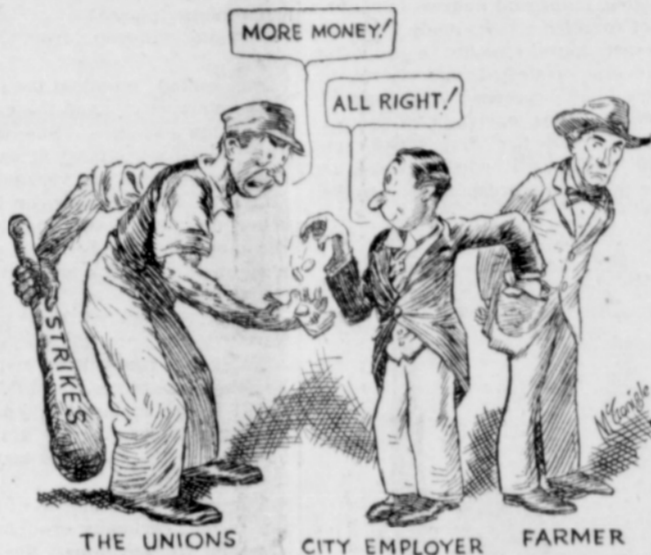

Chancy Sickels and wife got home a week ago Thursday from their eastern trip. Mr. Sickels cut it short a week on account of the heat and the alkali water in Oklahoma and he came home better satisfied than ever with the western Oregon climate.

## WHAT IS EVAPORATED MILK?

Did you ever stop to figure out the exact meaning of "Evaporated Milk"? The word "evaporated" may give you the idea that in the process of evaporation the milk has lost some of its valuable qualities. It hasn't. It has lost only water. Sixty per cent of the water is evaporated from the milk after it comes fresh from the cow. The first step in processing the milk is the evaporation, when a portion of the water content is removed. The second step is the homogenization, which insures the cream being distributed evenly throughout the milk. The third is the canning. The fourth is sterilization, which takes place in the can when the milk is subjected to sufficient heat to destroy the bacteria. Thus evaporated milk remains as pure and fresh in the container as when it foamed into the pail in the farmer's barn.

Evaporated milk is now generally recognized as the freshest milk available to those not living on farms and producing their own milk. For freshness in milk means purity.

Transportation of milk from the dairy country to the city is well systematized and rapid and yet owing to the immense quantities of milk that must be rushed in daily, much of it must be obtained at considerable distances and a large per cent is necessarily some days old when it is delivered by the milkman.

Evaporated milk, on the other hand, is last night's and this morning's milk. From the dairy barn, always under rigid inspection, it is hurried by farmers to factories located in the heart of the dairy country and delivered when it is fresh. Evaporated milk is canned just at its "freshest moment," when it is in its finest state. It is never allowed to get old. The whole process from cow to can requires only a few hours. It may be interesting to know that the process of sterilizing takes place after the milk has been sealed in its containers. Once in its sterilized containers, there is no possibility of deterioration.

The sterilizing of evaporated milk insures its purity—it makes a safe milk for the children. Evaporated milk is boiled milk, and this makes it more digestible.

It may be used for any milk need with safety and economy.

For ordinary cream needs, use it just as it comes from the can. When a rich milk is desired, add an equal part of water. For cooking and baking, two parts water and one part milk will usually suffice.

The same quantity of pure fresh milk may advantageously be substituted for evaporated milk and water. Once opened, sterilized evaporated milk and fresh cooled milk from the cow are equally liable to infection and deterioration.

Mr. and Mrs. Will Price and children of Monroe visited with Mr. and Mrs. Ed Zimmerman Saturday evening.
