

## CHARMING PRINT SILK FROCKS; PARIS EXPLOITS STYLE WHIMS

IT IS silk print here and silk print there and silk print everywhere in the realm of smart fashion. Paris tells us that gay patterned silks, and this includes crepes, taffetas and chiffons, the heavier weaves as well as the very sheer, will continue to shed their radiant loveliness along the path of the mode throughout the spring and summer months.

The silk-print art has become a most fascinating subject, not only from the standpoint of attractive appearance, but the designs themselves

colored shirred georgette accent the popular idea of combining a plain material with the gay print.

Abounding in intriguing style whims are the new waistcoats and blouses which Paris so modishly creates in colorful complement to the smart two-piece tailored suit. In behalf of the fashionable blouse, French stylists have commandeered both gay print and colorful polka dot.

The use of pompadour print in combination with a monotone fabric is stressed in the O'Rossen model to the

## PROTECTING GARMENTS FROM MOTH DAMAGE

Cedar Chests Are Valuable for Storing Clothing at Home.

(Prepared by the United States Department of Agriculture.)

Clothes moths are in greatest abundance the country over from May to July, and during September and October, although in steam-heated houses they may be on the wing in any month. The time to begin taking precautions against damage from moths is therefore before they appear in any numbers.

Whatever protective measures are adopted, one invariable rule should be followed in putting woolen, fur and other susceptible articles away for the season. Clean each article thoroughly, brush and beat it, to dislodge any eggs or larvae that may be already on it, and sun it if possible. If these

thoroughly cleaned, brushed and beaten, with special attention to brushing out pockets, seams, and other possible hiding places for larvae or eggs already on the garments, and if the chest is tight so that no moths or larvae can reach the garments later, the clothing will probably be quite safe.

Brushing or beating furs will not always get rid of the older worms, if they have once gotten into the long hairs and established themselves by spinning their webs. If you think your furs are already infested they should be combed out with a very fine comb or should be fumigated. If furs are promptly stored as soon as the season for their use is over, there is little likelihood of their containing these older larvae.

### Box or Chest Satisfactory.

Any tight box or chest is satisfactory for storing clothes that have been given the necessary preliminary treatment—cleaning, brushing, beating and sunning. Ordinary firm wrapping paper will do, or several thicknesses of newspaper, provided the folds of the paper at the ends of the bundles are bent securely back so that moths cannot crawl in to lay eggs. Unbroken cardboard boxes may be used if similarly wrapped or sealed around the covers with gummed paper. The specially treated paper bags which come for the purpose are of no value in killing moths, but are excellent if so devised that they are perfectly tight, always provided that every precaution has been taken to clean and brush the clothing before putting it away. If there is any hole about the hanger or anywhere else on such a bag, it is useless.

Winter suits and coats dry-cleaned and then immediately put away in any of the foregoing tight containers are almost certain to escape moth damage. To "make assurance doubly sure," however, the use of repellents, shut up in the containers with the clothing, is recommended. When naphthalene flakes, paradichloro-benzene crystals, or camphor blocks are shut up in tight boxes with garments, they give off fumes which kill all stages of clothes moths which may be present in spite of the most careful attention and cleaning. Scattering these substances about on shelves or bureau drawers does not accomplish the same result because the fumes are not confined. Camphor is less effective than the other two substances. Carbon disulphide and carbon tetrachloride are excellent for the fumigation of clothes which can be tightly sealed. The former is inflammable and should be used only by an experienced person, as is the case with hydrocyanic-acid gas, used for fumigating an entire house or storage establishment.

Farmers' Bulletin 1833 gives several other suggestions for protecting clothes from moth damage, as well as detailed instructions for using any of the foregoing methods. Send to the United States Department of Agriculture for it, at Washington, D. C. It is free while the supply lasts.

Garments Neatly Stored in a Closet.

precautions are not followed, and half-grown larvae or eggs from which larvae can hatch are securely established in your garments and rugs before you put them away, there is every likelihood that they will do damage and that they may not be affected by repellents.

### Larvae Destroys Clothing.

Moths or "moth-millers" do not eat fabrics. They lay their eggs where the larvae or worms when hatched will find suitable food, and the larvae eat the woolen or fur or other material. The ideal way to protect articles of every kind subject to moth damage is to put them into cold storage, after the preliminary treatment described, but this is not always possible. Cedar chests are valuable for storing clothing at home. Their value lies in the fact that the aroma of red cedar heartwood kills young moth larvae. Cedar chests cannot be depended upon to kill the moths, their eggs, or the worms after they are one-half to full grown, or after they are three or four months old. If the fabrics put in the chests have first been

## Peppers Useful in Many Dishes to Give Flavor

Sweet mild green peppers are sometimes served by themselves as a vegetable dish, either fried in butter, broiled or baked in the oven. After they have been washed, they are usually prepared for any of these methods of cooking by cutting them in half, and removing the core and seeds. They should be broiled with butter if they are cooked in the oven or broiled under the gas flame. Sometimes the skin is removed when they are served. Tomato sauce or lemon juice may be used for seasoning.

Because of their pronounced flavor, peppers are more often combined with other vegetables or foods than served alone, says the United States Department of Agriculture. After parboiling for two or three minutes they are stuffed in many ways, either whole or split down the middle, and baked. Leftovers of many sorts may be utilized in making the stuffing. From a third to a half of this is usually a starchy material, such as bread crumbs, cooked rice, macaroni, mashed potato or corn. One or more of the following will be found to blend well with the flavor of any of these and of the pepper container. Meat, fish, cottage cheese, peanuts, celery, tomatoes, chopped onion, string beans or other vegetables. Such fillings are mixed with the starchy stuffing to be used, seasoned, moistened

with a small amount of stock, gravy, butter or white sauce, and the exposed top of the stuffing is usually sprinkled with bread crumbs.

Shredded or minced peppers, both raw and cooked, may be used to give flavor to a great many dishes, including soups and stews, scalloped dishes and salads.

### Suggestions of Lunches

#### Suitable to All Needs

While the carrying of lunches is still by far the most common practice, taking country and town together, there are a few cases in which it is thought desirable for the school to share with the home the responsibility for the noonday meal. In some places the task for the school may be hardly more than that of providing clean and safe places for lunch baskets, where the food will not be likely to become dirty or to spoil. In others it may be practicable to provide by one means or another a hot dish with which to supplement foods brought from home. In still others, particularly where large attendance and many teachers and other workers make subdivision of labor a comparatively easy matter, it may be possible for the school to establish and maintain lunch rooms. In Farmers' Bulletin 712, School Lunches, suggestions are made for types of lunches suitable to all these needs.

## Radio Messages to Other Worlds?

Recent discoveries, made known by the president of England's Royal Astronomical society, indicate that the little dark star on which we live is situated not far from the center of the greater universe, something man in his conceited ignorance has always believed. . . . For every sun, or twinkling star in space, there are many more dark stars or planets, which shine, if at all, by reflected light. This destroys one of primitive man's illusions that the sky and sun and stars were all created for the benefit of himself and his fellows alone. In these millions of unseen worlds there must be others similarly situated as our earth, on which the same forms of life have appeared and exist. One of these days radio may be perfected to the point where the people on one planet may exchange messages with those on another. It is a far-distant probability but not an impossibility.—Capper's Weekly.

### Cuticura Comforts Baby's Skin

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

### Take "Picture Brides"

To console the solitary young Japanese bachelors settled in South America, the consul of that country at Sao Paulo, Brazil, has undertaken to encourage the immigration of picture brides. According to Miyako, 3,000 of these brides have registered for passage to Brazil, 3,000 for Argentina, 2,000 for Mexico, and a similar number for other destinations on this side of the Atlantic.—Living Age.

A torpid liver prevents proper food assimilation. Wright's Indian Vegetable Pills tone up the liver. They act gently but surely. 372 Pearl St., New York. Adv.

### Natives Get Voice

For the first time natives of West Africa are now sharing in their government. The legislative council will consist of fifteen official and fourteen unofficial members, besides the governor, who is president. The unofficial members will be the natives. The chiefs of the tribes will in effect name the representatives.

### Cleveland's Fire Chief

Oldest active fire chief in any of the large American cities is George A. Wallace of Cleveland, now in his seventy-eighth year. Mr. Wallace has been a fireman in Cleveland for 57 years and chief of the department 25 years.

Truth need not fear the future.

Ask Grandma - she knows this good TONIC PE-RU-NA Sold Everywhere

Green's August Flower for Constipation, Indigestion and Torpid Liver. Relieves that feeling of having eaten unwisely. 30c and 90c bottles. AT ALL DRUGGISTS.

### America's Bus Routes

There are now more than 7,800 motor bus routes in America, being operated by 5,500 motor bus companies. The greatest bus-using region is the section north of the Ohio river and east of the Mississippi, where 2,700 bus companies operate 3,000 routes.

## Builds up weak bodies

"Eighteen months I suffered from stomach trouble, dizziness, nervousness and intense pain. Tanlac stopped all that. I am 73. Appetite is good, I sleep well and feel like 50. I gladly recommend Tanlac." Elias Johnson, 595 Cass St., St. Paul, Minn.

From Mother Nature's storehouse we have gathered the roots, herbs and fruits which are compounded, under the famous Tanlac formula, to make Tanlac.

If your body is weak and undernourished, if you can't sleep or eat, have stomach trouble or burning rheumatism, just you see how quickly Tanlac can help you back to health and strength.

Don't delay taking Tanlac another day. Stop at your druggist's now and get a bottle of this, the greatest of all tonics. Take Tanlac Vegetable Pills for constipation.

SPOHN'S DISTEMPER COMPOUND. Keep your horses working with "SPOHN'S." Standard remedy for 32 years for Distemper, Strangles, Influenza, Coughs and Colic. Give to sick and those exposed. Give "SPOHN'S" for Dog Distemper. Sold by your druggist. If not, write for small bottle or booklet on diseases. SPOHN MEDICAL CO., Dept. GOSHEN, IND.

Why suffer when skin troubles yield so easily to the healing touch of

## Resinol

Coughs-Colds! Break up with Musterole. The oil of mustard gives quick relief. Massage to gently with your fingers. Better than a Mustard Plaster.

CASH PAID FOR DENTAL GOLD, FAIRBANKS, Discarded Jewelry, Diamonds and Platinum. Cash by return Mail. Florida Gold Refining Co., 31 W. Adams St., Jacksonville, Fla.

OWNER HAVING GOOD FARM FOR SALE at reasonable price, write C. SMITH, 1814 Albee St., Oakland, Calif.

FOUND That Hannah's Tablets will quickly relieve indigestion, dyspepsia, sick, sour or gassy stomachs. To prove it, I'll send a trial package free. Don't suffer any longer. Write for a pkg. today. P. J. Hannah, Box 983, Yuma, Ark.

FARMS WANTED FOR CASH BUYERS Will deal with owners only. J. A. Whyte, 28 Beverley Place, Dayton, Ohio.

## WHAT CAUSES BOILS.

Boils and carbuncles are the result of improper diet or infection of the skin. It is sometimes hard to determine the exact cause but CARBOLL will give quick relief. No expensive operation is necessary as one application of CARBOLL promptly stops the pain and continued use draws out the core. Get a 50c box from your druggist. Your money back if you are not satisfied. CARBOLL-NEAL CO., NASHVILLE, TENN.

Mitchell Eye Salve For SORE EYES. Avoid dropping strong drugs in eye sore from alkali or other irritation. The old simple remedy that brings comforting relief is best. 50c. All druggists. Hall & Barstow, New York City.

PARKER'S HAIR BALSAM. Restores Color and Beauty to Gray and Faded Hair. Use and it will at Druggists. Hirsch, Chem. Works, Philadelphia, Pa.

HINDERCORNS Removes Corns, Calluses, etc., stops all pain, restores comfort to the feet, makes walking easy. Use by mail or at Druggists. Hirsch Chemical Works, Philadelphia, Pa.

W. N. U., San Francisco, No. 15-1926.

## Elderly Picture Actress

Hollywood's most ambitious "extra" is ninety. She is Mary Holden, born in Rutland, Vt. Every day she appears at casting offices looking for "old bits" in motion pictures and more often than not she obtains employment. "I never thought about acting until I was eighty," she declared. "Now I think it is wonderful. I want to play in 100 pictures before I die. I will never be too old to get parts. In my case, the older I am, the better."

Diphenylaminechlorarsine, which causes sneezing, is one of the most important war gases adopted by the United States Army.

TWO EXAMPLES OF THE SILK-PRINT ART

are interpretative. One might almost say that the silk prints of today have expression. They are as interesting to read as a romance. They may not have a plot, but they interpret ideas gathered from inspirational sources of both art and nature. That oft-used phrase "but it doesn't mean anything" could never be applied to the handsome "made-in-America" silk which is the medium for the development of the frock shown to the right in this picture. Fact is, this particular silk is very meaningful for the American artist who designed it is pleased to entitle it, "My Trip Abroad." Sure enough, give it close scrutiny and the discerning eye will detect a suggestion of the city of Paris, an airplane view which reveals its maze of streets and avenues intercrossed by River Seine.

The bewildering array of print silks seems to respond to the call of every temperament. If a nature lover, satisfy your longing with some one or

left in this picture. Not only is the employment of gay print unique, but the sleeves of plain white shantung are an innovation. The normal waistline is subtly suggested by the clever manipulation of a fitted girdle. That there is a touch of lingerie in the lace fichu foretells the coming vogue for these effects. More and more are lace accessories enhancing the spring costume.

Likewise the companion blouse in this illustration boasts a touch of lingerie, for the gilet is of plaited batiste. On this blouse of rouge-red crepe, O'Rossen, whose art supreme expresses itself in tailored effects, places a tie-collar of white crepe with huge red polka dots done in outline. The belt of white kidskin is piped with red.

Touches of color appear in detail on the white silk blouse or that of wash satin in pretty colors or white. The Parisian blouse glorifies the idea

SHOWING NEW PARIS MODES

other of the lovely bellflowered silks done in pastel colorings. These bespeak an exquisite realism in design as well as tone and tint. Perhaps the demure, the very modest patterning, would prove of greater appeal. Very well, for such there are the daintiest allover designs done in perfect symmetry even to the point of being prim. The last word from authentic style headquarters declares the simpler patterned silks as very smart for the spring frock.

For the mind of modernistic trend there are silks in resplendent color. Some repeat the glorious colorings of rich stained glass cathedral windows. Even more colorful silks seem to say: "I represent a futuristic art of cubes and squares and triangles and bold colors." Polka dots from little to big are also featured this season. The gown to the left in the picture denotes this tendency. Its panels of solid

with novel bright pipings and colorful buttons.

Shantung in colors or white is the smart blouse material this spring. The fabric is exploited in exact match colorings to one's cloth suit. Coral, peach, periwinkle blue, putty, beige, gray, bois de rose and green, also bright red and navy shantung is styled with contrasting pipings or stitchings done in a tailored way.

Three outstanding items expressed in the latest Parisian blouse types are neckties, jabots and gilet or vestee effects, to which a fourth may be added—namely, narrow novelty belts which are a part of the design, fashioned to harmonize with the general color scheme. French stylists take delight in using bright colored buttons which emphasize a tailored finish.
