

Albany Directory

This is good advice: "If you live in Albany, trade in Albany; if you live in some other town, trade in that town." But in these automobile days many residing elsewhere find it advisable to do at least part of their buying in the larger town. Those who go to Albany to transact business will find the firms named below ready to fill their requirements with courtesy and fairness.

Albany Floral Co. Cut flowers and plants. Floral art for every and all occasions. Flower phone 458-J.

CENTRAL TIRE SHOP
Tire Vulcanizing. Battery recharging. 221 W. Second. Ed Falk, Prop.

Davenport Music House. 409 West 1st Street. Pianos, Organs and all musical instruments of the very best makes. Drop in and look over our stock, we sell on terms that will please you.

Eastburn Bros.—Two big grocery stores, 212 W. First and 225 South Main. Good merchandise at the right prices.

Elite Cafeteria and confectionery
Home cooking. Pleasant surroundings. Courteous, efficient service. We make our own candies. W. S. DUNCAN.

FORD SALES AND SERVICE
Tires and accessories. Repairs. KIRK-POLAK MOTOR Co.

Fortmiller Furniture Co., furniture, rugs, linoleum, stoves ranges. Funeral directors. 427-433 West First street, Albany, Oregon.

HOLMAN & JACKSON

FAMOUS ARTIST INSTRUCTS

William de Leftwich Dodge, famous mural artist, in his studio at the Sesqui-Centennial International Exposition grounds in Philadelphia, where the 150th anniversary of signing the Declaration of Independence will be celebrated from June, to December, of this year, giving instructions to a group of young artists who are creating the "Rainbow City." Mr. Dodge is the color expert for the exposition, and every bit of color work done must be approved by him.

DEPARTMENT PLANS NETWORK OF AIRWAYS

Full Freight and Passenger Service From Coast to Coast Contemplated.

Paul Smith's, N. Y. — Plans for blanketing the country with a network of commercial airways were announced by Secretary Hoover of the department of commerce during a visit with President Coolidge.

At the same time, the progress the department is making in supervising the development of commercial aviation was indicated when Mr. Coolidge approved two routes it recommends be laid down, one for a transcontinental airway from New York to the Pacific coast and the other for a southwestern service from Chicago to Dallas and Fort Worth, Tex.

In announcing the action of the president Mr. Hoover expressed the belief that within six months full passenger, express and mail service will be in operation on the transcontinental route.

At the same time he indicated that announcements would be made soon for other commercial airways, providing, in general, lines along the Atlantic coast, in the Mississippi valley, the Great Lakes region, the northwestern states and the Pacific coast, including the far northwest.

Government encouragement and assistance in the development of commercial aviation has been made possible by legislation which grew out of the investigation of the entire aviation situation by the president's air board last winter.

The immediate program contemplates the rendering of the same aid to aircraft that the government now gives to navigation and anticipates the turning over shortly of the transcontinental air mail carriage to private companies.

UNIFORM GAS LAWS URGED UPON STATES

Salt Lake City, Utah.—States must co-operate in making uniform laws governing taxes on gasoline or, on account of the interstate features involved, there will develop conflicts making it necessary to pass this function over to the federal government.

This represents the consensus of opinion of those who attended the group conference of gas tax administrators from several Western states here.

Group conferences will follow at Atlanta August 20 and Philadelphia September 22, after which the organization will be complete for the national conference to be held probably at St. Louis in November.

Sam A. Koser, secretary of state for Oregon, and H. E. Crockett, Utah secretary of state, were elected to be vice presidents in the national organization. Mrs. Henrietta Kneest of Jefferson City was elected executive secretary, subject to confirmation by the other groups.

Among the delegates present were James Dute, Colorado; J. W. Walker and A. H. Augstman, Montana; Corburn Russell, New Mexico; F. E. Lukins, Idaho, and F. F. McKinnon, Missouri.

RULING SUSTAINS IRRIGATION POLICY

Washington, D. C.—The department of justice ruled that the secretary of the interior is not compelled to expend congressional appropriations for construction of new reclamation projects unless convinced of their feasibility, their adaptability for settlement and repayment of their costs to the government.

The attorney-general's opinion was rendered in connection with the proposed new Baker project in Oregon.

In his ruling the attorney general called attention to acts authorizing the Baker and other projects which provide for contracts with irrigation districts for the repayment within a fixed term of years of construction, operation and maintenance costs, the contracts to be confirmed by a court of competent jurisdiction.

As a result of these terms, he said, the secretary of the interior must exercise due diligence to determine whether the projects are such as will enable the promissors in the contracts to carry out their terms. He referred to the reclamation law passed by congress two years ago which provides that construction of a new project is not to be undertaken until the interior secretary has certified in writing that it is feasible.

UNDRINKABLE ALCOHOL AIM

Prohibition Officials Seek Real Denaturing Substance.

Washington, D. C. — Something stronger than gasoline—just what has not been determined—is to be put in industrial alcohol in an effort to outwit the resourceful bootlegger.

Prohibition officials reached this decision and passed on to government chemists the problem of finding an effective denaturing process. Whatever is used, it was predicted, probably will smell bad, and make alcohol taste bad, but will be harmless.

After a conference with Frank Dow, acting chief of the prohibition forces, and James M. Doran, chief chemist of the prohibition unit, Acting Secretary Winston of the treasury admitted that gasoline and other ingredients put in industrial alcohol to render it unfit for beverage use had not proved sufficient deterrents to crafty bootleggers, and that a new denaturing substance must be found.

Continental Steel Trust to be Formed.

Paris.—Negotiations for the formation of a continental steel and iron trust have been virtually completed. The agreements will be submitted to the industrial interests of France, Belgium, Germany and Luxembourg, who are concerned with them, for approval.

Miners Trapped 153 Hours Saved.

Salem, Ky.—Five miners, imprisoned in the Hudson zinc and spar mine for 153 hours, were rescued and brought with them a story of prayer meetings, rather than of human suffering.

Senate Slush Fund Committee Adjourns

Chicago.—After disclosing expenditures of nearly \$1,000,000 in the Illinois primary, the senate "slush" committee has adjourned until November when it will cite three principal witnesses to the United States senate for contempt, because they refused to answer Senator Reed's questions.

Milk Gives Most Food Value At Least Cost

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk Association.

"Dietitians are unanimous in advocating the use of milk by men, women and children," said Mr. Hooks. "Milk and evaporated milk supply some of all the materials necessary for the growth and maintenance of the body; they furnish energy for work, play and warmth."

"Milk helps repair the wear and tear of the body. It is as good as meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Hermann Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum."

"Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-sterilized by dehydrating, but it is sterilized as well."

Effective But Simple Dishes Now In Vogue

Something simple yet effective is the housewife's ideal for week-end dishes.

During the warm summer weather, women should not be compelled to spend hours in the preparation of meals, when minutes would accomplish the same purpose. Planning week-end menus should be a congenial task, not a bore. At this time of the year there are a variety of nutritious vegetables and fruits to choose from in preparing meals and the modern home manager takes advantage of them. The housewife plans her summer menus so that they will suggest coolness, while at the same time taking into consideration their dietary value. A delicious cream soup made from fresh vegetables, or an omelet, a fresh fruit dessert, or a custard, a dish of ice cream, or a pudding, are nourishing items that should find high favor in the week-end menu.

The home manager enjoys her week-ends 100 per cent more when she has a few moments of leisure. And in this connection the following recipes may prove an aid.

Creamy Salad Dressing.

1 cup boiled or milk
1/2 cup cold water 1/4 cup cream
1/2 cup evaporated 1 tsp. sugar
1/2 cup evaporated 1 tsp. fruit juice
Combine evaporated milk and cream, chill and whip. Add sugar and juice, then fold into salad dressing. Especially nice for fruit salads.

Chocolate Velvet Cream.

1/2 tsp. gelatin 1 tsp. butter
1/2 cup cold water 1/4 tsp. salt
1 egg, beaten 1 tsp. fruit juice
1/2 cup sugar 1/2 cup evaporated milk combined with
3 squares (oz.) chocolate 1/2 cup whipping cream, chilled
1/2 cup water
Soak gelatin in water five minutes. Mix beaten egg yolks and sugar, pour heated, diluted milk over slowly, put in double boiler with gelatin, butter and salt. Cook until the mixture thickens. This takes about 15 minutes. Strain, beat 2 minutes, let cool. Melt the chocolate over hot water, let cool a little, then add the chocolate and vanilla to the mixture after it has cooled. Fold in the stiff egg whites, then the whipped cream. Turn into a mold and chill at least 4 hours. It may be chilled in individual dessert glasses.

Gen. A. C. Dalton, assistant quartermaster general of the army, recently named president of the Emergency Fleet corporation.

PRIMARY LAW OF ILLINOIS INVALID

Dixon, Ill.—The Illinois primary law has been knocked out by a decision of the circuit court here.

Invalidation of the law has no bearing on the huge "slush fund" disclosure of the senate committee meeting here last month but, unless the court's decision is reversed by a higher tribunal, Illinois may have to devise a new method of nominating candidates for public office.

Three times before in the history of Illinois the state primary law has been nullified by court decisions. In each previous instance the legislature has enacted a new law, eliminating the technicalities which were faulty. The latest decision, however, strikes at the vitals of the primary law theory, holding that it deprives the voters of their proper representation.

In rendering their decision the three judges of the circuit court, William J. Emerson, Harry A. Heer and Harry Edwards, held that the primary vote in Lee county, where the suit was filed, was invalid. The law, said the unanimous decision, violates the state and federal constitution.

MUST ABOLISH POORHOUSE

County Care for Helpless Declared Failure By Expert.

Des Moines, Ia.—Over the hill to the poorhouse is a road of needless misery and degradation.

This is the contention of Harry C. Evans of Des Moines, Iowa, appointed by Secretary of Labor Davis to make a national survey of poorhouse conditions. Mr. Evans' report has been made public here at the conclusion of two years of research.

Complete abolition of the system of caring for the poor by counties is recommended by the Des Moines sociologist. In its place he suggests leaving the problem entirely under the supervision of the state, consolidation of poor relief agencies, preservation of family life so that impoverished old couples may spend their last days together and the separate housing of criminals, the insane, paupers and homeless children.

Government Refund Not Taxed.

Salem, Or.—Funds accruing to Oregon counties under the Stanfield bill are in the nature of a donation from the federal government and are not to be classed as taxes by county courts in making up their budgets, Attorney General Van Winkle has advised E. N. Keeley, assessor for Lane county.

THE MARKETS

Spokane.
Hogs—Good, \$18.50@19.75.
Cattle—Steers, good, \$7.00@7.50.

MEXICAN REBELS ARRESTED IN U. S.

San Diego, Cal.—Facing charges of plotting a revolution in Mexico, 150 men, headed by General Enrique Estrada, former Mexican secretary of war, were in the county jail here as the result of a widespread round-up.

Along with General Estrada, his chief of staff, General Aurelio Sepulveda and Earle C. Parker, local hardware and arms dealer, also were captured.

Agents of the United States department of justice, aided by city, county and other federal officers, captured what was to have been an armed party of invading insurgents only three miles from the Mexican border. Information gathered by government agents led them to the appointed rendezvous at Dulzura where General Estrada and his staff were concentrating their forces preparatory to a descent upon the towns just below the border.

An armored truck, two 10-ton truck loads of rifles, machine guns and ammunition, other trucks for the transportation of men and supplies, and about 150 Mexicans made up the material and personnel of the captured expedition, while government agents also captured documentary evidence and complete sets of plans for the insurrection.

FOREIGN CONTROL OF LIQUOR INDICATED

New York.—Immediate organization of a "bureau of foreign control," in the prohibition department, to direct the practical application of the prohibition agreements between this country and foreign nations, was announced here by Brigadier-General Lincoln C. Andrews upon his return from Europe after reaching an agreement with English statesmen on the liquor smuggling situation.

It is even possible, he acknowledged, that the work of this bureau may entail sending prohibition men to foreign ports.

"My first work in Washington," he said, "will be to build up the machinery that will put into practical effect the compacts we now have with Canada, Mexico, Cuba and the European countries, and especially the agreement just consummated with England. I plan to establish a new, small bureau of foreign control, which will have active supervision of this work."

Although he would not disclose details of the agreement with England, General Andrews was highly elated with the result of his trip.

FAST MAIL IS ROBBED

Robbers Tie Up Clerks and Rifle Registered Packages.

Green River, Wyo. — Two masked bandits who concealed themselves in a mail car of the westbound fast mail No. 5 of the Union Pacific robbed the registered mail car of an undetermined amount and escaped.

According to the story told here by A. J. Miller and Jack Madigan, the two clerks in the car, the bandits concealed themselves in a car used only for storing mail and in which clerks enter only for sacks, which they take into the "working car" for sorting.

After the train had left Rawlins one of the clerks from the registered "working car" entered the storage car. The two robbers covered him with guns and tied him up. They then went into the "working car" and got the other clerk whom they also bound and brought into the storage car.

Washington State Protests Grain Rate

Olympia.—Protest against a threatened freight rate reduction on grain and grain products originating in Montana and North Dakota to the eastern seaboard was forwarded by the state department of public works to the interstate commerce commission in Washington, D. C., on the ground that it would disrupt the markets and give the middle west mills undue advantage over the mills of this state.

Pomerene Winner Over Woman Rival.

Columbus, Ohio. — Ohio democrats have nominated former United States Senator Atlee Pomerene to oppose Senator Frank B. Willis, republican, in the November election. Pomerene, who served 12 years in the senate defeated Judge Florence E. Allen by approximately 20,000 votes. Senator Willis was nominated by a plurality of almost 4 to 1 over his nearest opponent.

Cummins Fortune Left to Daughter.

Des Moines, Ia.—Senator Albert B. Cummins left the principal portion of his estate of \$70,000 to his only child, Mrs. Kate Cummins Rawson of Des Moines.
