**52 Billion Loaves in U. S. Wheat**

ENOUGH wheat will be produced in the United States this year to make 52,018,000,000 loaves of bread, according to the Sears-Roebuck Agricultural Foundation. The latest official estimates indicate that 839,000,000 bushels of wheat will be produced this year, and it is figured that 62 one-pound loaves of bread can be obtained from every bushel of wheat. Of the total estimated output 626,000,000 bushels were produced by winter wheat growers and 212,000,000 bushels by spring wheat growers in the Northwest. Last year the winter wheat production was 396,000,000 bushels and spring wheat 271,000,000. The present crop is above the five-year average of 802,000,000 bushels. The acreage devoted to the crop this year is put at 57,584,000 and the latest estimates place the production at 14.6 bushels per acre, the Foundation states. Winter wheat will run over 17 bushels per acre and spring wheat 10.2 per acre. Domestic needs are estimated at 640,000,000 bushels, so there will be more than 250,000,000 bushels for export. Prices are not as high as a year ago, but the crop probably will bring growers more than a billion dollars.

Here is just what you have been waiting for; a real
