Youth Not Worse

For a good while it has been the fashion among certain writers and speakers to condemn young people of the present, charging them with being wild, frivolous, immoral and what not. The escapades of the small minority have been held up as representing the tendencies of the entire body of modern youth.

Many thoughtful persons who are in position to observe real conditions do not take this view, however, but incline to the belief that the young generation will compare favorably with those of "the good old days."

President James R. Angel of Yale University is one who believes that the students of today seem on the average to be distinctly superior to those of former times in "breadth of outlook, sincerity, range and vividness of intellectual interest and essential stability of character."

As an educator for 35 years, President Angel has had the opportunity to observe many thousands of students. His views concerning present day youth is therefore entitled to respectful consideration. The chances are that he is right.

If you haven't registered yet, do so. Don't lose your rights as a citizen of this wonderful country in directing its destinies, by neglecting to maintain your voting power.

Some flurries in the stock market recently but biddie keeps laying the same size eggs and bossie comes across with the usual cream test. You just can't fluster them.

Aero planes must have been behind in their quota of accidents and deaths judging from reports of casualties in the papers the past week.

In spite of our depleted forests there has never been any lack of material for new Federal bureaus.

Chicago police have made a raid on the gambling houses in that city but the arsenals go unmolested.

Reports of Sandino's flight, capture and death appear to have been somewhat overdrawn.

Toots a Toot At Grade Crossings

The language of locomotives will blossom out with a brand new word on April 1, according to Geo. McCormick, Southern Pacific's general superintendent of motive power. "To-o-oot, toot-toot, to-o-oot" and will signify to motorists, pedestrians and others using the highways that a train is approaching a grade crossing.

Hitherto locomotives approaching grade crossings have sounded two long and two short whistle blasts, but this is now to be changed to the new signal - - - .

Combine Harvester School Success

Interest in combine harvesters was clearly demonstrated at O.A.C. last Friday when more than 150 farmers gathered for the one day combine school sponsored by the farm crops and agricultural engineering departments. In addition to prepared lectures by specialists on different phases of combine operation, every angle of the subject was also approached through open discussion and questions by farmers themselves.

Two machines were on the campus for demonstration purposes during the school. This was one of the best attended farmers' program given this year.

Automobilist Responsible

The recent supreme court decision fixing the responsibility for all accidents occurring at railroad grade crossings on the motorist, makes the following information of interest.

According to the Oregon State Motor Association the number of railroad grade crossings on class 1 railroads, representing 91% of the steam railroad trackage in this country increased in 1926. Grade crossings to the number of 1,184 were constructed in these roads during 1926, while the number eliminated was 1,158, of which only 195 were eliminated by the separation of grade.

Boys and Girls

Arnold Santl, a 6-year old boy of Villa Park, Ill., has already shown marked ability as a composer of music has been acclaimed a genius by members of the Chicago Civic Opera company.

John Mortimer Coward of Glen Ridge, N. J., at the age of 5 years has inherited nearly \$3,000,000 from his father, a wealthy shoe manufacturer, who died recently in Havana.

Known as "Young Samson" the 8-year old son of a famous strong man of Germany can bend heavy iron bars with his hands and drive nails into boards with his bare fists.
