

## Plenty of Power for the Hard Jobs

Everyone who has seen this compact, light weight tractor at work marvels at its power. We want you to see it—watch it in the field or at the belt—you will be surprised at the power of the

### John Deere Model D Tractor

This 15-27 H. P. tractor weighs only 4,000 pounds—power ordinarily wasted in moving excess weight in the field is applied to the drawbar of the John Deere. The John Deere is hundreds of parts simpler—it's the tractor of fewer and sturdier parts. Fewer moving parts reduce friction, one of the biggest power thieves in any engine. Belt pulley is mounted directly on crankshaft—no power loss. All operating parts of the John Deere are automatically oiled and completely housed in a dust-proof case—oil is positive, dust and sand cannot get in to cause friction, loss of power, and undue wear. John Deere one-piece frame holds all units in permanent alignment.

The great power of the John Deere will surprise you. Drop in and see this sturdy tractor next time you are in town. Let us arrange a demonstration.
