

Feel Tired and Achy?

Too Often This Warns of Sluggish Kidneys.

LAME? Stiff? Achy? Sure your kidneys are working right? Sluggish kidneys allow waste poisons to accumulate and make one languid, tired and achy, with often dull headaches, dizziness and nagging backache. A common warning is too frequent, scanty or burning excretions.

DOAN'S PILLS 60c

All Druggists 25c and 75c Red Packages.

CARTER'S LITTLE LIVER PILLS

A woman may not be able to drive a nail, but at driving a bargain she is in her glory.

Personal Comment
by Mrs. G. E. Tower

San Francisco, Calif.—"For the past seven or eight years I have taken Dr. Pierce's remedies off and on, that is, the 'Favorite Prescription,' and the 'Golden Medical Discovery.' I began with these when I was about grown. The 'Favorite Prescription' is the best medicine any woman ever took. The 'Golden Medical Discovery' is fine for the stomach—excellent for a person who is run down in health."

Mrs. G. E. Tower, 1105 Laguna St. Obtain now from your druggist, Dr. Pierce's famous remedies. Write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y., for free confidential advice.

POULTRY

WATCH INCUBATOR WHILE HATCHING

While many successful poultry growers are now buying day-old chicks for replenishing their flocks and for raising early broilers and pullets, there are still a great number of small incubators used on farms.

"Directions for operating these machines come with them," says Allen G. Oliver, poultry extension specialist at the North Carolina state college, "yet in most cases these directions apply only to the mechanical operation. We would not attempt to give specific rules that would work well under all conditions. The first hatch may be made when atmospheric conditions are ideal, resulting in an ideal hatch of strong chicks; the next hatch may give poor scrawny birds, even though the incubator ran perfectly. There are some few points to consider, however, in hatching out the early chicks this spring."

The normal time for an egg to hatch is 21 days, states Mr. Oliver. Too much heat means a hatch in about 19 days, and too little heat, in about 22 to 23 days. The temperature at the center of the eggs ought to be kept at 100 degrees. Moisture is next in importance. The amount of evaporation in the egg determines the size of the air cell at the end and the quantity of food left for the chick when it hatches. This also determines the size of the young bird. The operator of the incubator should watch the size of the air cell as the hatch progresses and add such moisture as is needed.

Ventilation is also important, states Mr. Oliver. This brings in pure oxygen and takes out the carbon dioxide. The egg is a factory with the materials in the shell as the raw product. By carefully regulating the heat and watching the size of the air cells it is possible to supply enough fresh air and the correct amount of moisture so that there will be little danger from lack of ventilation.

Turning the eggs stimulates the hatching chick to action and gives it exercise and strength.

Value of Hen Depends on Prices Prevailing

A hen may produce more eggs in a year than any bird in the flock, but yet is not as valuable as some other hen that produces less eggs. The hen that produces the largest number of eggs during the seasons of high prices will have the advantage in egg values over another bird which is idle at that period, and which may produce more eggs during the year. The real value of a hen will depend largely upon the persistency as well as intensity of production. Definite records have been kept at the North Dakota Agricultural college of the good laying hens.

"As an example, one hen produced 203 eggs in 1925, which were sold for \$8.75, while another produced 219 eggs which brought \$6.50. The second hen had laid 16 more eggs, but the eggs sold for 16 cents less due to the fact that this hen did a greater proportion of her laying during the spring and summer when eggs were cheap."

Poultry Notes

Always have feed and water available when lights are on.

Face the henhouse to the south. Make the north, east, and west side wind proof.

Ground oats may be used for growing stock or laying hens when fed in limited quantities.

Danger from overfeeding is lessened if the chicks are fed often and a little at a time for the first few days.

Red mites may be controlled by thoroughly painting the house with carbolineum. Spraying coal-tar dip is also effective.

The greatest need of poultrymen today is not more hens, but better producing hens. Hens that will return a larger profit on the feed consumed.

Eggs going into the machine are just as important as the incubator itself, in the spring hatch.

Many digestive troubles are avoided if no solid feed is given for the first 48 to 60 hours, in order that the yolk in the chick's body may be partially absorbed.

There are four different kinds of oat feeds employed in chick feeds. Oat flour is used in practically all mixtures. It may be made at home if one has a huller.

Rye, oats, or spring wheat, or other spring grains would be very satisfactory as a forage crop for geese.

Roup, in its first stages, is nothing but a cold—the result, in almost all instances, of drafty, poorly ventilated poultry houses.

A good poultry house should afford protection from storms and severe weather because a little shelter from the winds and storms will add to the comfort of the fowls and thereby increase the egg yield greatly.

New Dresses for The School Girl

By MAE MARTIN

Thousands of mothers with daughters of high school or college age, have problems like this Little Rock, Arkansas, mother. She says: "I don't believe I could have put my daughter through the last two years of high school and college without the help of Diamond Dyes. Dresses long out of style and faded were made new with a package or so of Diamond Dyes and the addition of a few dozen buttons and a little braid. Sometimes two dresses were combined and brought up to date in lines that gave no hint of their past. People never knew they were redyed when I used Diamond Dyes. They never take the life out of cloth or make it limp. They always make things fresh, crisp and bright."

Diamond Dyes are true dyes, like those used when the cloth was made. Tinting with them is as easy as bluing, and dyeing only takes a little more time. Insist on Diamond Dyes and save disappointment. They never streak, spot or run.

My handsome new book, "Color Craft," will help you with your clothes and home furnishing problems. Sixty-four pages of dollar-saving suggestions, fully illustrated in colors. It's FREE. Simply write Mae Martin, Home Service Dept., Diamond Dyes, Burlington, Vermont.

Death rates from heart disease, pneumonia, cancer, tuberculosis and diabetes were all higher in 1926 than in 1925, government figures show.

"WORTH WEIGHT IN GOLD"

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sanative Wash. The medicines that will do for me what the Vegetable Compound and Sanative Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound."—MRS. CHARLES MORGAN, R. F. D. 1, Tully, N. Y.

W. N. U., PORTLAND, NO. 18-1928.

Money Talks

"He says money talks."
"Yes, he found that out as soon as he married it."

There is nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it.

Aspirin is the trade mark of Bayer Manufacture of Monosaccharideester of Salicylicacid

Trees of Past Ages in Botanical Garden

Seedling trees of a species that represents the vegetation of Florida 100,000 years ago, during the glacial epoch, have been added to the collection in the New York Botanical garden as the result of a scientific tour of the state by Dr. John K. Small. The trees, which are known as Torreya, or locally as Savers, belong to the botanical genus Tumulon, and occur naturally in a small strip of territory along the east bank of the Appalachicola river, in the Florida panhandle. They occur nowhere else in the world, though related species are found in California, Japan and China. They resemble yew trees in some ways, and can be cultivated under the same sort of climatic conditions that favor the yew.

Beasts of the Jungle

The African wild buffalo, according to Martin Johnson, is one of the most dangerous customers on the trail—"a cutthroat from the word go." The zebra is silly and stupid, "a first-class rowdy." The leopard is a killer, "the gunman of the forest." The giraffe he calls "the creature that God forgot." The elephants are "the fine, upstanding, middle-class citizenry of the jungle." The rhinoceros is "always fighting, always grunting, always looking for trouble."
"I don't believe the average rhino has a friend in the world, even among his own kind."—Detroit News.

Autumn Wisdom

Claire Meredith, the brilliant poet, disembarking from a sumptuous liner, talked to a New York reporter about a retired actress who had condemned severely the immorality of modern plays, modern dances and modern youth.
"She's getting old," said Miss Meredith, "getting too old. When we get too old to set a bad example we begin giving good advice."

His Father's Boy

Aunt—What does your new baby brother look like, Junior?
Detective's Son—He's got small features, clean-shaven, red-faced, and rather bald.

Preacher Surely Had Right to Be Annoyed

E. S. Harkness, the philanthropist and patron of the arts who recently gave \$250,000 to the New York Memorial hospital for the purchase of four grams of radium, was talking at the University club against speculation. Speculation is demoralizing," he said. "There was once a country preacher who speculated in oil stock. A deacon asked him some time afterward: "Well, doctor, what have you done with that oil stock of yours?" "Done? I've been done. Got cheated out of it," the preacher said. "No!" said the deacon. "No! How come?" "Why," said the preacher, "I thought the stuff was valueless, you see, and so I unloaded it on a greenhorn for a song. But it turned out to be worth thousands, and that swindler who bought it from me knew it all the time."—Kansas City Star.

Grim Relic Now a Font

Near the Fiji village of Suva where reigned "King" Cakobau before he gave his island empire to Queen Victoria as an expression of good will, is a grim relic. It is a heart-shaped stone on which Fijian warriors in their unregenerate days smashed out the brains of their captives in war. The stone, which has a depression in the top, now is used by the reformed natives as a baptismal font.

Who's Responsible?

Father—Here, Billy, you shouldn't hit Harry. Because Harry hit you is no reason to retaliate.
Billy—Well, he retaliated first.

INSTALL CHAMPIONS NOW

Once again Champion reminds you that to enjoy maximum engine performance during the next twelve months you should install a complete new set of spark plugs now.

Champion is the better spark plug because of its double-ribbed silicon-iron core—its two-piece construction and its special analysis electrodes.

Champion X—for Model T Ford and Fordson Tractors 60¢
Champion—for all other engines including Model A Ford. 75¢

W.L. DOUGLAS SHOES

for MEN, WOMEN & BOYS

JUDGE THEM FOR YOURSELF!

The next time you need a pair of shoes, step into the nearest W. L. Douglas store or the Douglas dealer in your locality. You will be cheerfully shown all the latest styles and we believe you will be convinced that W. L. Douglas shoes are better in quality and style than shoes usually offered at such reasonable prices. Millions of satisfied wearers know this to be true.

More than a hundred W. L. Douglas stores in the principal cities and the most reliable shoe dealers everywhere are now showing the new Spring styles. A fair and square retail price stamped on the soles of Douglas shoes at the factory, guarantees honest value.

REMEMBER: We bought our leather before prices advanced and are passing on to all our customers, old and new, a saving which amounts to almost \$1.00 on every pair of shoes.

Men's \$5 to \$8—Women's \$5 to \$8—Boys' \$4 to \$5
Catalog of New Spring Styles mailed on request.
W. L. DOUGLAS SHOE CO.
173 Spark Street, Brockton, Mass.

TO MERCHANTS: If Douglas shoes are not sold in your town, write today for catalog and agency for America's Best Known Shoes.

Always Keep Cuticura Preparations On Hand

The Soap, because of its absolute purity and emollient properties, is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Stick makes shaving easy for tender-faced men. Cuticura Talcum is the ideal toilet powder.

Soap 25c, Ointment 25c and 50c, Talcum 25c. Sold everywhere. Sample each free. Address: "Cuticura Laboratories, Dept. 34, Malden, Mass."
