don't be satisfied with the commonplace!

You never saw the equal of these new electric ranges. Except for setting the clock and the thermometer when you put the food in the oven (cold), you don't have to watch or touch a thing until cooking is completed. No initial searing is required. No hand adjustments are necessary. No basting to do. No water to add. For "Flavor Zone" cooking is entirely automatic from start to finish and there's no guesswork about results.
