Are your children's eyes Ready for school work?

That children may develop physically, co-ordinately with the pressure of their school work, their eyes must have immediate attention. It is very important that children see clearly and comfortably. You will find the correction of imperfect vision will reduce nervousness and crossness, and bring about a willingness to do and new ambition to accomplish in study. Unusual advantages are offered here. You receive the expert services. Nothing is spared that your children may see as Nature intended them to. Do not neglect your children's eyes. Have them examined now.

The New McCORMICK-DEERING

That's what this modern machine can't help being—the perfected McCormick-Deering cream separator is so far ahead in design and appearance. It is beautiful to the eye—glossy black japanned with gold pin-striping! It has graceful lines. It is sanitary and easy cleaning, from the rounded supply can down to the open base, inside and out.

But the big things in the new McCormick-Deering are the ballbearing equipment at every high speed point, the wonderfully efficient bowl design and the positive automatic lubrication. These give you a surprisingly easy-turning separator, cleanest possible skimming whatever the condition of the milk, long life for the machine, profitable milking.
