Now We Can Show You the NEW McCormick-Deering Cream Separator

Ball-Bearings at all High-Speed Points

CAPACITIES: 350 to 1500 lbs. of milk per hour

Hand, Belted, or Electric

YOU may have seen the Harvester Company's announcement of their New McCormick-Deering Cream Separators. We now have the first of them in our store.

The New McCormick-Deering has many remarkable improvements. The machine now has high-grade ball-bearing equipment at all high-speed points. Its operation is the last word in light-running ease and durability.

A completely new bowl of skillful design, with a skim-milk-regulating screw controlling

the cream density, combines with other features to produce what we believe to be the cleanest-skimming machine on the market. Splash lubrication that completely lubricates. A supply can with outside faucet. Every provision for sanitation and easy cleaning.

The six sizes of the New McCormick-Deering fit every need—"from one cow to a hundred." You are bound to like this new machine. We will demonstrate here or on your farm with no obligation to you.
