Some people think they have
contributed their share towards

the support of their home town
paper when they have paid their
subscription, but the editor
knows that the major part of his
support comes from his advertis-
ers. You might tell the adver-
tiser that you saw his announce-
ment in this paper. It will help
him.

Wednesday, March 12, at Banks
Hotel. Adv. c 13-14

Experience has taught us that
there is no substitute for clean,
new ground for the young chicks.
If, however, it is impossible to
put chicks on new ground, gra-
vel placed about the runway of
the brooder house to a depth of
four or five inches will help. It
should extend at least 12 to 15
feet from the entrance.

FARM REMINDERS
The Orchardist may often use
oil as an effective dormant spray
but like lime sulphur, which
controls only San Jose scale, it
will not prevent later attacks of
scab, brown rot and other fungi
troubles.

Selection of vegetable varieties
before planting time may prevent
much grief at harvest time. Se-
lect not only according to sea-
son, locality and soil, but also
consider market requirements of
size, shape, color and quality. It
is easy now to determine what
are going to be the demanded
varieties. Grow what is wanted.
A suggested list of varieties can
be obtained from the section of
vegetable gardening at O. A. C.
