Henry is one Ford that will not run.

If you must kick, kick toward the goal.

The fiver that will not run is a standing joke.

One touch of scandal makes the whole world chin.

Five Pay Days hath March, May, August, and November.

The shortest day in the year is the one before a note falls due.

It's nice to stay in a hotel. You can get the towels as dirty as you like.

A woman may exaggerate other things, but it is different with her age.

What a lot of fellows would like to see invented now is a fireless employer.

This will be a great country when the application of good advice equals the supply.

You never win an argument with a taxi driver nor a telephone operator, snaps the editor.

The most fascinating thing about popular songs is trying to guess where the music was stolen.

Our own candid opinion is that we ought to have more people laying bricks and less throwing them.

The speaker at a dinner usually begins: "Mr. Chairman and gentlemen"—you see what he thinks about the chairman.

she moved from one part of the room to the other, she could tell whether she was near him or drawing away from him. Soon she had no doubts as to the fact that he was under the bed and deciding at all odds to remove him, took her umbrella and made a vicious jab under the bed. Seeing that the jig was up, the mouse ran out from under the bed and through the door to life, liberty, and the pursuit of happiness.

REVIEW INSTALLS

PAPER FILE

A number of people have asked what that strange looking fixture in the office was. Just to set them right we will say that it is a file for papers.

Some few weeks ago the editor was up to the high school and strolling into the manual training room got to watching the boys working and into a little chat with the teacher, Mr. E. G. Webb. Finally the thought came to mind that the boys might build some sort of a frame for a file to hang the exchanges that come into the Review office.

The boys did a very creditable job considering the material with which they had to work and now all that is lacking is the rungs that are to go across the frame, to hold the papers. If some kindly disposed subscriber will bring in some old broom handles, not to beat up the editor but to make rungs from, we will be much obliged.

The function of a newspaper is to render service to the community. We have conceived the idea that perhaps a file of all the newspapers published in this vicinity would be of interest and value to the community. Then anyone who wants to see the papers can come in and read them.

Put down the number of your living brothers.
Double the number.
Add three.
Multiply the result by five.
Add the number of living sisters.
Multiply the result by ten.
Add the number of dead brothers and sisters.
Subtract 150 from the result.
The right hand figures will be the number of deaths.
The middle figures will be the number of living sisters.
The left hand figures will be the number of living brothers.
Strange freak of figures, isn't it?

SOUTHERN PACIFIC ADOPTS MANY SAFETY SUGGESTIONS
The constant effort of the Southern Pacific Company and its employees to eliminate all forms of accidents is shown in an annual report just issued on safety work for the year.

During the twelve-month period a total of 3420 safety suggestions were made by employees. Of these, 2470 were approved. Some of the suggestions were not found feasible and the remainder are still under consideration.

W. S. Osbourne, machinist at the Los Angeles Shops, led the list of employees with 1874 credits for his work in promoting safety. Others with high standings included G. W. Rushton, Los Angeles; A. H. Morgan, Sacramento; C. B. Baker, Portland; and A. M. Balzarini, San Francisco.

UNIQUE PICKLING PLANT OPERATED BY RAILROAD

A pickling plant is operated by the Southern Pacific Company.

Such a plant may seem to be a novel adjunct for any railroad. However, it may be stated that cucumbers or other vegetables are not placed in the brine at the Southern Pacific's pickling plant.

Instead, the plant, located on the western shore of Great Salt Lake at Lakeside, Utah, is used to "pickle" heavy timbers used in maintaining the eleven miles of trestle over which trans-continental trains "go to sea by rail."

All timber for the lake trestle is placed in the brine enclosure for a period of ninety days before being used. The "pickling" process preserves the wood. The life of the timber thereby is materially lengthened and the cost of maintenance decreased.

The Great Salt Lake trestle constantly is under close inspection in order to assure complete safety to the many trains passing over the lake.

CROSSING FLAGMAN WINS FAVOR AS SKETCH ARTIST

A Bohemian Atmosphere is not a necessity for the advancement of art.

This is evidenced by the case of J. J. Lynch, 67 year old flagman employed by the Southern Pacific Company at the H Street Crossing at Modesto, California. Lynch, formerly member of a section gang in Oregon, is a natural artist and devotes much of his spare time in drawing pictures that have attracted favorable attention from persons who passed his crossing. Lynch says he enjoys the work and that he has never taken a lesson in drawing.

Household Dept. VALUABLE HOUSEHOLD RECIPES AND SUGGESTIONS

To prepare coconut, cut a hole through the meat at one of the holes in the end, draw off the milk, pound the nut well on all sides to loosen the meat, crack, take out the meat and set the pieces in a cool open oven over night or for a few hours to dry, then grate. If all is not used, sprinkle with sugar after grating, spread out in a cool dry place, and it will keep for weeks.

To blanch almonds, pour boiling water over them, let stand a moment, drain and throw them into cold water, slip off the skins and pound or chop.

In baking layer cake it is important to thoroughly grease the tins, grease, and grease again. After using rub off with a coarse towel till they are free from all particles of cake, grease and use again.

then the flour very gently, then the vanilla; do not stop beating it until it is put into the pan to bake. Bake forty minutes in a moderate oven, try it on a stick and if too soft let it remain a few minutes longer. Do not open the oven until the cake has been in fifteen minutes. Use a pan which has never been greased. Turn the pan upside down to cool, and when cold take out by loosening around the sides with a knife, lee with the following icing: the whites of two eggs and two teaspoons of granulated sugar; boil the sugar until clear with just water enough to moisten it. Beat the eggs to a stiff froth and pour the boiling syrup very slowly over them, beating constantly; add a little extract of lemon.

Sponge Cake—Beat the yolks of four eggs smooth, add a cup of sugar and beat five minutes or more; beat the whites of the eggs to a stiff froth, stir in, add one cup of flour as swiftly and lightly as possible, and bake at once.

Bread Cake—Three coffeecups of bread dough light enough to bake, two and two-thirds teaspoons of sugar, one teaspoon of butter, three eggs, one nutmeg and a teaspoonful of cinnamon; mix together thoroughly; add raisins and fruits as desired. Let it rise for an hour in the pan in which it is to be baked.

Spice Cake—Take a teaspoon of butter, two pounds of brown sugar, and three eggs; beat all together,

then add a half a cup of sour milk with a teaspoonful of soda in it, two teaspoons each of ground cloves, cinnamon and allspice, nutmeg, then two and two-thirds cups of flour, and last of all two cups of chopped raisins. Bake in a slow oven.

Quick Cake—Stir together one cup of sugar, one-half cup of butter, and one egg; then add a cup of sour milk, a teaspoon soda, three cups of flour, and one cup of raisins. Stir well a handful of flour among the raisins before putting them in, and add them last, and they will not settle to the bottom of the cake.

Jelly Roll—One cup of sugar, one cup flour, three eggs, three tablespoons water, one teaspoon baking powder, and flavoring to taste. Bake and spread with jelly and roll while warm.

Jelly Cake—Two eggs, one cup of sugar, one-half cup of milk, one tablespoonful of butter, two and two-thirds cups of flour, three teaspoonfuls of baking powder. Bake in layers and spread with jelly.

Lemon Cake—Two cups of sugar, one cup of butter, one cup of sweet milk, one cup of corn starch, two cups of flour, the whites of nine eggs, five teaspoonfuls of baking powder. Mix flour, corn starch, and baking powder together, add the whites of the eggs beaten to a stiff froth. Bake in layers in jelly tins. For spreading layers: one lemon grated, one cup of sugar

and the whites of three eggs beaten to a stiff froth.

If yolks of eggs are left, they will keep for several days if thoroughly beaten and set in a cold place. The whites of eggs to keep must not be beaten, but set in a cold place.

WANTED and FOR SALE

For Sale—Horse, buggy and harness, \$35.00. Inquire at J. H. Kitterman's Blacksmith Shop, Banks, Oregon. Adv e-15-16

HOORAY!
1922, AND
"HOORAY"
I MEANS,
DOG NABBY!

"Twins" The Man Hollers, "Hooray!"

THEM TWO LIL EXEMPTIONS JEST ERASES MY NAME FROM TH' INCOME TAX LIST!

Two salesman were swapping tales on the relative faults of two of our prominent railway systems. The first traveler finished up by saying, "On my last trip through here it was so smoky that we had to leave the door at the rear of the coach open in order to let the smoke out." "That's nothing," came back the second, "You get so covered with soot on our line that the last time I got off the Pullman one of the ladies on the platform handed me her suitcase and tipped me a quarter!"

As she entered the room she felt that there was some one else in the room and it was the inquisitive nature of the woman that caused her to investigate and see if he could be found. As
