Famous Last Words—"Watch me pass him at the next corner."

You don't need a license to hunt trouble nor dogs to scare it up.

You will find the world frowny mellow as you grow mellow.

Some people have made a decided success in life by attending to their own business.

The reckless driver must go. We all know that. But the reckless driver thinks he must go fast.

Health hint to Motorists: A lightning bug is about the only one that can get along with just a tail light.

A man is but a worm of the dust—he comes along, wiggles about a while and finally some chicken gets him.

When the road builder encounters boulders or rocks he does not let them swerve him from his course. Do you?

Let us then be up and doing. Otherwise we may be done; still achieving, still pursuing. Advertise and get the mon.

Find one who boasts that he is not a "party man" and you will find one who seldom votes but is always "ag'in" the government.

One trouble seems to be that the girl who has the initiative to make a Leap Year proposal probably will turn out to be a back seat driver.

Tell me not in mournful numbers Advertising is a dream, For the business man who slumbers Has no chance to skim the cream.

When the teams came trotting on the field and the substitute players ran to the bench, a young woman who knew more about motorizing than about football remarked:

"My, haven't they a lot of spares?"

BY GOLLY An old resident of Alaska had never seen a motor car. One day he was astonished to see one go by, but was dumbfounded when it was followed by a motorcycle.

"How white!" he exclaimed, "that's a new kind of thing, but I don't like it."

The speeding motor car passed, eddying with a tail wind, and a young woman who knew more about motorizing than about football remarked:

"That's no use trying to outdistance them, young fellow, because if you do, you'll be a back seat driver."

If a lady are some people to make trouble. A few days since a lady had an editor arrested for slandering. It seems that the lady had written in the local paper:

A CLEVER PARTY

A party in an automobile saw a baby calf getting its dinner in Nature's way.

"Oh, see the 'self-help' restaurant," exclaimed one of the party.

"Yes, it's a Child's restaurant!" said the little girl.

"And it is also 'A Cafeteria,'" said the chauffeur, as they rode on.

CASES OF DISTRESS

There are usually in most communities some folks who at times are very hard up for the absolute necessities of life. Frequently such persons have been so industrious and have so much pride in self maintenance, that they would have to feel extreme destitution before they would say a word about their distress.

This country has never one much in the way of old age pensions, feeling that it was better to throw the principal responsibility for the support of needy persons in old age on friends and relatives and to encourage savings. But as it has not taken up this line of benevolence to any extent, it is all the more obligatory to look out for real cases of need on the part of deserving people. When a person who has tried hard, lacks for absolute necessities of life in this land of abundance, someone ought to discover that condition, and see that it is remedied by private charity or by public benevolence.

HOW TO MAKE YOUR ADVERTISEMENTS PAY

Few merchants really have the proper appreciation of what advertising means to them. A writer in an exchange aptly puts it this way:

If a man spoke to his wife only once a month or every two months, she wouldn't even recognize his voice. Yet some men advertise once a month or every two months and then wonder why they don't get more business. Advertise every week. Remember "the used key is always bright." The store that tells the public what it is doing regularly is the store that gets there in the end.

NO RATS OR ROACHES REACH THIS CABINET

Alabama Women Inspired by Home Demonstration Club.

(Prepared by the United States Department of Agriculture.)

Because she liked carpentry, and needed an inexpensive kitchen cabinet, Mrs. M. C. Leavelle of Buhl, Ala., decided to make one for herself. Her husband became interested and assisted her, she states in a letter to the United States Department of Agriculture, adding that the inspiration for making the cabinet, as well as other kitchen improvements, came from the home demonstration club and county home demonstration agent.

"The dimensions of the cabinet," says Mrs. Leavelle, "are 34 feet high, 46 inches wide and 2 feet thick. It consists of one large drawer and two medium-sized drawers in the bottom section. Over this section is the table 46 inches long by 27 inches wide, which is covered with white oilcloth. The top section consists of one long box on the left side for flour and sugar, a dish closet and two small drawers on the right side. The lumber I used is poplar, which came from our farm. The doors of the top section are made of screen wire. The total cost, including wire, latches, hinges and oilcloth, did not exceed \$10. The tools used in making the cabinet were a hand saw, hammer and draw-knife. My cabinet has a double advantage over many I have seen in that it is rat-proof and roach-proof."

With her husband's assistance Mrs. Leavelle has added to their home, since joining the Home Demonstration club, a kitchen sink made of wood and lined with sheet iron, a barrel for a water tank, a fireless cooker, a baby bed and a library table. The making of these articles has saved them money and Mrs. Leavelle is very proud of them.

FAVORED FOR SCHOOL LUNCH

Appetizing Combinations Suggested by Department of Agriculture Specialists.

The following menus suggested by the United States Department of Agriculture for the children's lunch basket may remind the mother of some combinations not recently thought of and thus afford a change from the usual monotony of sandwich lunches.

Crisp rolls, hollowed out and filled with chopped meat or fish moistened and seasoned or mixed with salad dressing; orange, apple, a mixture of sliced fruits or berries; cake.

Lettuce or celery sandwiches; cup custard; jelly sandwiches.

Cottage-cheese sandwiches or a pot of cream cheese with bread-and-butter sandwiches; peanut sandwiches; fruit; cake.

Hard-boiled eggs; baking-powder biscuits; celery or radishes; brown-sugar or maple-sugar sandwiches.

Bottle of milk; thin cornbread and butter; dates; apple.

Raisin or nut bread with butter; cheese; orange; maple sugar.

Baked bean and lettuce sandwiches; apple sauce; sweet chocolate.

HINTS SUGGESTED ON BAKING

Ovens are of Varying Sizes and Construction and Same Results Not Always Obtained.

Ovens of varying sizes and construction do not always bake in the same way, even though the thermometer in every case. A joint will roast, or a cake or loaf of bread bake quite as well in a large, heavy oven (coal range, heavy "freeless" gas range) at a temperature 50 degrees lower than in a smaller, thinner walled gas-range oven through which a blast of hot air is rapidly circulating, says the United States Department of Agriculture.

The larger sizes of loaf, roll, muffin, potatoes and such usually require lower temperatures for longer periods, and the smaller sizes higher temperatures and shorter periods, other things being equal.

The shape of the loaf or roll is important. A half-pound sponge cake or angel-food cake baked in a Turk's head pan (center tube) stands a comparatively high temperature better than does the same weight of cake baked as an ordinary loaf.

The composition of the batter or dough largely governs the baking temperature. A plain loaf cake containing comparatively little sugar, egg and fat (i. e., a "cheap" cake) requires greater care and a more gradually applied heat than does a richer cake; it should, therefore, be put into a cool oven in order to get the best results.

Cabinet is Rat and Roach-Proof.

ber I used is poplar, which came from our farm. The doors of the top section are made of screen wire. The total cost, including wire, latches, hinges and oilcloth, did not exceed \$10. The tools used in making the cabinet were a hand saw, hammer and

RECIPE FOR MAKING DIXIE RELISH

Putting Up Supply of Dixie Relish.

(Prepared by the United States Department of Agriculture.)

Club girls under the direction of the United States Department of Agriculture and the State agricultural colleges, put up a great many novel products according to standard "4H" recipes furnished by extension leaders. One of the most popular of these products, especially suitable for making in the fall, is "Dixie Relish." Here is the recipe:

Dixie Relish.

4 tablespoons mustard seed.
2 tablespoons celery seed (crushed).
3 cupful sugar.
1 quart vinegar.

1 quart chopped cabbage or choyotes.
1 pint chopped white onion.
1 pint chopped sweet red pepper.
1 pint chopped sweet green pepper.
4 tablespoons salt.

Soak the peppers in brine (1 cupful salt to 1 gallon water) for 24 hours. Freshen in clear, cold water for one or two hours. Drain well. Remove seeds and coarse white sections. Chop separately, and measure the chopped cabbage, peppers and onions before mixing. Add spices, sugar and vinegar. Let stand overnight covered in a crock or enameled vessel. Pack in small sterilized jars and process in hot water bath for 15 minutes at 180 degrees Fahrenheit (sterilizing temperature).

FARM REMINDERS

Move the brooder house on to clean ground. Coccidiosis, round worms and roup may be waiting for the chicks on last year's runs. It does not pay to treat chickens for these diseases but it does pay to prevent them getting the diseases.

Scions for grafting may be collected now. One year old, healthy, vigorous, firm wood is best. They may be kept until used by burying in sawdust or tightly damp moss or by putting the bunches of cut ends in damp sand and wrapping the tops in a wet cloth.

Weevil infested beans and peas can be treated with carbon-bisulfide to destroy the weevils before planting. The seed to be treated is usually placed in a tight receptacle of some kind and the liquid either poured over

them or placed in a saucer on top of the seed. The container is covered and left for 24 hours. The dosage is one and one-half ounces for 10 cubic feet of space. Dipping the seed in boiling water and immediately cooling will destroy most of the weevils. The new crop is usually infested by planting infested seed.

All seed potatoes while still dormant should be given the corrosive sublimate treatment.

MONUMENTS

Look now on you can purchase Monuments and Markers in both Marble and Granite for a great reduction in price a saving to the purchaser of from 10 to 25 percent. Come and be convinced. Corner 4th and Main Streets, Hillsboro, Oregon, M. N. LEWIS & CO.

FOR COUNTY CLERK

Edw. C. Luce

To the people of Washington County:

The above named will be a candidate at the Primary Election, May 16, 1921, on the Republican ballot for the office of County Clerk. If nominated and elected will use my best efforts and experience to conduct the office as prescribed by law and for the best interests of all concerned therein. Past favors are again acknowledged and appreciated.

Yours respectfully,
Edw. C. Luce,
Adv. c 17-1f
