## COUNTY CRUSHER

### BELTS STOLEN

The county rock crusher, one mile east of town, was stripped Monday night of all its belts, valued at about \$400, by thieves. Johnson and Spies have been operating this crusher.

When the feeder, Earl Fisher, started to oil up the machinery Tuesday morning he missed the belts. Oscar Johnson motored to Hillsboro and notified Sheriff Alexander.

It is believed that the robbers started towards Portland with their haul.

## HERE'S A PICTURE WITHOUT A HERO

Can you imagine a motion picture without a hero—or a "heavy"?

"Vanity Fair" has none. You may remember that Thackeray's own sub-title for the book was "A novel without a hero." Hugo Ballin gave a literal transcript of the volume in his screen adaptation. This does not mean, however, that the men in the picture are lacking in heroic potentialities. With Harrison Ford and Earle Foxe in the cast this could hardly be the case.

There is no typically "heavy" character. Thackeray's keen touch into human nature enabled him to show the good and bad tendencies in the same person. Whether you love Becky Sharp, as interpreted by Mabel Ballin, or frown upon her; or whether you like best George Osborne, Rawdon Crawley, or the faithful Dobbin, will depend entirely upon your own individuality. No choice will be forced upon you. "Vanity Fair" will be the attraction at the Pacific Theatre Saturday and Sunday.

## Local Schools

### Open Monday

#### Personnel of Board is Same; Two New Teachers in High School and One in Grade School

The local schools open next Monday, September 8, when it is expected that a larger attendance will be enrolled than on any previous opening date. It speaks well for the confidence of the district in their school board that the same personnel will have charge of the school who have had charge during the past year. F. W. Gady is chairman, Dr. C. E. Mason and L. R. Dean are directors and J. B. Kamberger is clerk.

Practically the same corps of teachers will have charge of the instruction this year as was employed last year. The two exceptions in the high school are for reasons over which neither the teachers themselves nor the board had control. One lady, whose husband has just set up a practice in Portland felt that it would hurt her husband's prestige if it were known that his wife was teaching school. The other lady got married. In the grade school there is but one change.

The teachers in the high school are: J. P. McGlasson, Superintendent; I. R. Metzler, Principal; D. U. Cochran, E. G. Webb, Beth C. Metzler, Florence M. Dewhirst; Gertrude Lanning who will take Mrs. Lucas' place and Geneva B. Kinney, Domestic Science, who will take Miss Peterson's place.

The teachers in the grade school are: Merle Davies, Principal; Edna McCord, Inez D. Sulte, Reba C. Marlin, Agnes C. Nelson, Ethel B. Ferrey, Lena Godard, and Elizabeth Johnson who will take the place of Lena Reynolds.

## BULL FIDDLE LURES LIONS

Stan Laurel, bull fiddle in hand, prepared to stalk the lion in his lair. Gently seizing the bow, he drew it across the strings and waffled sweet melodies through the jungle—very sweet melodies. In fact, they were so sweet they brought out all the lions for miles around. And then the fun began.

Jim Finlayson as Stan's assistant, was skeptical over these novel methods of his chief's. "If you get a lion with that bull fiddle," he remarked, "I'm going giraffe hunting with a clarinet." But Stan got the lions, all right, as you may see for yourself when "Roughed Africa" is shown Saturday and Sunday at the Pacific Theatre.

## SOME BOY!

The boy stood on the railroad track, The train was coming fast; The train got off the railroad track, To let the boy go past.

## NOTED STARS TO MAKE PICTURE HERE

Our town will soon be the center of the motion picture industry in the Northwest. Such well known stars as Tom Moore, who for years has been in the forefront of moving pictures and Zasu Pitts will soon be walking the streets of Beaverton, acting at the Beaverton studio, spreading on the grease grease paint and promenading under the arc lights in a way which makes us think of the time when the Oregonian spoke of Beaverton as "Oregon's Hollywood."

It is true that the column and a half article in the Sunday edition of that notable journal claimed that the production was to take place in Portland, but it had the grade to put away down in the last paragraph a mention that the interior sets would be shot "at the Premium Pictures Studio in Beaverton."

The production for which sets are already being made, is called "The Greatest Thing." It was written by Lewis Mumford, the author, producer and director of one of the latest of the big pictures, "The Chechacos." Tom Moore will have the leading male role and will be assisted by 15 or 20 actors of ability, among them Lester Conklin, Mary Alden, Jean Herrold, Russell Simpson, Frankie Darrow, Tom Galberry, Blanche Payson, Eddie Phillips, Clara de Lorez, Stanley Blystone, Frank M. Clark, Anna Lockhart, and Ray Thompson. The last word we received was that the leading lady had not been chosen but it is expected that in a very few days she will be. Jack La Mond, who we believe did the camera work for "The Trail of Vengeance" and "Shackles of Fear," has been secured to photograph the production. It is believed that this picture will exceed anything before attempted in the local studio.

## SAVE SOME OF YOUR OLD CORN

The spring of 1924 was unusually backward in many sections. Following this, the growing conditions were not good, with the result that the bulk of the corn is extremely late in the Corn Belt and northward. It is so late that most of the crop will be unfit for seed unless frost holds off longer than usual.

The United States Department of Agriculture is calling attention to this fact at the present time in order to prevent, if possible, a serious seed-corn situation in the spring of 1925. The higher prices for corn are drawing much of the old crop from the farms. Farmers not having enough seed corn for 1925 left over from last year's supply should save the best of their bulk crib corn from which to obtain seed, if necessary. If this year's crop is killed by frost before it is mature, this old corn will provide a source from which seed can be selected for planting in 1925.

## New Theatre

### Ground Has Been Broken for Up-to-Date Structure; J. H. Yeager Bought Freeman House

When we mentioned that negotiations were pending looking to the sale of the Freeman residence on Broadway we had no idea that the purchaser was the new baker, Mr. J. H. Yeager. To the best of our belief the deal was closed last Thursday. Mr. and Mrs. Freeman taking the Portland property of Mr. Yeager and the new Beaverton Bakery taking over the Freeman residence.

Mr. Yeager will as soon as possible build a store front out to the street in front of the west end of the Freeman residence. This will be used for a sales room while the baking proper will be done in what is now the west part of the house. The east part of the house and upstairs will be used as a residence.

## GOVERNOR PIERCE TO SPEAK AT PICNIC

The Washington County picnic and get-together meeting will be held Sunday, September 14th, rain or shine, in Spute Park, Hillsboro. In case of rain the auditorium will be used. Everyone is to bring his own basket lunch. There will be fine shade, lots of good water, and a fine place to picnic.

The committee in charge of details has been notified that Governor Pierce will be present and make a speech. Dr. George Parrish, State Health Officer, will speak, and it is hoped that one of the speakers will be Dr. Harold L. Bowman. They will have a real message for the people of Washington County. There will also be some good musical entertainment on the program.

Everyone in Washington Co. is invited to attend.

### FARM REMINDERS

Seed produced in surplus quantities for sale is cleaned before being disposed of by most Oregon farmers. The same practice is recommended by the experiment station for all farmers who sow their own seed. One or two fannings in a good mill will remove weed seeds, chaff, dirt, or foreign seeds that are lighter or heavier or larger or smaller than the seed that is being cleaned. Also many shriveled and diseased seeds are removed in the fanning mill. Most mills will clean and grade clovers, grasses, wheat, oats, barley and corn.

For the control of bean weevils, which devastate not only beans but peas and some other stored products, the use of carbon bisulfide is the remedy prescribed by the O. A. C. Experiment station. The infested products may be assembled in a container almost airtight at the sides and bottom or on the floor of a nearly air-tight bin. The bisulfide is poured into a saucer or tin lid placed at the top of the container or over the products and allowed to evaporate. The gas, which is heavier than air, sinks to the bottom and destroys the insects in either the larva or weevil stage.
