Mr. and Mrs. Anthony Leis of Salt Lake, Utah, are receiving congratulations on the arrival of a ten pound boy. He is called Bernard Anthony after his grandfather. Mr. Leis is the son of Mr. and Mrs. Bernard Leis of Beaverton.

Slip's Garage reports that they had very good success in taking care of their customers in the recent cold spell. Not a single item of damage was done to one of their customers' cars, the garage having kept the water in the radiator, tested to the proper degree of non-freezing solution.

Feeding frozen kale or cabbage leaves is unwise. It is best to thaw out the leaves by dipping them in water.

OBITUARY

(Continued from first page) est with little to eat except the game they shot with their old trusty rifles, and established a camp, built their log cabins, and proceeded to establish a home for their families, to which they brought their wives and children in 1867.

It was a strenuous life the two families led in the wilderness. Sometimes scarcely enough food for a bare existence was in evidence, while at other times food was plentiful. The older children tell of their pleasure when company came because then they could have white biscuits as at other times they subsisted on corn bread stirred up from corn meal and water with small amounts of shortening and saleratus. We might go on indefinitely, almost a full of the hardships met by the old pioneers who blazed the trails which today are followed by automobiles traveling on a concrete pavement. Many are the stories of hunting deer and bear with pocket knife and hatchet only to secure the game to feed the wives and little ones.

In this cabin built in the wilds four children, three girls and a boy, were born. After the new house was built, two other girls were born.

Where now sugar beets grow the pioneers gathered their sap from the maple trees and boiled it down to get the sugar to sweeten their few pies or the syrup to spread on their pan-cakes. Modern now coal is burned in modern furnaces or fabulous prices are paid for wood the old pioneers cut down the forests and burned the trees which today would be worth thousands and thousands of dollars.

Of the eight children born to them seven grew up, were married, practically all of them, on the old homestead and for a great many years all except one made their home in the immediate vicinity. It was only after the last baby was married, that they began to scatter.

Never since entering the government service in the Civil War was John's health what it should have been. Weeks and months have been spent in bed, yet in spite of this a big work was done and a large family reared in health and plenty.

He died of general breakdown and old age at the home of the youngest daughter who was born in the old log cabin. After a short funeral in Hastings, where the daughter lived, the remains were taken to Kingsley, Mich., for interment beside the wife who had passed away but a few years ago, and since whose death the husband had made his home with first one and then another of the surviving children in Michigan.

Your editor just received a photograph of five generations, the great, great-grandfather, the great grandmother, the grandmother, the mother, and the son, so there must be at least four generations left to mourn the lost, besides several half-brothers and half-sisters, of whose names we are not certain because several have passed away in the last few years.

Among the survivors are Byron, Sam, George, Homer Hullett of Grand Traverse County, Michigan, and Mrs. Alice Parmer of Aberdeen, Wash.

Of the immediate family, Arvilla, the oldest died about a year ago. Estella Greglow of Hastings, Mich., Irene Pender who died about twelve years ago; Alma Telford of Hastings and her twin Allie, who died when about 18 months old; Henry, your editor; Laura Lutz, who died in 1907; and Hazel Kruto, now of Jackson, Mich. The son and three daughters still survive.

Mr. Hullett had been a firm believer in Universalism, that Christ came to save sinners and that if they accepted him they might be saved. Besides his immediate families of the four generations spoken of above, he leaves to mourn his loss a regiment of friends and a host of acquaintances who followed with bowed heads to the last resting place of the last of the old pioneers who settled the Michigan wilderness in that vicinity and who did so much to make Michigan the great commonwealth we know of today.

WILD WEST IN EAST

Friend—What's the idea in cutting all those notches in the steering wheel? To keep your hands from slipping?

Autoist—None—Western habit of mine. Every notch is another pedestrian run down.

Chopped alfalfa or clover hay soaked in warm water may be used as a substitute for the most succulent green feeds for poultry. Nothing else will throw the pullets off production quite so quickly as the absence of green feed.

A REAL SANTA CLAUS

THE Christmas trees the chief problem is how they are to be obtained. The cutting, shipping and selling of Christmas trees has developed into an established business, extending over the entire country. One large shipper of New England has been in the business forty years and in that time has sold many thousands of carloads of trees. Some of these have been shipped as far south as Texas and as far west as Chicago. This pioneer in the industry is now eighty-two years of age, but he is still active, and curiously enough he is a real Santa Claus in appearance.—Frank Herbert Sweet. (© 1924, Western Newspaper Union.)

Perhaps Little Stars Knew About Christmas

THE stars shone brightly overhead. Below, the snow was covering up the hard ground, which did not seem to understand Christmas. It was much too hard for that. It was better that Old King Snow should come along and cover it up, giving the people a white Christmas.

The stars shone down upon a little farm house. It was not a palace. It was not even a beautiful house. But the stars shone very brightly.

Perhaps they knew, bright little stars that they were, that in that house, as in many another house which is neither a palace nor a beautiful residence, there was great happiness and glorious celebrating of the beautiful Christmas.—Mary Graham Bonner. (© 1924, Western Newspaper Union.)

Mrs. R. E. Hanna is on the sick list.

Mrs. Rux of Reedville is moving into the Telephone Office. She is the new Manager of the Exchange.

We find it necessary to again call the attention of our patrons and friends to the fact that we are no longer connected in any manner with the Beaverton Plumbing Co., but are doing business under our own name, W. I. Noyes, Sanitary Plumbing. c 5 1f

J. M. Baker and family of Hornbrook, California, spent the holidays with Mrs. Baker's parents, Mr. and Mrs. C. E. Hedge. They reported that on the way up they encountered terrible roads and were sometimes sorry they started out but on the return trip they found the roads much improved.

IMPORTANT FACTORS IN PRUNE SURVEY

Prune production in Oregon is found chiefly in the Willamette valley and the Umpqua valley, says the O. A. C. extension report on the cost of prune production. To get facts on the production, typical orchard areas in Polk and Washington counties were surveyed to represent the Willamette valley, and in Douglas county to represent the Umpqua valley.

About every condition as to soil, topography, air drainage, water drainage, distance from market and type of farm was covered, showing the following: On soils of Melbourne loam were 29 farms, Olympic 16, red upland clay loam 18, bottom land 25, and not classified, 34; on level bottom land were 18 farms, level bench 16, rolling 16, northern slope 22, southern slope 28, west slope 5, east slope 5, and not classified 6. Good air drainage was found in 107 farms, fair on 4 and poor on none; same condition for water drainage.

The 111 farms and facts concerning them were distributed in Washington, Polk and Douglas counties in the order as named. Number of farms—38, 24, 39; total acres in farms—9279, 3060, 12,508; acres in bearing prunes—578, 799, 976; age of bearing trees—8-25, 9-13, 12-26; acres nonbearing prunes—16, 14.5, 19; average age non-bearing trees—4, 3, 2.7; tons dried prunes produced—641, 727, 1111; average lbs. dried prunes per acre—2247, 1867, 2277.

These prunes were grown on either diversified or special prune farms as follows. On diversified farms, 13 in Washington, 8 in Polk and 14 in Douglas; on specialized prune farms the numbers for the 3 counties are 25, 16, and 35; average distance to market—5.2, 3.2, and 8.2 miles.

For Sale—100 cords of old growth fir wood, dry. Piled on Scholls Road, one mile west of the Robinson Station. J. S. Campbell & Son, p 5-6

ORANGE SPECIAL TWO DOZEN FOR 25c Kamberger's Confectionery

DISINFECTING FOR FILBERT BLIGHT

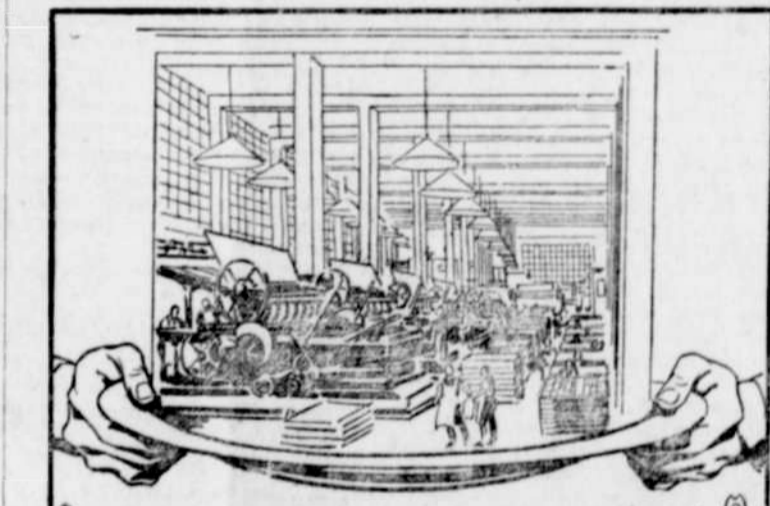

Pruning for bacterial diseases in plants, such as fire-blight, bacterial gummosis, and filbert blight should always be accompanied by the use of an effective disinfectant. Results at the experiment station prove that under Oregon conditions there is no superior to Reimer's solution consisting of one part by weight of corrosive sublimate and one part by weight of mercuric cyanide, dissolved in 500 parts by weight of water. This can be prepared by any druggist and should be used to disinfect both wounds and the tools.

The method of disinfecting is to dip or drop the tools in this solution.

In pruning filberts, cutting tools should be disinfected when passing from one tree to the next. In fact where a tree is known to be infested, it might be advisable to disinfect after each cutting. It takes time and trouble but there are filbert orchards in Washington County which have been damaged thru failure to disinfect when passing from one tree to another.

Student—Law is a wonderful thing for civilization. Very few people go to jail.

Cynic—Yes, but how many should be?

A Modern Printing Plant at Your Service

The BEAVERTON REVIEW

Mrs. Ray Mahler is reported suffering from an attack of influenza.

The windows have been replaced in the new Hedge Bldg., which were broken during the recent cold snap. It is quite generally conceded that the reason for the breaking was that there was just 13 lights in the store front. Mr. Hedge says his attention has been called to that fact several times—since they began to break.

The J. J. Fleming Productions, Inc., had started building scenery for another production just as the cold snap set in but were forced to discontinue operations. It is reported that Jack Frost did \$600 worth of damage to the plumbing in the studio. Work has been resumed and it is expected two companies will be busy taking pictures in the near future.

ADDITION MADE TO U. OF O. CAMPUS

With the gift of an 88-acre tract of land valued at \$100,000 as an addition to its campus, the University of Oregon school of medicine enters 1925 prepared for the most useful year of service in its history. The gift was made by the late C. S. Jackson, Mrs. Jackson, and P. Jackson of Portland.

The tract adjoins the present campus of the medical school of Marquam Hill, Portland. Under the terms of the gift, the land is to be used for medical school purposes, and is dedicated for all time to the healing of the sick and crippled, and the play of children.

The Jackson gift brings the total donations to the University of Oregon school of medicine to \$463,269 in the last three years. Of this amount, \$200,000 represents the gift of Edward Doernbecher and Mrs. E. W. Morse of Portland, in honor of their deceased father, Frank B. Doernbecher, for a hospital for children. Construction of this building is soon to begin on the medical school campus. When completed it will have sixty beds for the accommodation of juvenile cases.

The tract of 88 acres given

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils Opens Air Passages Right Up.

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more yawning, sneezing, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly. It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.

by the Jacksons, added to the 29 acres presented to the medical school in 1917 by the Oregon-Washington Railroad and Navigation Co., gives the institution a campus of 108 acres within a mile and a half of the Multnomah County courthouse. "The gift assures—and it was much needed—adequate room for expansion of the medical school," said Dean Richard B. Dillehunt, "and will do much to encourage health advancement and medical research in the state."

It was Mr. Jackson's original plan several years ago to establish on the property an orthopedic hospital for children. Before he could carry out this design he was taken ill and in the meantime the children's hospital had been established through the donation of the Doernbecher family.

The University of Oregon medical school is the only institution of its kind in Pacific America north of San Francisco and west of Minneapolis.

Ah! Backache Gone Rub Lumbago Away

Rub Pain from back with small trial bottle of old "St. Jacobs Oil."

Ah! Pain is gone! Quickly?—Yes. Almost instant relief from soreness, stiffness, lameness and pain follows a gentle rubbing with "St. Jacobs Oil."

Rub this soothing, penetrating oil right on your painful back, and like magic, relief comes. "St. Jacobs Oil" is a harmless backache, lumbago and sciatica remedy which never disappoints and doesn't burn the skin. Straighten up! Quit complaining! Stop those torturous "stitches." In a moment you will forget that you ever had a weak back, because it won't hurt or be stiff or lame. Don't suffer! Get a small trial bottle of old, honest "St. Jacobs Oil" from your druggist now and get this lasting relief.

Have A Joint Account In Our Bank

By a "Joint Account" we mean an account into which either a man or his wife may put money or from which either may draw money. Every man should make his wife his FINANCIAL PARTNER. Then if anything happens to him she will have the necessary experience to be able to take care of his money. We will welcome your account.

General Banking with unexcelled Service 4% Paid on Savings and Time Deposits \$25 will start a checking account and we make No "Service Charge" on same.
