The Montag is the only satisfactory combination wood and coal burning furnace built in the Pacific Northwest.

# folks - let us discuss your heating problem!

INTELLIGENTLY AND HELPFULLY!  
It's time, you know—time to get down to brass tacks and talk facts. Already the evenings are getting cooler and the early morning air makes your cheeks tingle—reminding us that winter is almost here.

Do not think in terms of "furnaces or types of furnaces." A "furnace in the basement" means nothing—unless it is a heating unit especially designed to meet the fuel and climatic conditions peculiar to your section and the requirements of your home—and installed therein by experts.

You want heat—safe heat—an abundant circulation of warm, moist air—perfectly distributed—so that each room in your home will be warm, comfortable and healthful. And you want this at the lowest possible cost in fuel and effort.

For more than 40 years Montag has been building heaters right here in the Northwest—to meet Northwest conditions. Every heating problem peculiar to this section has been met and answered. So that—whether your home is large or small—there is a Montag furnace to meet your requirements as satisfactorily as though it were designed exclusively for your property.

Installation is one of the vital secrets in scientific home-heating. Each home must be studied—each presents a separate problem—and every Montag furnace installed must be engineered into the home to meet the exact conditions existing

there. That is why we are asking you to come in NOW, we want to discuss your problem with you—go to your home and study it. Come in today—and arrange payments to suit your own convenience.

## New 1-Ton Truck

Chassis Only \$550 f. o. b. Flint, Mich.

Chevrolet introduces a new one-ton truck, built according to the fundamental policy of this company to provide "Quality at Low Cost".

It has a fine appearance and is specially designed and constructed for commercial service. Its deep 6-inch channel steel frame, hung low to the ground on long semi-elliptic springs, allows the platform to be placed at the right height for easy loading and unloading.

The powerful Chevrolet motor is famous for its ability to stand up under heavy service. It has well balanced crankshaft thoroughly lubricated, standard 3-speed transmission, fully enclosed dry-plate disc clutch, extra heavy rear axle with large spiral bevel driving gears and rigid one-piece pressed steel housing, heavy truck-type wheels and large tires, full running boards and fenders, Remy generator, starter and distributor ignition, and other quality features.

This truck is not only well adapted to city work but also for use in hilly country and over difficult roads. For lighter loads there is a Chevrolet commercial 1/2 ton chassis possessing the same quality features, price \$425 f. o. b. Flint, Michigan.
